Subject: Use of resources under the Adriatic cross-border cooperation programme 2007-2013

The Adriatic cross-border cooperation programme 2007-2013 had serious implementation problems because of the unsatisfactory work of the management body and the large number of countries covered, which made it difficult to take decisions. I received several reports to that effect from recipients from the programme area.

1. Are there any exact data on the overall financial results achieved by the programme? How much of the total resources earmarked were used?
2. What proportion of resources under the programme was allocated to Croatian recipients and how much was allocated to recipients from the other countries covered?
