

**Question for written answer E-007176/2016
to the Commission**
Rule 130
Cătălin Sorin Ivan (S&D)

Subject: Early school-leaving

Many reasons exist as to why people leave school, resulting in unemployment, social exclusion and poverty, and all of those issues are problems which the whole EU is facing.

As part of the Education and Training 2020 strategy, the main objective of the 2014-2015 Working Group on School Policy was to reduce early school-leaving to less than 10% by 2020.

What measures have been introduced effectively in Member States? What statistics on the results does the Commission currently have?
