

A specimen shall be considered to be a specimen of a species listed in Annexes A to D if it is, or is part of or derived from, an animal or plant at least one of whose 'parents' is of a species so listed. In cases where the 'parents' of such an animal or plant are of species listed in different Annexes, or of species only one of which is listed, the provisions of the more restrictive Annex shall apply. However, in the case of specimens of hybrid plants, if one of the 'parents' is of a species listed in Annex A, the provisions of the more restrictive Annex shall apply only if that species is annotated to that effect in the Annex;

- (u) 'trade' means the introduction into the  Union , including introduction from the sea, and the export and re-export from the Union, as well as the use, movement and transfer of possession within the  Union , including within a Member State, of specimens subject to the provisions of this Regulation;
- (v) 'transit' means the transport of specimens between two points outside the  Union  through the territory of the  Union  which are shipped to a named consignee and during which any interruption in the movement arises only from the arrangements necessitated by this form of traffic;
- (w) 'worked specimens that were acquired more than 50 years previously' means specimens that were significantly altered from their natural raw state for jewellery, adornment, art, utility, or musical instruments, before 3 March 1947 and that have been, to the satisfaction of the management authority of the Member State concerned, acquired in such conditions. Such specimens shall be considered as worked only if they are clearly in one of the aforementioned categories and require no further carving, crafting or manufacture to effect their purpose;
- (x) 'checks at the time of introduction, export, re-export and transit' means documentary checks on the certificates, permits and notifications provided for in this Regulation and, in cases where  Union  provisions so provide or in other cases by representative sampling of the consignments, examination of the specimens, where appropriate accompanied by the taking of samples with a view to analysis or more detailed checks.

### *Article 3*

#### **Scope**

1. Annex A shall contain:

- (a) the species listed in Appendix I to the Convention for which the Member States have not entered a reservation;
- (b) any species:
  - (i) which is, or may be, in demand for utilisation in the  Union  or for international trade and which is either threatened with extinction or so rare that any level of trade would imperil the survival of the species,

or

- (ii) which is in a genus of which most of the species or which is a species of which most of the subspecies are listed in Annex A in accordance with the criteria in point (a) or (b)(i) and whose listing in that Annex is essential for the effective protection of those taxa.

2. Annex B shall contain:

- (a) the species listed in Appendix II to the Convention, other than those listed in Annex A, for which the Member States have not entered a reservation;
- (b) the species listed in Appendix I to the Convention for which a reservation has been entered;
- (c) any other species not listed in Appendices I or II to the Convention:
  - (i) which is subject to levels of international trade that might not be compatible:
    - with its survival or with the survival of populations in certain countries,  
or
    - with the maintenance of the total population at a level consistent with the role of the species in the ecosystems in which it occurs;
  - or
  - (ii) whose listing in the Annex for reasons of similarity in appearance to other species listed in Annex A or B, is essential in order to ensure the effectiveness of controls on trade in specimens of such species;
- (d) species in relation to which it has been established that the introduction of live specimens into the natural habitat of the  Union  would constitute an ecological threat to wild species of fauna and flora indigenous to the  Union .

3. Annex C shall contain:

- (a) the species listed in Appendix III to the Convention, other than those listed in Annex A or B, for which the Member States have not entered a reservation;
- (b) the species listed in Appendix II to the Convention for which a reservation has been entered.

4. Annex D shall contain:

- (a) species not listed in Annexes A, B and C which are imported into the  Union  in such numbers as to warrant monitoring;
- (b) the species listed in Appendix III to the Convention for which a reservation has been entered.

5. Where the conservation status of species covered by this Regulation warrants their inclusion in one of the Appendices to the Convention, the Member States shall contribute to the necessary amendments.

## Article 4

### Introduction into the Union

1. The introduction into the  Union  of specimens of the species listed in Annex A shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import permit issued by a management authority of the Member State of destination.

The import permit may be issued only in accordance with the restrictions established pursuant to paragraph 6 and when the following conditions have been met:

- (a) the competent scientific authority, after considering any opinion of the Scientific Review Group, has advised that the introduction into the  Union :
  - (i) would not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species,
  - (ii) is taking place:
    - for one of the purposes referred to in Article 8(3)(e), (f) and (g), or
    - for other purposes which are not detrimental to the survival of the species concerned;
- (b)
  - (i) the applicant provides documentary evidence that the specimens have been obtained in accordance with the legislation on the protection of the species concerned which, in the case of import from a third country of specimens of a species listed in the Appendices to the Convention, shall be an export permit or re-export certificate, or copy thereof, issued in accordance with the Convention by a competent authority of the country of export or re-export,
  - (ii) however, the issuance of import permits for species listed in Annex A in accordance with Article 3(1)(a) shall not require such documentary evidence, but the original of any such import permit shall be withheld from the applicant pending presentation of the export permit or re-export certificate;
- (c) the competent scientific authority is satisfied that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (d) the management authority is satisfied that the specimen is not to be used for primarily commercial purposes;
- (e) the management authority is satisfied, following consultation with the competent scientific authority, that there are no other factors relating to the conservation of the species which militate against issuance of the import permit; and
- (f) in the case of introduction from the sea, the management authority is satisfied that any live specimen will be so prepared and shipped as to minimise the risk of injury, damage to health or cruel treatment.

2. The introduction into the  Union  of specimens of the species listed in Annex B shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import permit issued by a management authority of the Member State of destination.

The import permit may be issued only in accordance with the restrictions established pursuant to paragraph 6 and when:

- (a) the competent scientific authority, after examining available data and considering any opinion of the Scientific Review Group, is of the opinion that the introduction into the  Union  would not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species, taking account of the current or anticipated level of trade. This opinion shall be valid for subsequent imports as long as the abovementioned aspects have not changed significantly;
- (b) the applicant provides documentary evidence that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (c) the conditions referred to in paragraph 1(b)(i), (e) and (f) have been met.

3. The introduction into the  Union  of specimens of the species listed in Annex C shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import notification and:

- (a) in the case of export from a country mentioned in relation to the species concerned in Annex C, the applicant shall provide documentary evidence, by means of an export permit issued in accordance with the Convention by an authority of that country competent for the purpose, that the specimens have been obtained in accordance with the national legislation on the conservation of the species concerned; or
- (b) in the case of export from a country not mentioned in relation to the species concerned in Annex C or re-export from any country, the applicant shall present an export permit, a re-export certificate or a certificate of origin issued in accordance with the Convention by an authority of the exporting or re-exporting country competent for the purpose.

4. The introduction into the  Union  of specimens of the species listed in Annex D shall be subject to completion of the necessary checks and the prior presentation of an import notification at the border customs office at the point of introduction.

5. The conditions for the issuance of an import permit as referred to in paragraph 1(a) and (d) and in paragraph 2(a), (b) and (c) shall not apply to specimens for which the applicant provides documentary evidence:

- (a) that they had previously been legally introduced into or acquired in the  Union  and that they are, modified or not, being reintroduced into the  Union ; or
- (b) that they are worked specimens that were acquired more than 50 years previously.

### Export or re-export from the Union

1. The export or re-export from the  Union  of specimens of the species listed in Annex A shall be subject to completion of the necessary checks and the prior presentation, at the customs office at which the export formalities are completed, of an export permit or re-export certificate issued by a management authority of the Member State in which the specimens are located.
2. An export permit for specimens of the species listed in Annex A may be issued only when the following conditions have been met:
  - (a) the competent scientific authority has advised in writing that the capture or collection of the specimens in the wild or their export will not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species;
  - (b) the applicant provides documentary evidence that the specimens have been obtained in accordance with the legislation in force on the protection of the species in question; where the application is made to a Member State other than the Member State of origin, such documentary evidence shall be furnished by means of a certificate stating that the specimen was taken from the wild in accordance with the legislation in force on its territory;
  - (c) the management authority is satisfied that:
    - (i) any live specimen will be so prepared and shipped as to minimise the risk of injury, damage to health or cruel treatment, and
    - (ii) – the specimens of species not listed in Appendix I to the Convention will not be used for primarily commercial purposes, or  
– in the case of export to a State party to the Convention of specimens of the species referred to in Article 3(1)(a) of this Regulation, an import permit has been issued;and
  - (d) the management authority of the Member State is satisfied, following consultation with the competent scientific authority, that there are no other factors relating to the conservation of the species which militate against issuance of the export permit.

3. A re-export certificate may be issued only when the conditions referred to in paragraph 2(c) and (d) have been met and when the applicant provides documentary evidence that the specimens:

- (a) were introduced into the  Union  in accordance with the provisions of this Regulation;
- (b) if introduced into the  Union  before 3 March 1997, were introduced in accordance with the provisions of Council Regulation (EEC) No 3626/82<sup>11</sup>; or  if  introduced into the  Union  before the entry into force of this Regulation but after 3 March 1997, were introduced into the  Union  in accordance with the provisions of Regulation (EC) No 338/97;  or
- (c) if introduced into the  Union  before 1984, entered international trade in accordance with the provisions of the Convention; or
- (d) were legally introduced into the territory of a Member State before the provisions of the Regulations referred to in (a) and (b) or of the Convention became applicable to them, or became applicable in that Member State.

4. The export or re-export from the  Union  of specimens of the species listed in Annexes B and C shall be subject to completion of the necessary checks and the prior presentation, at the customs office at which the export formalities are completed, of an export permit or re-export certificate issued by a management authority of the Member State in whose territory the specimens are located.

An export permit may be issued only when the conditions referred to in paragraph 2(a), (b), (c)(i) and (d) have been met.

A re-export certificate may be issued only when the conditions referred to in paragraph 2(c)(i) and (d) and in paragraph 3(a) to (d) have been met.

## Article 6

### Rejection of applications for permits and certificates referred to in Articles 4, 5 and 10

1. When a Member State rejects an application for a permit or certificate in a case of significance in respect of the objectives of this Regulation, it shall immediately inform the Commission of the rejection and of the reasons for rejection.

2. The Commission shall communicate information received in accordance with paragraph 1 to the other Member States in order to ensure the uniform application of this Regulation.

3. When an application is made for a permit or certificate relating to specimens for which such an application has previously been rejected, the applicant must inform the competent authority to which the application is submitted of the previous rejection.

4. Member States shall recognise the rejection of applications by the competent authorities of the other Member States, where such rejection is based on the provisions of this Regulation.

However, the first subparagraph shall not apply where the circumstances have significantly changed or where new evidence to support an application has become available. In such cases, if a management authority issues a permit or certificate, it shall inform the Commission thereof, stating the reasons for issuance.

### Movement of live specimens

1. Any movement within the  Union  of a live specimen of a species listed in Annex A from the location indicated in the import permit or in any certificate issued in compliance with this Regulation shall require prior authorisation from a management authority of the Member State in which the specimen is located. In other cases of movement, the person responsible for moving the specimen must be able, where applicable, to provide proof of the legal origin of the specimen.

2. Such authorisation shall:

- (a) be granted only when the competent scientific authority of such Member State or, where the movement is to another Member State, the competent scientific authority of the latter, is satisfied that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (b) be confirmed by issuance of a certificate; and
- (c) where applicable, be immediately communicated to a management authority of the Member State in which the specimen is to be located.

3. However, no such authorisation shall be required if a live animal must be moved for the purpose of urgent veterinary treatment and is returned directly to its authorised location.

4. Where a live specimen of a species listed in Annex B is moved within the  Union , the holder of the specimen may relinquish it only after ensuring that the intended recipient is adequately informed of the accommodation, equipment and practices required to ensure the specimen will be properly cared for.

5. When any live specimens are transported into, from or within the  Union  or are held during any period of transit or transshipment, they shall be prepared, moved and cared for in a manner such as to minimise the risk of injury, damage to health or cruel treatment and, in the case of animals, in conformity with  Union  legislation on the protection of animals during transport.

*Article 11*

**Validity of and special conditions for permits and certificates**

---

1. Without prejudice to stricter measures which the Member States may adopt or maintain, permits and certificates issued by the competent authorities of the Member States in accordance with this Regulation shall be valid throughout the  Union .

2. Any such permit or certificate, as well as any permit or certificate issued on the basis of it, shall be deemed void if a competent authority or the Commission, in consultation with the competent authority which issued the permit or certificate, establishes that it was issued on the false premise that the conditions for its issuance were met.

Specimens situated in the territory of a Member State and covered by such documents shall be seized by the competent authorities of that Member State and may be confiscated.

3. Any permit or certificate issued in accordance with this Regulation may stipulate conditions and requirements imposed by the issuing authority to ensure compliance with the provisions thereof. Where such conditions or requirements need to be incorporated in the design of permits or certificates, Member States shall inform the Commission thereof.

4. Any import permit issued on the basis of a copy of the corresponding export permit or re-export certificate shall be valid for the introduction of specimens into the  Union  only when accompanied by the original of the valid export permit or re-export certificate.

---

5. Each management authority referred to in the first subparagraph of paragraph 1 shall, if so requested by the Commission, communicate to it within two months the names and specimen signatures of the persons authorised to sign permits or certificates, and impressions of the stamps, seals or other devices used to authenticate permits or certificates.

Member States shall communicate to the Commission any changes in the information already provided, not later than two months after the implementation of such change.

*Article 14*

**Monitoring of compliance and investigation of infringements**

1. The competent authorities of the Member States shall monitor compliance with the provisions of this Regulation.

If, at any time, the competent authorities have reason to believe that these provisions are being infringed, they shall take the appropriate steps to ensure compliance or to instigate legal action.

Member States shall inform the Commission and, in the case of species listed in the Appendices to the Convention, the Convention Secretariat of any steps taken by the

competent authorities in relation to significant infringements of this Regulation, including seizures and confiscations.

2. The Commission shall draw the attention of the competent authorities of the Member States to matters whose investigation it considers necessary under this Regulation. Member States shall inform the Commission and, in the case of species listed in the Appendices to the Convention, the Convention Secretariat of the outcome of any subsequent investigation.

3. An enforcement group shall be established consisting of the representatives of each Member State's authorities with responsibility for ensuring the implementation of the provisions of this Regulation. The group shall be chaired by the representative of the Commission.

The enforcement group shall examine any technical question relating to the enforcement of this Regulation raised by the chairman, either on his own initiative or at the request of the members of the group or the Committee.

The Commission shall convey the opinions expressed in the enforcement group to the Committee.

### Sanctions

1. Member States shall take appropriate measures to ensure the imposition of sanctions for at least the following infringements of this Regulation:

- (a) introduction into, or export or re-export from, the ☒ Union ☒ of specimens without the appropriate permit or certificate or with a false, falsified or invalid permit or certificate or one altered without authorisation by the issuing authority;
- (b) failure to comply with the stipulations specified on a permit or certificate issued in accordance with this Regulation;
- (c) making a false declaration or knowingly providing false information in order to obtain a permit or certificate;
- (d) using a false, falsified or invalid permit or certificate or one altered without authorisation as a basis for obtaining a ☒ Union ☒ permit or certificate or for any other official purpose in connection with this Regulation;
- (e) failure to make an import notification or making a false import notification;
- (f) shipment of live specimens not properly prepared so as to minimise the risk of injury, damage to health or cruel treatment;
- (g) use of specimens of species listed in Annex A other than in accordance with the authorisation given at the time of issuance of the import permit or subsequently;
- (h) trade in artificially propagated plants contrary to the provisions laid down in accordance with the second subparagraph of Article 7(1);
- (i) shipment of specimens into or out of or in transit through the territory of the ☒ Union ☒ without the appropriate permit or certificate issued in accordance with this Regulation and, in the case of export or re-export from a third country party to the Convention, in accordance therewith, or without satisfactory proof of the existence of such permit or certificate;

---

<sup>13</sup> OJ L 41, 14.2.2003, p. 26.

- (j) purchase, offer to purchase, acquisition for commercial purposes, use for commercial gain, display to the public for commercial purposes, sale, keeping for sale, offering for sale or transporting for sale of specimens in breach of Article 8;
- (k) use of a permit or certificate for any specimen other than one for which it was issued;
- (l) falsification or alteration of any permit or certificate issued in accordance with this Regulation;
- (m) failure to disclose the rejection of an application for a  Union  import, export or re-export permit or certificate, in accordance with Article 6(3).

2. The measures referred to in paragraph 1 shall be appropriate to the nature and gravity of the infringement and shall include provisions relating to the seizure and, where appropriate, confiscation of specimens.

3. Where a specimen is confiscated, it shall be entrusted to a competent authority of the Member State of confiscation which:

- (a) following consultation with a scientific authority of that Member State, shall place or otherwise dispose of the specimen under conditions which it deems to be appropriate and consistent with the purposes and provisions of the Convention and this Regulation; and
- (b) in the case of a live specimen which has been introduced into the  Union , may, after consultation with the State of export, return the specimen to that State at the expense of the convicted person.

4. Where a live specimen of a species listed in Annex B or C arrives at a point of introduction into the  Union  without the appropriate valid permit or certificate, the specimen must be seized and may be confiscated or, if the consignee refuses to acknowledge the specimen, the competent authorities of the Member State responsible for the point of introduction may, if appropriate, refuse to accept the shipment and require the carrier to return the specimen to its place of departure.

## ANNEX I

### Notes on interpretation of Annexes A, B, C and D

1. Species included in these Annexes A, B, C and D are referred to:
  - (a) by the name of the species; or
  - (b) as being all of the species included in a higher taxon or designated part thereof.
2. The abbreviation “spp.” is used to denote all species of a higher taxon.
3. Other references to taxa higher than species are for the purposes of information or classification only.
4. Species printed in bold in Annex A are listed there in consistency with their protection as provided for by Council Directive 2009/147/EC<sup>14</sup> or Council Directive 92/43/EEC<sup>15</sup>.
5. The following abbreviations are used for plant taxa below the level of species:
  - (a) “ssp.” is used to denote subspecies;
  - (b) “var(s).” is used to denote variety (varieties); and
  - (c) “fa.” is used to denote forma.
6. The symbols “(I)”, “(II)” and “(III)” placed against the name of a species or higher taxon refer to the Appendices to the Convention in which the species concerned are listed as indicated in notes 7 to 9. Where none of these annotations appears, the species concerned are not listed in the Appendices to the Convention.
7. (I) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix I to the Convention.
8. (II) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix II to the Convention.
9. (III) against the name of a species or higher taxon indicates that it is included in Appendix III to the Convention. In this case the country with respect to which the species or higher taxon is included in Appendix III is also indicated.
10. “Cultivar” means, following the definition of the 8th edition of the *International Code of Nomenclature for Cultivated Plants*, an assemblage of plants that (a) has been selected for a particular character or combination of characters, (b) is distinct, uniform, and stable in these characters, and (c) when propagated by appropriate

<sup>14</sup> OJ L 20, 26.1.2010, p. 7.

<sup>15</sup> OJ L 206, 22.7.1992, p. 7.

means, retains those characters. No new taxon of a cultivar can be regarded as such until its category name and circumscription has been formally published in the latest edition of the International Code of Nomenclature for Cultivated Plants.

11. Hybrids may be specifically included in the Appendices but only if they form distinct and stable populations in the wild. Hybrid animals that have in their previous four generations of the lineage one or more specimens of species included in Annexes A or B shall be subject to the provisions of this Regulation just as if they were full species, even if the hybrid concerned is not specifically included in the Annexes.
12. When a species is included in Annex A, B or C, all parts and derivatives of the species are also included in the same Annex unless the species is annotated to indicate that only specific parts and derivatives are included. In accordance with Article 2(t) of this Regulation, the symbol “#” followed by a number placed against the name of a species or higher taxon included in Annex B or C designates parts or derivatives which are specified in relation thereto for the purposes of the Regulation as follows:

#1	Designates all parts and derivatives, except: <ul style="list-style-type: none"> <li>(a) seeds, spores and pollen (including pollinia);</li> <li>(b) seedling or tissue cultures obtained <i>in vitro</i>, in solid or liquid media, transported in sterile containers;</li> <li>(c) cut flowers of artificially propagated plants; and</li> <li>(d) fruits and parts and derivatives thereof of artificially propagated plants of the genus <i>Vanilla</i>.</li> </ul>
#2	Designates all parts and derivatives, except: <ul style="list-style-type: none"> <li>(a) seeds and pollen; and</li> <li>(b) finished products packaged and ready for retail trade.</li> </ul>
#3	Designates whole and sliced roots and parts of roots.
#4	Designates all parts and derivatives, except: <ul style="list-style-type: none"> <li>(a) seeds (including seedpods of Orchidaceae), spores and pollen (including pollinia). The exemption does not apply to seeds from Cactaceae spp. exported from Mexico, and to seeds from <i>Beccariophoenix madagascariensis</i> and <i>Neodypsis decaryi</i> exported from Madagascar;</li> <li>(b) seedling or tissue cultures obtained <i>in vitro</i>, in solid or liquid media, transported in sterile containers;</li> <li>(c) cut flowers of artificially propagated plants;</li> <li>(d) fruits and parts and derivatives thereof of naturalized or artificially</li> </ul>

	<p>propagated plants of the genus <i>Vanilla</i> (Orchidaceae) and of the family Cactaceae;</p> <p>(e) stems, flowers, and parts and derivatives thereof of naturalized or artificially propagated plants of the genera <i>Opuntia</i> subgenus <i>Opuntia</i> and <i>Selenicereus</i> (Cactaceae); and</p> <p>(f) finished products of <i>Euphorbia antisyphilitica</i> packaged and ready for retail trade.</p>
#5	Designates logs, sawn wood and veneer sheets.
#6	Designates logs, sawn wood, veneer sheets and plywood.
#7	Designates logs, wood-chips, powder and extracts.
#8	Designates underground parts (i.e. roots, rhizomes): whole, parts and powdered.
#9	Designates all parts and derivatives, except those bearing a label “Produced from <i>Hoodia</i> spp. material obtained through controlled harvesting and production in collaboration with the CITES Management Authorities of Botswana/Namibia/South Africa under agreement no. BW/NA/ZA xxxxxxx”.
#10	Designates logs, sawn wood, veneer sheets, including unfinished wood articles used for the fabrication of bows for stringed musical instruments.
#11	Designates logs, sawn wood, veneer sheets, plywood, powder and extracts.
#12	Designates logs, sawn wood, veneer sheets, plywood and essential oil, excluding finished products packaged and ready for retail trade.
#13	Designates the kernel (also known as “endosperm”, “pulp” or “copra”) and any derivative thereof.

13. As none of the species or higher taxa of FLORA included in Annex A is annotated to the effect that its hybrids shall be treated in accordance with the provisions of Article 4.1 of the Regulation, this means that artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Regulation.
14. Urine, faeces and ambergris which are waste products and gained without the manipulation of the animal concerned are not subject to the provisions of the Regulation.
15. In respect of fauna species listed in Annex D, the provisions shall apply only to live specimens and whole, or substantially whole, dead specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:

§ 1	Any whole, or substantially whole, skins, raw or tanned.
-----	--

§ 2	Any feathers or any skin or other part with feathers on it.
-----	---

16. In respect of flora species listed in Annex D, the provisions shall apply only to live specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:

§ 3	Dried and fresh plants, including, where appropriate; leaves, roots/rootstock, stems, seeds/spores, bark and fruits.

		For all of the following Annex A orchid species, seedling or tissue cultures are not subject to the provisions of this Regulation, when: <ul style="list-style-type: none"> <li>- they are obtained <i>in vitro</i>, in solid or liquid media, and</li> <li>- meet the definition of “artificially propagated” in accordance with Article 56 of Commission Regulation (EC) No 865/2006, and</li> <li>- when introduced into or (re-)exported from the Union are transported</li> </ul>		

<sup>30</sup>

Artificially propagated hybrids of *Cymbidium*, *Dendrobium*, *Phalaenopsis* and *Vanda* are not subject to the provisions of this Regulation, when specimens are readily recognizable as artificially propagated and do not show any signs of having been collected in the wild such as mechanical damage or strong dehydration resulting from collection, irregular growth and heterogeneous size and shape within a taxon and shipment, algae or other epiphyllous organisms adhering to leaves, or damage by insects or other pests; and

(a) when shipped in non flowering state, the specimens must be traded in shipments consisting of individual containers (such as cartons, boxes, crates or individual shelves of CC-containers) each containing 20 or more plants of the same hybrid; the plants within each container must exhibit a high degree of uniformity and healthiness; and the shipment must be accompanied by documentation, such as an invoice, which clearly states the number of plants of each hybrid; or

(b) when shipped in flowering state, with at least one fully open flower per specimen, no minimum number of specimens per shipment is required but specimens must be professionally processed for commercial retail sale, e.g. labelled with printed labels or packaged with printed packages indicating the name of the hybrid and the country of final processing. This should be clearly visible and allow easy verification.

Plants not clearly qualifying for the exemption must be accompanied by appropriate CITES documents.
