Subject: Statistical data on fur farming

Can the Commission provide me with statistical data on the number of inspections and controls carried out on fur farms in the EU for the years 2014, 2015, 2016, listed by Member State?

When irregularities or cases of non-compliance have been found, what kind of measures have been taken?

Can the Commission provide me with an overview of the results of measures taken in cases of irregularities and non-compliance?
