

**Question for written answer E-001133/2019
to the Commission**
Rule 130
José Blanco López (S&D)

Subject: Atlantic Trench

In its answer to question E-005073/2018 by the author of this question, the Commission said that its services had identified marine monitoring on the coast of Galicia as a verification target in 2019 and that it was monitoring the state of the waste dumped in the Atlantic Trench with a view to reviewing the verification planning in December 2018, where the verification targets for 2019 would be confirmed.

Can the Commission state whether it has included the monitoring and control of the state of radioactive waste dumped in the Atlantic Trench among those targets? If not, can it give the reasons why it has not done so?
