

**Question for written answer P-003086/2016
to the Commission**
Rule 130
Claudia Schmidt (PPE)

Subject: European Development Funds

The Commission informed the S&D group that earmarking of European Development Funds 'for migration crisis prevention and the management of already existing migration flows' was impossible for the 11th EDF, since most of the funds have allegedly already been programmed.

1. Why is the Commission (DG DEVCO) unable to indicate how much of the EUR 30 billion in the 11th EDF is foreseen for migration crisis prevention if funds have already been programmed?
2. With regard to the exchange of views with Mr Rudischhauser during the presentation of the draft EDF discharge report, can the Commission deny that the External Assistance Management Reports 2014 have shown in their snapshot analysis that the Heads of EU Delegations in the ACPs and OCTs, under the responsibility of the EEAS, are in charge of overseeing 917 projects, 428 of which are delayed or have endangered objectives, and that the project value concerned amounts to EUR 9 188 million?
3. Can the Commission provide figures regarding the number of migrants moving from one African country to another to illustrate its statement from the hearing on the EDF Discharge 2014, these being, de facto, 'already existing migration flows'?
