

**Question for written answer E-007271/2016
to the Commission**
Rule 130
Eleni Theodorou (ECR)

Subject: EOS Green Energy Project in Cyprus

Further to Written Question E-003004/2016, the EOS Green Energy Project is expected to have multiple benefits for Cyprus's real economy.

The EOS Green Energy Project has no additional Member State benefits and will be able to enter into the competitive, liberalised market owing to the unique incorporated storage system it has.

The EOS Green Energy Project has applied for financing under the InnovFin Energy Demo Projects facility, and the decision is pending.

Can the Commission advise as to which other instruments can provide financing?
