DRAFT OPINION

of the Committee on Industry, Research and Energy

for the Committee on Civil Liberties, Justice and Home Affairs

Rapporteur: Kaja Kallas
SHORT JUSTIFICATION

The European Commission proposal for a regulation concerning the respect for private life and the protection of personal data in electronic communications and repealing Directive 2002/58/EC aims at the protection of fundamental rights and freedoms, in particular the respect for private life, confidentiality of communications and the protection of personal data in the electronic communications sector but also guarantees the free movement of electronic communications data, equipment and services in the Union.

The Rapporteur is generally supportive of the Commission's proposal, in particular the need to adapt it to technological innovation and new means of communication, in order for this legislation to meet its objectives and be fit for purpose.

Free flow of data and protection of personal data in the Union

The rapporteur welcomes the change of legal instrument from a Directive to a Regulation. The implementation of the former Directive has shown diverging implementations and different interpretations of the law. The rapporteur therefore believes that a Regulation could be a better tool to ensure the protection of personal data in communications of natural and legal persons and safeguards the free flow of data across the Union. The rapporteur however believes that there is a need for the European data protection board to play a more important role in ensuring consistency in the enforcement of this Regulation, in particular by issuing guidance and opinions, building on the consistency mechanism set out in Regulation (EU) 2016/679. In addition, the rapporteur welcomes the task given to data protection authorities to enforce this regulation while stressing that data protection should become more and more a horizontal matter and all authorities should cooperate to this effect, providing technical assistance where necessary to break silos.

Scope

The rapporteur supports the extension of the scope of this Regulation to over-the-top services in light of the increasing role of such services in enabling communications, and the link of the proposed regulation with the definitions set out in the Proposed Directive establishing the European electronic communications Code. The rapporteur stresses however the need to ensure consistency and coherence between the definition in the Code and the e-privacy regulation to avoid loopholes but also risks of inapplicability of some provisions to certain types of services.

Technology neutrality

The rapporteur welcomes the intention and efforts of the Commission in trying to address the complex issue of “consent fatigue” and the need to find more user friendly ways to inform end-users and gives them choices with regard to their privacy. The rapporteur however considers that the proposal of the Commission is too focused on websites while the trend is moving more and more towards apps, IoT platforms and so on. The solutions proposed are too narrowly focused on browsers which risks preventing the regulation to stand the test of time. In addition, the proposal makes a strict distinction between first party cookies and third party cookies. The rapporteur believes that this distinction is not future proof in light of the fast-
moving innovation of the digital sector, where a first party cookie can move on to gathering data as a third party cookie, or where other tracking techniques are no longer based on first or third party cookies. The impact on privacy of a cookie should rather be based on its purpose, for instance if the purpose of gathering information is for behaviour based marketing and used cross device, on the types of information it collects, and how the information gathered is shared. The rapporteur therefore does not believe that the strict distinction between first party and third party cookies is the most effective. The user should be better informed, have access to more transparency on the way cookies function, and be able to opt in.

**Notice and standardised icons**

The rapporteur does not support the possibility of collection of information emitted by terminal equipment to enable it to connect to another device and, or to network equipment, if there is a sign informing users that this is a tracking area. Such provision creates a risk of fears and anxiety among end-users without providing them a concrete and practical option to opt out of being tracked.

**AMENDMENTS**

The Committee on Industry, Research and Energy calls on the Committee on Civil Liberties, Justice and Home Affairs, as the committee responsible, to take into account the following amendments:

**Amendment 1**

**Proposal for a regulation**

**Recital 7**

**Text proposed by the Commission**

(7) The Member States should be allowed, within the limits of this Regulation, to maintain or introduce national provisions to further specify and clarify the application of the rules of this Regulation in order to ensure an effective application and interpretation of those rules. Therefore, the margin of discretion, which Member States have in this regard, should maintain a balance between the protection of private life and personal data and the free movement of electronic communications data.

**Amendment**

(7) The European Data protection board should, where necessary, issue guidance and opinions within the limits of this Regulation to further specify and clarify the application of the rules of this Regulation in order to ensure an effective application and interpretation of those rules. Cooperation and consistency between Member States, in particular between national data protection authorities, is essential to maintain a balance between the protection of private life and personal data and the free movement of electronic communications data in the Union.
Amendment 2

Proposal for a regulation
Recital 13

Text proposed by the Commission

(13) The development of fast and efficient wireless technologies has fostered the increasing availability for the public of internet access via wireless networks accessible by anyone in public and semi-private spaces such as 'hotspots' situated at different places within a city, department stores, shopping malls and hospitals. To the extent that those communications networks are provided to an undefined group of end-users, the confidentiality of the communications transmitted through such networks should be protected. The fact that wireless electronic communications services may be ancillary to other services should not stand in the way of ensuring the protection of confidentiality of communications data and application of this Regulation. Therefore, this Regulation should apply to electronic communications data using electronic communications services and public communications networks. In contrast, this Regulation should not apply to closed groups of end-users such as corporate networks, access to which is limited to members of the corporation.

Amendment

(13) The development of fast and efficient wireless technologies has fostered the increasing availability for the public of internet access via wireless networks accessible by anyone in public and semi-private spaces such as 'hotspots' situated at different places within a city, department stores, shopping malls and hospitals. To the extent that those communications networks are provided to an undefined group of end-users, the confidentiality of the communications transmitted through such networks should be protected. The fact that wireless electronic communications services may be ancillary to other services should not stand in the way of ensuring the protection of confidentiality of communications data and application of this Regulation. Therefore, this Regulation should apply to electronic communications data using electronic communications services and public communications networks. In contrast, this Regulation should not apply to closed groups of end-users such as corporate networks, access to which is limited to members of the corporation. The mere act of requiring a password should not be considered as providing access to a closed group of end-users if the access is provided to an undefined group of end-users.

Amendment 3
Proposal for a regulation
Recital 19

Text proposed by the Commission

(19) The content of electronic communications pertains to the essence of the fundamental right to respect for private and family life, home and communications protected under Article 7 of the Charter. Any interference with the content of electronic communications should be allowed only under very clear defined conditions, for specific purposes and be subject to adequate safeguards against abuse. This Regulation provides for the possibility of providers of electronic communications services to process electronic communications data in transit, with the informed consent of all the end-users concerned. For example, providers may offer services that entail the scanning of emails to remove certain pre-defined material. Given the sensitivity of the content of communications, this Regulation sets forth a presumption that the processing of such content data will result in high risks to the rights and freedoms of natural persons. When processing such type of data, the provider of the electronic communications service should always consult the supervisory authority prior to the processing. Such consultation should be in accordance with Article 36 (2) and (3) of Regulation (EU) 2016/679. The presumption does not encompass the processing of content data to provide a service requested by the end-user where the end-user has consented to such processing and it is carried out for the purposes and duration strictly necessary and proportionate for such service. After electronic communications content has been sent by the end-user and received by the intended end-user or end-users, it may be recorded or stored by the end-user, end-users or by a third party entrusted by them.

Amendment

(19) The content of electronic communications pertains to the essence of the fundamental right to respect for private and family life, home and communications protected under Article 7 of the Charter. Any interference with the content of electronic communications should be allowed only under very clear defined conditions, for specific purposes and be subject to adequate safeguards against abuse. This Regulation provides for the possibility of providers of electronic communications services to process electronic communications data in transit, with the informed consent of all the end-users concerned. For example, providers may offer services that entail the scanning of emails to remove certain pre-defined material. For services that are provided to users engaged in purely personal or household activities, the consent of the end-user requesting the service should be sufficient. Given the sensitivity of the content of communications, this Regulation sets forth a presumption that the processing of such content data will result in high risks to the rights and freedoms of natural persons. When processing such type of data, the provider of the electronic communications service should always consult the supervisory authority prior to the processing. Such consultation should be in accordance with Article 36 (2) and (3) of Regulation (EU) 2016/679. The presumption does not encompass the processing of content data to provide a service requested by the end-user where the end-user has consented to such processing and it is carried out for the purposes and duration strictly necessary and proportionate for such service. After electronic communications content has
to record or store such data. Any processing of such data must comply with Regulation (EU) 2016/679. Any data that has been sent by the end-user and received by the intended end-user or end-users, it may be recorded or stored by the end-user, end-users or by a third party entrusted by them to record or store such data. Any processing of such data must comply with Regulation (EU) 2016/679.

Amendment 4
Proposal for a regulation
Recital 22

Text proposed by the Commission

(22) The methods used for providing information and obtaining end-user's consent should be as user-friendly as possible. Given the ubiquitous use of tracking cookies and other tracking techniques, end-users are increasingly requested to provide consent to store such tracking cookies in their terminal equipment. As a result, end-users are overloaded with requests to provide consent. The use of technical means to provide consent, for example, through transparent and user-friendly settings, may address this problem. Therefore, this Regulation should provide for the possibility to express consent by using the appropriate settings of a browser or other application. The choices made by end-users when establishing its general privacy settings of a browser or other application should be binding on, and enforceable against, any third parties. Web browsers are a type of software application that permits the retrieval and presentation of information on the internet. Other types of applications, such as the ones that permit calling and messaging or provide route guidance, have also the same capabilities. Web browsers mediate much of what occurs between the end-user and the

Amendment

(22) The methods used for providing information and obtaining end-user's consent should be as user-friendly as possible. Given the ubiquitous use of tracking cookies and other tracking techniques, end-users are increasingly requested to provide consent to store such tracking cookies in their terminal equipment. As a result, end-users are overloaded with requests to provide consent. The use of technical means to provide consent, for example, through transparent and user-friendly settings, may address this problem. Therefore, this Regulation should provide for the possibility to express consent by using the appropriate settings of a browser or other application. The choices made by end-users when establishing its general privacy settings of a browser or other application should be binding on, and enforceable against, unauthorised parties. Web browsers are a type of software application that permits the retrieval and presentation of information on the internet. Other types of applications, such as the ones that permit calling and messaging or provide route guidance, have also the same capabilities. Web browsers mediate much of what occurs between the end-user and the
website. From this perspective, they are in a privileged position to play an active role to help the end-user to control the flow of information to and from the terminal equipment. **More particularly web browsers may be used as gatekeepers, thus helping end-users to prevent information from their terminal equipment (for example smart phone, tablet or computer) from being accessed or stored.**

On the other hand, in light of the pace of innovation, the increasing use and range of devices that permit communications and the increase of cross-device tracking, it is necessary for this Regulation to remain technology neutral to meet its objectives.

Amendment 5

Proposal for a regulation

Recital 23

*Text proposed by the Commission*

(23) The principles of data protection by design and by default were codified under Article 25 of Regulation (EU) 2016/679. Currently, the default settings for cookies are set in most current browsers to ‘accept all cookies’. Therefore providers of software enabling the retrieval and presentation of information on the internet should have an obligation to configure the software so that it offers the option to prevent third parties from storing information on the terminal equipment; this is often presented as ‘reject third party cookies’. End-users should be offered a set of privacy setting options, ranging from higher (for example, ‘never accept cookies’) to lower (for example, ‘always accept cookies’) and intermediate (for example, ‘reject third party cookies’ or ‘only accept first party cookies’). Such privacy settings should be presented in a an easily visible and intelligible manner.

*Amendment*

(23) The principles of data protection by design and by default were codified under Article 25 of Regulation (EU) 2016/679. Currently, the default settings for cookies are set in most current browsers to ‘accept all cookies’. Therefore providers of software enabling the retrieval and presentation of information on the internet should have an obligation to configure the software so that it offers the option for end-users to choose whether to reject or to accept cookies that are not necessary for the provision of the service requested by the end-user, after being informed of the function of the cookies, how they are used, and how the information gathered is shared. End-users should be offered a set of privacy setting options, ranging from higher (for example, ‘never accept cookies’) to lower (for example, ‘always accept cookies’) and intermediate options according to the types of information they are willing to share, the parties they agree to share it with, the purposes of a cookie, and the possibility to opt out from cross-device tracking. Where the end-user
accepts cookies for purpose of targeted advertising, the end-user should also be able to correct the information gathered about him or her to prevent the possible harm caused by inaccurate information. Privacy settings should be presented in an easily visible and intelligible manner.

Or. en

Amendment 6
Proposal for a regulation
Recital 23 a (new)

Text proposed by the Commission

(23a) In order to improve trust between end-users and parties concerned with the processing of information stored in terminal equipment, and to limit the amount of tracking that negatively impacts privacy, the ability for end-users to develop their own profile, with for instance self-authored tools, should be promoted as an alternative to tracking.

Or. en

Amendment 7
Proposal for a regulation
Recital 24

Text proposed by the Commission

(24) For web browsers to be able to obtain end-users’ consent as defined under Regulation (EU) 2016/679, for example, to the storage of third party tracking cookies, they should, among others, require a clear affirmative action from the end-user of terminal equipment to signify his or her freely given, specific informed, and unambiguous agreement to the storage and

(24) For web browsers or other applications to be able to obtain end-users’ consent as defined under Regulation (EU) 2016/679, for example, to the storage of tracking cookies that are not necessary for the provision of a specific service requested by an end user, they should, among others, require a clear affirmative action from the end-user of terminal
access of such cookies in and from the terminal equipment. Such action may be considered to be affirmative, for example, if end-users are required to actively select ‘accept third party cookies’ to confirm their agreement and are given the necessary information to make the choice. To this end, it is necessary to require providers of software enabling access to internet that, at the moment of installation, end-users are informed about the possibility to choose the privacy settings among the various options and ask them to make a choice. Information provided should not dissuade end-users from selecting higher privacy settings and should include relevant information about the risks associated to allowing third party cookies to be stored in the computer, including the compilation of long-term records of individuals’ browsing histories and the use of such records to send targeted advertising. Web browsers are encouraged to provide easy ways for end-users to change the privacy settings at any time during use and to allow the user to make exceptions for or to whitelist certain websites or to specify for which websites (third) party cookies are always or never allowed.

equipment to signify his or her freely given, specific informed, and unambiguous agreement to the storage and access of such cookies in and from the terminal equipment. Such action may be considered to be affirmative, for example, if end-users are required to actively select **cookies that process data beyond what is necessary for the service to function** to confirm their agreement and are given the necessary information to make the choice. **Consent should not be valid for cross-device tracking if the end-user was not informed and is not able to opt out.** To this end, it is necessary to require providers of software enabling access to internet that, at the moment of installation, end-users are informed about the possibility to choose the privacy settings among the various options and ask them to make a choice. Information provided should not dissuade end-users from selecting higher privacy settings and should include relevant information about the risks associated to allowing certain cookies to be stored in the computer, including the compilation of long-term records of individuals’ browsing histories and the use of such records to send targeted advertising. Web browsers or other applications are encouraged to provide easy ways for end-users to change the privacy settings at any time during use and to allow the user to make exceptions for or to whitelist certain parties or cookies that are always or never allowed. In cases where a business model is based on targeted advertising, consent should not be considered as freely given if the access to the service is made conditional to data processing. The end-user should therefore be able to choose between accepting cookies or being provided the service in exchange for payment.

Fundamental Rights of the European Union and the European Convention for the Protection of Human Rights and Fundamental Freedoms, as interpreted by the Court of Justice of the European Union and of the European Court of Human Rights. Providers of electronic communications services should provide for appropriate procedures to facilitate legitimate requests of competent authorities, where relevant also taking into account the role of the representative designated pursuant to Article 3(3).

Amendment 10
Proposal for a regulation
Recital 26 a (new)

Text proposed by the Commission

Amendment

(26a) In order to safeguard the security and integrity of networks and services, the use of end-to-end encryption should be promoted and, where necessary, be mandatory in accordance with the principles of security and privacy by design. Member States should not impose any obligation on encryption providers, on providers of electronic communications services or on any other organisations (at any level of the supply chain) that would result in the weakening of the security of their networks and services, such as the creation or facilitation of "backdoors".

Amendment 11
Proposal for a regulation
Recital 30
Publicly available directories of end-users of electronic communications services are widely distributed. Publicly available directories means any directory or service containing end-users information such as phone numbers (including mobile phone numbers), email address contact details and includes inquiry services. The right to privacy and to protection of the personal data of a natural person requires that end-users that are natural persons are asked for consent before their personal data are included in a directory. The legitimate interest of legal entities requires that end-users that are legal entities have the right to object to the data related to them being included in a directory.

In cases where the information was not originally collected for the purposes of a publicly available directory, the first party to collect the data should be the one to request the consent of the end-user concerned.

Proposal for a regulation
Recital 37

Service providers who offer electronic communications services should inform end-users of measures they can take to protect the security of their communications for instance by using specific types of software or encryption technologies. The requirement to inform end-users of particular security risks does not discharge a service provider from the obligation to take, at its own costs, appropriate and immediate measures to remedy any new, unforeseen security risks.

Service providers who offer electronic communications services should inform end-users of measures they can take to protect the security of their communications for instance by using specific types of software or encryption technologies. The service-providers are under obligation to provide services that are secure and notify security breaches in accordance with Regulation (EU) 2016/679, [Directive of the European Parliament and of the Council]
and restore the normal security level of the service. The provision of information about security risks to the subscriber should be free of charge. Security is appraised in the light of Article 32 of Regulation (EU) 2016/679.

establishing the European Electronic Communications Code and Directive (EU) 2016/1148.

Or. en

Amendment 13

Proposal for a regulation
Recital 41

Text proposed by the Commission

(41) In order to fulfil the objectives of this Regulation, namely to protect the fundamental rights and freedoms of natural persons and in particular their right to the protection of personal data and to ensure the free movement of personal data within the Union, the power to adopt acts in accordance with Article 290 of the Treaty should be delegated to the Commission to supplement this Regulation. In particular, delegated acts should be adopted in respect of the information to be presented, including by means of standardised icons in order to give an easily visible and intelligible overview of the collection of information emitted by terminal equipment, its purpose, the person responsible for it and of any measure the end-user of the terminal equipment can take to minimise the collection. Delegated acts are also necessary to specify a code to identify direct marketing calls including those made through automated calling and communication systems. It is of particular importance that the Commission carries out appropriate consultations and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement on Better Law-Making of 13 April 2016.

Amendment

(41) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission when provided for by this Regulation. Those powers should be exercised in accordance with Regulation (EU) No 182/2011.
particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts. Furthermore, in order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission when provided for by this Regulation. Those powers should be exercised in accordance with Regulation (EU) No 182/2011.

Text proposed by the Commission

3. End-users who have consented to the processing of electronic communications data as set out in point (c) of Article 6(2) and points (a) and (b) of Article 6(3) shall be given the possibility to withdraw their consent at any time as set forth under Article 7(3) of Regulation (EU) 2016/679 and be reminded of this possibility at periodic intervals of 6 months, as long as the processing continues.

Amendment

3. End-users who have consented to the processing of electronic communications data as set out in point (c) of Article 6(2) and points (a), (aa) and (b) of Article 6(3) shall be given the possibility to withdraw their consent at any time as set forth under Article 7(3) of Regulation (EU) 2016/679. It shall be as easy to withdraw as to give consent.

Amendment 26

Proposal for a regulation
Article 10 – paragraph 1

Text proposed by the Commission

1. Software placed on the market permitting electronic communications, including the retrieval and presentation of information on the internet, shall offer the option to prevent third parties from storing information on the terminal equipment of an end-user or processing information already stored on that equipment.

Amendment

1. Software placed on the market permitting electronic communications, including the retrieval and presentation of information on the internet, shall offer the option to prevent parties from storing information on the terminal equipment of an end-user or processing information already stored on that equipment that is not necessary for the provision of the specific service requested by the end-user. It shall also offer the option to an end-user to choose the extent and types of information the end-user consents to being processed, on the basis of the purpose of the cookie and of the extent to which the information collected is shared with third parties. It shall, in addition,
offer the option to opt out from cross-device tracking.

Amendment 27

Proposal for a regulation
Article 10 – paragraph 2

Text proposed by the Commission

2. **Upon installation, the** software shall inform the end-user about the privacy settings options and, **to continue with the installation, require the end-user to consent to a setting.**

Amendment

2. **The** software shall inform the end-user about the privacy settings options **upon installation and after any update to the software that affects the storing of information on the terminal equipment of the end-user or the processing of information already stored on that equipment.**

Amendment 28

Proposal for a regulation
Article 11 – paragraph 1

Text proposed by the Commission

1. Union or Member State law may restrict by way of a legislative measure the scope of the obligations and rights provided for in Articles 5 to 8 where such a restriction respects the essence of the fundamental rights and freedoms and is a necessary, appropriate and proportionate measure in a democratic society to safeguard one or more of the general public interests referred to in Article 23(1)(a) to (e) of Regulation (EU) 2016/679 or a monitoring, inspection or regulatory function connected to the exercise of official authority for such interests.

Amendment

1. Union or Member State law may restrict by way of a legislative measure the scope of the obligations and rights provided for in Articles 5 to 8 where such a restriction respects the essence of the fundamental rights and freedoms and is a necessary, appropriate and proportionate measure in a democratic society to safeguard *national security* (i.e. *State security*), defence, public security, and the prevention, investigation, detection and prosecution of criminal offences.

Amendment 30
Proposal for a regulation
Article 15 – paragraph 1

Text proposed by the Commission

Amendment

1. The providers of publicly available directories shall obtain the consent of end-users who are natural persons to include their personal data in the directory and, consequently, shall obtain consent from these end-users for inclusion of data per category of personal data, to the extent that such data are relevant for the purpose of the directory as determined by the provider of the directory. Providers shall give end-users who are natural persons the means to verify, correct and delete such data.

1. The providers of publicly available directories or where relevant the party that originally collected the data shared in such a directory, shall obtain the consent of end-users who are natural persons to include their personal data in the directory and, consequently, shall obtain consent from these end-users for inclusion of data per category of personal data, to the extent that such data are relevant for the purpose of the directory as determined by the provider of the directory. Providers shall give end-users who are natural persons the means to verify, correct and delete such data.

Amendment 33

Proposal for a regulation
Article 16 – paragraph 2

*Text proposed by the Commission*

2. Where a natural or legal person obtains electronic contact details for electronic mail from its customer, in the

*Amendment*

2. Where a natural or legal person obtains electronic contact details for electronic mail from its customer, in the
context of the sale of a product or a service, in accordance with Regulation (EU) 2016/679, that natural or legal person may use these electronic contact details for direct marketing of its own similar products or services only if customers are clearly and distinctly given the opportunity to object, free of charge and in an easy manner, to such use. The right to object shall be given at the time of collection and each time a message is sent.

Amendment 34
Proposal for a regulation
Article 17

Text proposed by the Commission
Article 17

Information about detected security risks
In the case of a particular risk that may compromise the security of networks and electronic communications services, the provider of an electronic communications service shall inform end-users concerning such risk and, where the risk lies outside the scope of the measures to be taken by the service provider, inform end-users of any possible remedies, including an indication of the likely costs involved.

Justification
Security and personal data breaches are already regulated under respectively article 40 of EECC, and article 34 of GDPR, therefore this article creates duplications and risks undermining actions undertaken in other legislations.

Amendment 36
Proposal for a regulation
Article 25

Text proposed by the Commission

Amendment

Article 25 deleted

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 8(4) shall be conferred on the Commission for an indeterminate period of time from [the data of entering into force of this Regulation].

3. The delegation of power referred to in Article 8(4) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the Official Journal of the European Union or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. Before adopting a delegated act, the Commission shall consult experts designated by each Member State in
accordance with the principles laid down in the Inter-institutional Agreement on Better Law-Making of 13 April 2016.

5. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

6. A delegated act adopted pursuant to Article 8(4) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.
