

**Question for written answer E-005101/2017
to the Commission**
Rule 130
Viorica Dăncilă (S&D)

Subject: Facilities for the disabled.

Leisure and amusement parks, including aquatic centres in particular, are very popular during the summer months.

Unfortunately, however, some of them lack the necessary facilities to enable persons with reduced mobility to enjoy them to the same degree as others.

In view of this:

What support will the Commission provide for projects by local and regional authorities to designate areas with facilities for persons with reduced mobility, including special equipment, changing rooms and lavatories adapted to their needs, as well as electric mobility scooters for access to different areas and highlights in existing parks and aquatic centres and those under construction?
