José Blanco López (S&D)

Subject: Demographic decline

The latest population data published by the Spanish National Institute for Statistics (INE) reveals that Galicia's population has fallen for the seventh consecutive year and that Galicia is the region with the most alarming rate of net population change in Spain.

What EU resources have been allocated to programmes or measures to combat population decline and demographic ageing in Galicia during the current Multiannual Financial Framework and what view does the Commission take of their results, in light of the INE's worrying figures?
