Subject: Reported delay in adopting and implementing the 2016-2021 waste management plan

According to reports published in the Croatian media, Croatia is the subject of an ongoing infringement procedure, and there is a danger that cohesion policy funding might be suspended, because the adoption and implementation of the 2016-2021 waste management plan are running late.

- Is it in fact the case that the implementation of the 2016-2021 waste management plan has fallen behind schedule?
- Are the above reports correct regarding the infringement procedure and the suspension of funding for Croatia? Which particular funding is involved?
