Planning of the IPA

Planning for assistance

Actions funded through IPA are in line with the priorities set out in the [European Partnerships](#) and [Accession Partnerships](#) for each country and in the [enlargement strategy and progress reports](#) published each autumn.

Latest Multi-annual Indicative Financial Framework (MIFF)

The annual enlargement package is accompanied by the IPA [Multi-annual Indicative Financial Framework](#)  [32 KB] (MIFF).

The MIFF provides information on the Commission's intentions in terms of indicative financial allocations by country and by [component](#). This financial matrix forms the link between the political framework and the budgetary process. It is revised annually, on a rolling three-year basis. The latest published [MIFF](#) is for 2009-12.

The table here shows a summary by country in million Euros.

Latest multi-annual indicative planning documents

Based on the allocations in the MIFF, and on the priorities identified within the political framework, the Commission prepares Multi-annual Indicative Planning Documents (MIPD) for each country, plus one for all multi-beneficiary programmes. These also cover a three-year period. The latest published [MIPDs](#) cover the period 2009-2011.

The next MIPDs (2011-2013) will reflect the Commission's intention to increasingly use a more sector-based logic in its planning of pre-accession assistance.

*In 2010, assessments on the continued relevance of the MIPDs led to the decision not to revise the MIPDs for 2010-2012. Instead, a global MIPD 2010-2012 was adopted to include figures for 2012.

Monitoring of assistance

The European Commission supervises the implementation of pre-accession programmes through its services in DG Enlargement; DG Regional Policy; DG Employment, Social Affairs and Equal Opportunities; DG Agriculture and Rural Development; and through its Delegations in the beneficiary countries.

Joint committees have been set up between the Commission and the beneficiary countries to monitor the implementation of financial assistance programmes. Monitoring and evaluation reports are produced and corrective actions agreed upon when necessary. Further monitoring takes place at sector and project level.

Evaluation of assistance

DG Enlargement carries out ongoing evaluation of financial assistance. The DG ensures that the findings, results and recommendations of this evaluation are translated into improved project design and implementation, and optimised resource allocation.

Reporting of assistance

In line with DG Enlargement's obligation to provide detailed information to the Council of the EU and the European Parliament, two reports are published each year. The "Report on Phare, Pre-accession, Transition and Cards Instruments" covers the financial assistance provided by the previous financial instruments managed by DG Enlargement, while the "Report on the Implementation of Financial Assistance under IPA" covers activities financed by IPA.
