to the Commission**
Rule 130
Filiz Hyusmenova (ALDE)

Subject: Market Surveillance Package

The Commission recently stated that it will reinforce market surveillance in the area of goods in order to keep non-compliant products off the EU market and, in line with this objective, it proposed a market information tool that would allow information to be gathered directly from selected market players. However, as the Product Safety and Market Surveillance Package continues to be stuck in the Council, how does the Commission plan to reinforce market surveillance?
