

EGEA

European Garage and Test Equipment Association

22nd January 2013

Public Hearing on Roadworthiness Package, TRAN Committee

An evolving PTI environment:

New vehicle technologies require new technical information, adapted test methods and test equipment for safer vehicles

Keep the PTI equipment industry competitive and effective!

PTI specific technical information

- Equal access for test equipment manufacturers to ensure correct test functionality (efficient testing of vehicle safety systems)
- Must remain under a Regulation
- Should be part of the Vehicle Information Platform with equal access for PTI-involved operators

E▶ **particular about particulates for a healthier environment!**

Diesel particulates and NOx should be included (TEDDIE study) using existing test methods.

K▶ **Keep Europe's vehicles safe throughout their entire life**

- **Maintain effective suspension testing.**
- **Include modern headlight systems.**
