

**Question for written answer P-000001/2015
to the Commission**
Rule 130
Louis Aliot (NI)

Subject: Juncker Plan

As expected, at the latest European Council summit the heads of state and government of the 28 EU Member States endorsed the investment plan drawn up by the Commission.

Portrayed as being able to yield EUR 315 billion, the plan actually consists of an initial contribution of only EUR 21 billion and relies heavily on hypothetical private investment.

In view of the fact that some EUR 1.3 trillion worth of projects have already been submitted by the Member States, the plan is clearly insufficient.

Could the Commission therefore submit details on what impact the plan will have on the real economy for major business sectors that will make it possible, as claimed, to turn EUR 21 billion into EUR 315 billion between 2015 and 2017?
