

**Question for written answer E-001161/2018  
to the Commission**

Rule 130

**Merja Kyllönen (GUE/NGL)**

Subject: Aviation: Single European Sky performance and charging schemes - comitology procedure

The Commission is currently working on the recast of the Single European Sky performance and charging schemes for the third regulatory period. However, there are still some concerns as to whether the proposed regulation will take into account the differences in performance of national air navigation service providers (ANSPs) in previous regulatory periods. There are large variations in the performance levels of ANSPs across Europe. Thus, the adoption of a one-size-fits-all approach to improvement requirements risks placing an undue and unfair burden on the best-performing service providers.

To what extent has the Commission considered amending the performance scheme structure in such a way as to focus the improvement requirements primarily on those ANSPs that have been under-performing in previous regulatory periods?
