Subject: Humanitarian assistance in Nepal

Since mid-August, Nepal has been facing some of the worst flooding and landslides ever known in its history. Over 1.7 million people have reportedly been affected, with that figure likely to rise in the near future. In response, the Commission is providing EUR 200 000 in humanitarian aid funding to assist those in need.

How will the Commission deliver this funding in order to reach the majority of those in need? How and by what criteria will the funding be distributed?
