Subject: Negative impact of the US tax reform on the EU

The US tax reform of 20 December 2017 provides for important changes concerning business taxation.

- 1) Does the Council consider that there is likely to be a fall in tax revenue in the EU following the US tax reform and, if so, how large does the Council estimate this fall in tax revenue to be?
- 2) Is the Council considering the possibility that the USA might be placed on the EU blacklist of tax havens as a result of the recently adopted tax reform?
