It calls for a genuine autonomy for the Tibetan people within the framework of China's constitution. It provides the basis for a realistic and sustainable political solution to the issue of Tibet; is concerned about the fact that the definition of "terrorist" included in China's draft law on counter-terrorism, if not substantially revised, may apply to Tibetans advocating for a different policy approach or carrying out religious activities outside state-controlled institutions, and that the conflation of "terrorism" with religious "extremism" in the law gives scope for the penalization of almost any peaceful expression of Tibetan culture, religion or identity that may differ from those of the state;*
