The CAP towards 2020: Meeting the food, natural resources and territorial challenges of the future
2011/2051(INI)

Motion for a resolution
Paragraph 15

Motion for a resolution

15. Calls for a fair distribution of CAP funding for the first and second pillars both among Member States and among farmers within a Member State, in which a pragmatic approach should be the fundamental principle for objective criteria; rejects major disparities in the distribution of these funds among Member States; takes the view that this will entail the gradual replacement, following a transitional period, of the system based on outdated historical reference values with support payments which are fair and thus allocated more effectively among countries, among different agriculture sectors and farmers; points out that this also calls for more effective support payments which are better targeted and offer greater incentives in order to help agriculture make a shift towards more sustainable farming systems; in line with the Commission Communication, rejects a uniform flat-rate direct payment for the whole of the EU which would not reflect European diversity; considers that preserving the diversity of farming and production locations in the EU is a central objective and therefore advocates taking account of the specific production conditions in the Member States as far as possible through a more targeted system

Amendment

15. Calls for a fair distribution of CAP funding for the first and second pillars both among Member States and among farmers within a Member State to be based on objective criteria reflecting goals of each of the two CAP pillars; rejects disparities in the distribution of the first pillar funds among Member States due to their implications for the competitive position of farms; takes the view that this will entail the replacement of the system based on outdated historical reference values with support payments which are fair and thus allocated more effectively among countries, among different agriculture sectors and farmers; points out that this also calls for more effective support payments which are better targeted and offer greater incentives in order to help agriculture make a shift towards more sustainable farming systems; considers that preserving the diversity of farming and production locations in the EU is a central objective and therefore advocates taking account of the specific production conditions in the Member States, including agricultural labour and farm structures;
of direct payments;

Motion for a resolution
Paragraph 16

Motion for a resolution

16. Advocates therefore a single farm payment system which effects a certain redistribution in the interests of fair distribution of direct payment funds in the EU as a whole; proposes that each Member State should receive a minimum percentage of the EU average direct payments and that a ceiling should be set; advocates the earliest possible implementation with a limited transitional period;

Amendment

16. Advocates therefore a single farm payment system which effects a certain redistribution in the interests of fair distribution of direct payment funds in the EU as a whole and guarantees equal conditions of competition within the single European market;

Motion for a resolution
Paragraph 18

Motion for a resolution

18. Considers that Member States which currently apply the simplified Single Area Payment Scheme (SAPS) should switch, after a limited transitional period, to the single farm payment system with entitlements; calls for support, including financial and technical support, in making the conversion;

Amendment

18. Considers that Member States which currently apply the simplified Single Area Payment Scheme (SAPS) should have the possibility to continue this system as an alternative to the single farm payment system with entitlements; calls for support, including financial and technical support, for Member States making the conversion;
