Subject: VP/HR - Rohingya

Rohingya activists have claimed that Burmese government forces have committed serious abuses during the current operations, including summary executions and the burning of villages. It seems that government security operations have cut off assistance to tens of thousands of people and forced many to flee their homes.

Will the VP/HR engage in talks with the Burmese government and army with a view to urgently ensuring that humanitarian aid can reach ethnic Rohingya and other vulnerable populations in the northern Rakhine state?
