

**Question for written answer P-000339/2016
to the Commission**

Rule 130

Laurențiu Rebega (ENF)

Subject: Situation regarding the reforms in Moldova

The political situation in Moldova has created a major obstacle to the implementation of the reform process. There are nevertheless signs that progress is being made, particularly as regards trade with the EU, but also in the areas of justice and free movement. It must be borne in mind that Moldova does not have the resources to find a way out of this situation on its own. The Moldovan cause cannot be abandoned, and the country should be offered additional aid to remedy the current situation.

Given that we want to avoid any direct involvement in Moldova's internal process, what proposals would the Commission make to stabilise the current situation?
