

Question for written answer E-000867/2017
to the Commission
Rule 130
Francesc Gambús (PPE)

Subject: Follow-up to report PE 578.676

On 13 July 2016, the European Parliament's Committee on Petitions adopted a report on a fact-finding mission which was carried out one year ago and which looked into the situation in the final stretch of the River Ebro and its delta, and the River Tagus, where it passes through Talavera de la Reina. The report made certain requests of the Commission, and I would therefore like to know:

1. What action has the Commission taken in response to the requests?
2. Does the Commission have a report or document that sets out the action taken in response to the report?
3. What viable solutions is the Commission planning to put in place, within the scope of its authority, to offset the lack of sediment in the Ebro Delta?
