Floods in central European countries, in particular Poland, the Czech Republic, Slovakia and Hungary

**Joint motion for a resolution**

**Paragraph 10 a (new)**

*Joint motion for a resolution*

*Amendment*

*10a. Calls on the Commission and all relevant public authorities to take climate change and the increased likelihood of floods into account; considers that prevention measures, such as giving rivers more space where possible and sustainable water management and land-use planning, would protect people, property and the environment; believes that the damage caused by the recent floods further highlights the fact that sustainable prevention will be much less costly than regeneration;*
