

**Question for written answer E-001715/2016
to the Commission**

Rule 130

Anne Sander (PPE) and Franck Proust (PPE)

Subject: Temporary licence plates for imported vehicles

Differences in the legislation on temporary licence plates – their period of validity seems to vary from one Member State to another – are making things difficult for vehicle importers and posing an obstacle to the free movement of goods on the internal market.

1. Does the Commission share this view?
2. If so, is it planning to draw up new legislation with a view to harmonising rules in this area?
