

**Question for written answer E-001068/2018
to the Commission**

Rule 130

Jozo Radoš (ALDE) and Ivan Jakovčić (ALDE)

Subject: Total Croatian renewable energy production

Croatia has already exceeded the 27% target for renewables – expressed as a proportion of total energy production – to be met by 2020.

Out of Croatia's total energy production from renewable sources, what proportion is accounted for by each particular type of renewable energy?

What documents are used as the basis for calculating the individual percentages of renewables?
