Subject: Updating the EU-Mexico Global Agreement

The EU-Mexico Global Agreement is at an advanced stage. A lot of effort has been made, and both sides are keen to sign the updated agreement and consolidate our relations.

As Chair of the European Parliament's EU-Mexico Joint Parliamentary Committee, I believe it is vitally important to back the agreement in order to speed up the procedures that will allow the European Parliament to ratify it before the end of the current parliamentary term.

Could the Commission state what action it is taking with a view to ensuring the agreement can be formalised before the end of the current parliamentary term?
