

**Question for written answer E-004065/2016  
to the Commission**  
Rule 130  
**Ivan Jakovčić (ALDE)**

Subject: Radioactive waste

Disposing of radioactive waste is a very difficult and dangerous endeavour. Each improvisation in the storage of radioactive waste can result in immeasurable damage to human health and the environment.

Is the Commission aware that there are plans to construct a radioactive waste storage facility in the municipality of Dvor, Croatia.

Is it aware that the local community is strongly opposed to this?
