Subject: Information on the Regulatory Assistance Project

The Regulatory Assistance Project (RAP) is an allegedly independent and non-partisan non-governmental organisation (NGO) dedicated to accelerating the transition to a clean, reliable and efficient energy future. The NGO is present in the United States, Europe and China and has an annual budget of approximately EUR 1.5 million.

According to the Transparency Register, the organisation has met with the European Commission on several occasions in the context of the Commission's work on a number of files related to the EU energy policy and the single energy market.

I would like to ask the Commission to provide me with any information it has on the content of these meetings and on the entities that help to fund this organisation.
