

**Question for written answer P-006266/2016
to the Commission**
Rule 130
Michel Dantin (PPE)

Subject: EU horticultural production and competitiveness of the sector

In its answer to written question E-004592/2016 on 'EU horticultural production and competitiveness of the sector', the Commission appears only partially to address the problem actually posed. The term 'horticultural' used in the question refers to the flower and nursery ornamental plant sector, and not the fruit and vegetables sector.

Could the Commission answer written question E-004592/2016 taking this fact properly into account?
