9.10.2018

AMENDMENTS

1 - 54

Draft report

Adina-Ioana Vălean

Establishing the Digital Europe programme for the period 2021-2027

Proposal for a regulation

(COM(2018)0434 – C8-0256/2018 – 2018/0227(COD))

Amendment 1

Joëlle Mélin, Sylvie Goddyn, Jean-François Jalkh

Proposal for a regulation

Recital 4

Text proposed by the Commission

(4) Pursuant to [reference to be updated as appropriate according to a new decision on OCTs: Article 88 of Council Decision / /EU⁵³], persons and entities established in overseas countries and territories (OCTs) should be eligible for funding subject to the rules and objectives of the Programme and possible arrangements applicable to the Member State to which the relevant overseas country or territory is linked.

⁵³ Council Decision / /EU.

Amendment

(4) Pursuant to [reference to be updated as appropriate according to a new decision on OCTs: Article 88 of Council Decision .../.../EU⁵³], persons and entities established in overseas countries and territories (OCTs) **and the outermost regions (OR)** should be eligible for funding subject to the rules and objectives of the Programme and possible arrangements applicable to the Member State to which the relevant overseas country or territory is linked.

⁵³ Council Decision / /EU.

Or. fr

Amendment 2

Luke Ming Flanagan

Proposal for a regulation

Recital 7

Text proposed by the Commission

(7) The European Council concluded in particular that the Union should urgently address emerging trends: this includes issues such as artificial intelligence and distributed ledgers technologies (e.g. blockchain), while at the same time ensuring a high level of data protection, digital rights and ethical standards. The European Council invited the Commission to put forward a European approach to artificial intelligence by early 2018 and called on the Commission to put forward the necessary initiatives for strengthening

Amendment

(7) The European Council concluded in particular that the Union should urgently address emerging trends: this includes issues such as artificial intelligence and distributed ledgers technologies (e.g. blockchain), while at the same time ensuring a high level of data protection, digital rights **and labour** and ethical standards. The European Council invited the Commission to put forward a European approach to artificial intelligence by early 2018 and called on the Commission to put forward the necessary initiatives for

the framework conditions with a view to enable the EU to explore new markets through risk-based radical innovations and to reaffirm the leading role of its industry.

strengthening the framework conditions with a view to enable the EU to explore new markets through risk-based radical innovations and to reaffirm the leading role of its industry.

Or. en

Amendment 3

Joëlle Mélin, Sylvie Goddyn, Jean-François Jalkh

Proposal for a regulation

Recital 7 a (new)

Text proposed by the Commission

Amendment

(7a) The European Union is lagging enormously behind the United States, Canada and China, those countries being almost 20 years ahead in relation to all the pillars identified at the Tallinn Digital Summit.

Or. fr

Amendment 4

Joëlle Mélin, Sylvie Goddyn, Jean-François Jalkh

Proposal for a regulation

Recital 9

Text proposed by the Commission

Amendment

(9) The Communication “Towards a common European data space”⁵⁸, addresses the new measure to be taken as a key step towards a common data space in the EU - a seamless digital area with a scale that will enable the development of new products and services based on data.

deleted

⁵⁸ COM (2018) 125 final

Amendment 5

Stefan Eck

Proposal for a regulation

Recital 10

Text proposed by the Commission

(10) The general objective of the Programme should be to support the digital transformation of industry and to foster better exploitation of the industrial potential of policies of innovation, research and technological development, for the benefit of businesses and citizens all over the Union. The programme should be structured into five Specific Objectives reflecting key policy areas, namely: high-performance computing, cybersecurity, artificial intelligence, advanced digital skills, and deployment, best use of digital capacities **and** interoperability. For all these areas, the Programme should also aim at better aligning Union, Member States and regional policies, and pooling of private and industrial resources in order to increase investment and develop stronger synergies.

Amendment

(10) The general objective of the Programme should be to support the digital transformation of industry **and of *European societies*** and to foster better exploitation of the industrial potential of policies of innovation, research and technological development, for the benefit of businesses, ***regions, local communities*** and citizens all over the Union. The programme should be structured into five Specific Objectives reflecting key policy areas, namely: high-performance computing, cybersecurity, artificial intelligence, advanced digital skills, and deployment, best use of digital capacities, interoperability **and closing the digital gap between regions and between urban and rural communities**. For all these areas, the Programme should also aim at better aligning Union, Member States and regional policies, and pooling of private and industrial resources in order to increase investment and develop stronger synergies.

Or. en

Amendment 6

Proposal for a regulation

Recital 10

Text proposed by the Commission

(10) The general objective of the Programme should be to support the digital transformation of industry and to foster

Amendment

(10) The general objective of the Programme should be to support the digital transformation of industry and to foster

better exploitation of the industrial potential of policies of innovation, research and technological development, for the benefit of businesses and *citizens* all over the Union. The programme should be structured into five Specific Objectives reflecting key policy areas, namely: high-performance computing, cybersecurity, artificial intelligence, advanced digital skills, and deployment, best use of digital capacities and interoperability. For all these areas, the Programme should also aim at better aligning Union, Member States and regional policies, and pooling of private and industrial resources in order to increase investment and develop stronger synergies.

better exploitation of the industrial potential of policies of innovation, research and technological development, for the benefit of *citizens (in the first instance) and* businesses and *their employees (in the second instance)* all over the Union. The programme should be structured into five Specific Objectives reflecting key policy areas, namely: high-performance computing, cybersecurity, artificial intelligence, advanced digital skills, and deployment, best use of digital capacities and interoperability. For all these areas, the Programme should also aim at better aligning Union, Member States and regional policies, and pooling of private and industrial resources in order to increase investment and develop stronger synergies.

Or. en

Amendment 7 **Stefan Eck**

Proposal for a regulation **Recital 11**

Text proposed by the Commission

(11) A central role in the implementation of the Programme should be attributed to Digital Innovation Hubs, which should stimulate the broad adoption of advanced digital technologies by industry, by public organisations and academia. A network of Digital Innovation Hubs should ensure the widest geographical coverage across Europe⁵⁹. A first set of Digital Innovation Hubs will be selected based on Member States' proposals and then the network will be enlarged through an open and competitive process. The Digital Innovation Hubs will serve as access points to latest digital capacities including high performance computing (HPC), artificial intelligence, cybersecurity, as well as other existing

Amendment

(11) A central role in the implementation of the Programme should be attributed to Digital Innovation Hubs, which should stimulate the broad adoption of advanced digital technologies by industry, by public organisations, *public administrations* and academia. A network of Digital Innovation Hubs should ensure the widest geographical coverage across Europe⁵⁹. A first set of Digital Innovation Hubs will be selected based on Member States' proposals and then the network will be enlarged through an open and competitive process. The Digital Innovation Hubs will serve as access points to latest digital capacities including high performance computing (HPC), artificial intelligence, cybersecurity, as well as other

innovative technologies such as Key Enabling Technologies, available also in fablabs or citylabs. They shall act as single-entry points in accessing tested and validated technologies and promote open innovation. They will also provide support in the area of advanced digital skills. The network of Digital Innovation Hubs should also contribute to the participation of the outermost regions in the Digital Single Market.

⁵⁹ As indicated in the Communication on Digitising European Industry (COM(2016) 180 final)

existing innovative technologies such as Key Enabling Technologies, available also in fablabs or citylabs. They shall act as single-entry points in accessing tested and validated technologies and promote open innovation. They will also provide support in the area of advanced digital skills. The network of Digital Innovation Hubs should also contribute to the participation of the outermost regions in the Digital Single Market.

Amendment 10 **Stefan Eck**

Proposal for a regulation **Recital 16**

Text proposed by the Commission

(16) The high performance computing and the related data processing capacities in the Union should allow to ensure wider use of high performance computing by **industry** and, more generally, in areas of public interest in order to seize unique opportunities that supercomputers bring to society as regards health, environment and security as well as competitiveness of industry, notably small and medium-sized enterprises.

Amendment

(16) The high performance computing and the related data processing capacities in the Union should allow to ensure wider use of high performance computing by **all beneficiaries of the programme** and, more generally, in areas of public interest in order to seize unique opportunities that supercomputers bring to society as regards **social inclusiveness**, health, environment and security as well as competitiveness of industry, notably small and medium-sized enterprises.

Or. en

Amendment 11 **Margrete Auken**

Proposal for a regulation **Recital 16 a (new)**

(16a) *The energy consumption of computer devices and data storage centres, which is expected to increase continuously over the next decades, should be based on renewable energy sources.*

Or. en

Justification

The storage of data becomes an increasingly prominent problem with data centres estimated to have the fastest growing carbon footprint from across the whole ICT (Information and Communication Technology) sector. Research shows that global electricity usage ascribed to Communication Technology in the coming years are expected to grow, leading to a potential 14% share of global CO2 emissions by 2040 (already 2% today).

Amendment 13
Luke Ming Flanagan

Proposal for a regulation
Recital 24

Text proposed by the Commission

(24) Trust is a prerequisite for the Digital Single Market to function. Cybersecurity technologies such as digital identities, cryptography or intrusion detection, and their application in areas such as finance, industry 4.0, energy, transportation, healthcare, or e-government are essential to safeguard the security and trust of online activity and transactions by **both** citizens, public administrations, and companies.

Amendment

(24) Trust is a prerequisite for the Digital Single Market to function. Cybersecurity technologies such as digital identities, cryptography or intrusion detection, and their application in areas such as finance, industry 4.0, energy, transportation, healthcare, or e-government are essential to safeguard the security and trust of online activity and transactions by citizens, public administrations, and companies.

Or. en

Justification

There are three elements, not two, thus the word 'both' does not apply.

Amendment 14
Joëlle Mélin, Sylvie Goddyn, Jean-François Jalkh

Proposal for a regulation
Recital 25 a (new)

Text proposed by the Commission

Amendment

(25a) Highly skilled technical expert jobs in areas such as artificial

intelligence, data analytics and cybersecurity go unfilled. There are currently more than 350 000 vacancies in these fields in the EU.

Or. fr

Amendment 15
Margrete Auken

Proposal for a regulation
Recital 28

Text proposed by the Commission

(28) The advanced digital technologies supported by this Programme, such as high performance computing, cybersecurity and artificial intelligence are now sufficiently mature to move beyond the research arena and be deployed, implemented and scaled-up at Union level. Just as the deployment of these technologies require a Union response so does the skills dimension. Training opportunities in advanced digital skills need to be scaled up, increased and made accessible throughout the EU. Failing this could impede the smooth deployment of advanced digital technologies and hamper the overall competitiveness of Union's economy. The actions supported by this programme are complementary to those supported by the ESF, ERDF and Horizon Europe programmes.

Amendment

(28) The advanced digital technologies supported by this Programme, such as high performance computing, cybersecurity, ***data protection*** and artificial intelligence are now sufficiently mature to move beyond the research arena and be deployed, implemented and scaled-up at Union level. Just as the deployment of these technologies require a Union response so does the skills dimension. Training opportunities in advanced digital skills need to be scaled up, increased and made accessible throughout the EU. Failing this could impede the smooth deployment of advanced digital technologies and hamper the overall competitiveness of Union's economy. The actions supported by this programme are complementary to those supported by the ESF, ERDF and Horizon Europe programmes.

Or. en

Amendment 16
Luke Ming Flanagan

Proposal for a regulation
Recital 29

Text proposed by the Commission

(29) Modernising public administrations and services through digital means is crucial to reducing administrative burden on **industry and on** citizens in general by making their interactions with public authorities faster, more convenient and less costly, as well as by increasing the efficiency and the quality of the services provided to citizens and businesses. Since a number of services of public interest already have a Union dimension, the support to their implementation and deployment at Union level should ensure that citizens and businesses will benefit from the access to high quality digital services across Europe.

Amendment

(29) Modernising public administrations and services through digital means is crucial to reducing administrative burden on citizens in general **and on industry** by making their interactions with public authorities faster, more convenient and less costly, as well as by increasing the efficiency and the quality of the services provided to citizens and businesses. Since a number of services of public interest already have a Union dimension, the support to their implementation and deployment at Union level should ensure that citizens and businesses will benefit from the access to high quality digital services across Europe.

Article 12 – paragraph 1 – point 2 (new)

Text proposed by the Commission

Amendment

(2) *To make use of the technological solutions safely, effectively and equally to create a common digital single market area, a thorough and harmonized framework of EU regulations must be created to generate a level playing field of market certainty.*

Amendment 47
Margrete Auken

Proposal for a regulation
Article 12 – paragraph 5 a (new)

Text proposed by the Commission

Amendment

5a. Actions including technology transfers outside the European Union are not permitted. With a view to ensure long term strategic security objectives an opportunity evaluation shall be done for participations of entities not having their main establishment in the European Union. Actions including technology transfers outside the European Union are not permitted. With a view to ensure long term strategic security objectives an opportunity evaluation shall be done for participations of entities not having their main establishment in the European Union.

Or. en

Justification

A competitive industry is also based on its technological level. Advances resulting from the programme's actions need to be used for increasing European competitiveness

Amendment 48
Joëlle Mélin, Sylvie Goddyn, Jean-François Jalkh

Proposal for a regulation
Article 16 – paragraph 1 a (new)

Text proposed by the Commission

Amendment

1a. A central role in the implementation of the programme should be assigned to Digital Innovation Hubs, which should encourage the broad adoption of advanced digital technologies

by industry, by public organisations and academia. A network of Digital Innovation Hubs should ensure the widest geographical coverage across Europe. A first set of Digital Innovation Hubs will be selected based on Member States' proposals and then the network will be enlarged through an open and competitive process. The Digital Innovation Hubs will serve as access points to the latest digital resources, including high performance computing (HPC), artificial intelligence, cybersecurity, as well as other existing innovative technologies such as Key Enabling Technologies, available also in fablabs or citylabs. They shall act as single-entry points for accessing tested and validated technologies and promote open innovation. They shall also provide support in the area of advanced digital skills.

Or. fr

Amendment 49

Joëlle Mélin, Sylvie Goddyn, Jean-François Jalkh

Proposal for a regulation Article 16 – paragraph 4

Text proposed by the Commission

4. Additional Digital Innovation Hubs shall be selected on the basis of an open and competitive process, in such a way to ensure the widest geographical coverage across Europe. The number of entities of the network shall be proportional to the population of a given Member States and there shall be at least one Digital Innovation Hub per Member State. To address the specific constraints faced by the EU outermost regions, specific entities *may* be nominated to cover their needs.
