Establishing rules on support for strategic plans to be drawn up by Member States under the Common agricultural policy (CAP Strategic Plans) and financed by the European Agricultural Guarantee Fund (EAGF) and by the European Agricultural Fund for Rural Development (EAFRD)

Proposal for a regulation

(COM(2018)0392 – C8-0248/2018 – 2018/0216(COD))

**Amendment 2506**  
**Beata Gosiewska**

**Proposal for a regulation**  
**Article 30 – paragraph 1**

*Text proposed by the Commission*

*Amendment*

*Coupled income support may only be granted to the following sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons: cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables, short rotation coppice and other non-food crops, excluding trees, used for the production of products that have the potential to substitute fossil materials.*

**Marco Zullo, Rosa D'Amato, Ignazio Corrao**

**Proposal for a regulation**  
**Article 30 – paragraph 1**

*Text proposed by the Commission*

*Amendment*

Coupled income support may *only* be granted to *the following sectors and productions* or specific types of farming therein where these are *important* for economic, social or environmental reasons: *cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and*

Coupled income support may be granted to *any sector and production* or specific types of farming therein where these are *strategic* for economic, social or environmental reasons, *as set out in the national Strategic Plan.*

*vegetables, short rotation coppice and other non-food crops, excluding trees, used for the production of products that have the potential to substitute fossil materials.*

#### **Amendment 2508**

**Nicola Caputo**

#### **Proposal for a regulation**

#### **Article 30 – paragraph 1**

##### *Text proposed by the Commission*

Coupled income support may ***only*** be granted to ***the following sectors and productions*** or specific types of farming therein where these are ***important*** for economic, social or environmental reasons: ***cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables, short rotation coppice and other non-food crops, excluding trees, used for the production of products that have the potential to substitute fossil materials.***

##### *Amendment*

Coupled income support may be granted to ***any sector and production*** or specific types of farming therein where these are ***strategic*** for economic, social or environmental reasons, ***as highlighted in the national Strategic Plan or its annual reviews.***

Or. it

##### *Justification*

*The proposal for a regulation provides for the option of allocating coupled income support to a very wide range of sectors and productions, excluding only some. I believe these exclusions are inappropriate. The New Delivery Model enables a thorough assessment in the national Strategic Plans of those sectors that are strategic for Member States and in relation to which the socio-economic situation justifies the need for coupled support.*

#### **Amendment 2509**

**Sandra Kalniete, Ivairi Padar**

**Proposal for a regulation**  
**Article 30 – paragraph 1**

*Text proposed by the Commission*

Coupled income support may only be granted to the **following** sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons:  
**cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables, short rotation coppice and other non-food crops, excluding trees, used for the production of products that have the potential to substitute fossil materials.**

*Amendment*

Coupled income support may only be granted to the **agriculture** sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons.

Or. en

*Justification*

*Coupled income support in accordance with current WTO rules - provides an essential contribution to maintaining economic activity in rural areas and bolster rural employment and these payments should be maintained with a wider scope and more ambitious financial resources*

**Amendment 2510**

**Peter Jahr, Norbert Lins, Albert Deß, Jens Gieseke**

**Proposal for a regulation**  
**Article 30 – paragraph 1**

*Text proposed by the Commission*

Coupled income support may only be granted to the following sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons:  
**cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds,**

*Amendment*

Coupled income support may only be granted to the following sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons:  
**rice**, milk and milk products, sheepmeat and goatmeat, beef and veal.

sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables, short rotation coppice and other non-food crops, excluding trees, used for the production of products that have the potential to substitute fossil materials.

#### **Amendment 2511**

**Paolo De Castro**

#### **Proposal for a regulation**

#### **Article 30 – paragraph 1**

*Text proposed by the Commission*

Coupled income support may only be granted to *the following* sectors *and productions or specific types of farming therein where these are important for economic, social or environmental reasons: cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables, short rotation coppice and other non-food crops, excluding trees, used for the production of products that have the potential to substitute fossil materials.*

*Amendment*

Coupled income support may only be granted to sectors *relating to the products listed in the relevant parts of Annex I to the Treaties, excluding fisheries and aquaculture, as defined and specified in Article 1 of Regulation (EU) No 1308/2013 (CMO Regulation), where those sectors are important for economic, social or environmental reasons. Member States shall identify in the CAP Strategic Plans the sectors and productions to which coupled income support may be granted.*

Coupled income support may only be granted to the following sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons:

##### *Amendment*

Coupled income support may only be granted to the following sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons:

cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables, ***short rotation coppice and other non-food crops, excluding trees***, used for the production of products that have the potential to substitute fossil materials.

cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables, non-food crops used for the production of products that have the potential to substitute fossil materials, ***that can include trees and/or shrubs that form silvoarable or silvopastoral agroforestry systems, also as certified systems of trees outside forests and.***

Or. en

### *Justification*

*Offer support for a potential to substitute fossil based material sounds like a good idea, but the reading that it should be explicitly short rotation coppice and ''crops'' would offer mainly a route of only energy service rather than a ''product''. The proposed reading is to extend the scope and to make trees eligible, in particular for agroforestry systems, which could be also certified systems of trees outside forests.*

on behalf of the Verts/ALE Group

**Proposal for a regulation**  
**Article 30 – paragraph 1**

*Text proposed by the Commission*

Coupled income support may only be granted to the following sectors and productions or specific types of farming therein where these are important for economic, social or environmental reasons: cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, **sugar beet**, cane and chicory, fruit and vegetables, **short rotation coppice and other non-food crops, excluding trees, used for the production of products that have the potential to substitute fossil materials.**

*Amendment*

Coupled income support may only be granted to the following sectors and productions or specific types of farming therein, **that go beyond minimum legal standards for animal welfare or environment, or** where these are important for economic, social or environmental reasons, **and their need is justified under the procedure outlined chapter III of title V with empirical quantifiable and independently verifiable evidence:** cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, cane and chicory, fruit and vegetables.

Or. en

*Justification*

*Coupled income support should be conditional to the respect of strict sustainability criteria since it creates distortions both in the internal EU market and externally, displacing production to some member states (MS) either from other MS or from third countries. Agrofuels shall not be granted coupled support because of their doubtful climate efficiency. Coupled income support to the sugar beet sector artificially stimulates overproduction, which*

*in turn drives down prices for the producers across the Union and creates market distortions both inside and outside of the Union (see recent research by Wageningen Economic Research).*

### *Justification*

*The proposal for a regulation provides for the option of allocating coupled income support to a very wide range of sectors and productions, excluding only some. I believe these exclusions are inappropriate. The New Delivery Model enables a thorough assessment in the national Strategic Plans of those sectors that are strategic for Member States and in relation to which the socio-economic situation justifies the need for coupled support.*

## **Amendment 2549**

**Paul Brannen**

### **Proposal for a regulation**

#### **Article 31 – paragraph 2 – subparagraph 1 (new)**

*Text proposed by the Commission*

*Amendment*

***Further, without prejudice to previous paragraph, support shall not be awarded to intensive animal production. The Commission is empowered to adopt delegated acts in accordance with Article 138 supplementing this Regulation with defining types of intensive animal production systems ineligible for coupled support effectively excluding from support dairy, bovine animals or sheep and goats where there is a discrepancy between the number of eligible hectares and number of animals. This provision will take into account shepherding or transhumance practices.***

Or. en

## *Justification*

*Already in the Special Report No 11/2012 it reads that without explicit and sufficient targeting provisions coupled aid may have the effect of subsidising more intensive animal farming methods. This did not improve and this model should change with the next reform. It is extensive animal farming, linked to traditional practice, high-nature value ecosystems, and possibly even fire prevention herding, that is threatened, and rural areas where this is practiced. Intensive systems are not worth preserving, for either social, environmental or animal welfare point of view.*

*Text proposed by the Commission*

*Amendment*

**2a. Where the coupled income support concerns livestock productions, only methods of production that go beyond the minimum national and Union standards for animal welfare and animal health shall be considered as eligible for support.**

*Justification*

*Coupled income support should be conditional to the respect of enhanced sustainability criteria, including animal welfare and animal health. In the case of livestock productions, it should only be directed at methods of production that decrease stocking densities, improve animal welfare and animal health, and do not contribute to the rise of antimicrobial resistance.*

Or. en

*Justification*

*It is important to balance animal and plant production. There is a precedent in the CAP, as livestock densities were specified for a decade from 2003 onwards. According to Eurostat, the current average total livestock stocking density between the Member States is 0.75 LU/ha.*

*Amendment*

**2c. Concentrated animal feeding operations shall not be eligible for coupled support.**

Or. en

*Justification*

*It is imperative to re-balance animal and plant production by ensuring the livestock population per farm does not exceed its permanent pasture or temporary grassland fodder base area, in the case of ruminants for example. This will limit structural surplus production, environmental pollution by excess nutrients, and reduce climate impacts.*

*Justification*

*Amendment deleting the mention of a memorandum of understanding between the European Economic Community and the United States of America on oilseeds, which seems superfluous and would form a long-term barrier to the development of oilseeds. This is in line with Parliament's position adopted in its resolution of 27 March 2018, which states: 'that although the 1992 Blair House Agreement is still in force, it is de facto obsolete and should not hamper the sustainable development of protein crop growing in Europe'.*

Many disadvantaged social groups such as Roma are working in this labour-intensive sector, so their jobs have to be saved also by using well-targeted EU funds. ##### *Justification*

*Risk management/insurance, must not fossilise irresponsible/ outdated farming practices, otherwise this will result in huge overspending from increasingly limited rural development funds. Climate change and associated extreme weather events have been a reality for a decade already, so any forward looking and financially/resource efficient policy would encourage this eventuality to be planned for. Rather, the CAP should provide the support for farmers to adapt to those climate change and other effects, funded through other parts of rural development and Eco schemes.*

#### **Article 47 – paragraph 1**

##### *Text proposed by the Commission*

1. In regions of the Member States in which the degree of organisation of producers in the fruit and vegetables sector is significantly below the Union average, Member States may grant producer organisations recognised under Regulation (EU) No 1308/2013 national financial assistance equal to a maximum of **80%** of the financial contributions referred to in point (a) of Article 45(1) **and up to 10% of the value of the marketed production of any such producer organisation. The national financial assistance shall be additional to the operational fund.**

##### *Amendment*

1. In regions of the Member States in which the degree of organisation of producers in the fruit and vegetables sector is significantly below the Union average, Member States may grant producer organisations recognised under Regulation (EU) No 1308/2013 national financial assistance equal to a maximum of **30%** of the financial contributions referred to in point (a) of Article 45(1). **The national financial assistance shall be additional to the operational fund. The figures in Article 46(2) shall apply to products marketed by these producer organisations.**

**Amendment 2869**  
**Norbert Lins**

**Proposal for a regulation**  
**Article 47 – paragraph 2 – subparagraph 1**

*Text proposed by the Commission*

The degree of organisation of producers in a region of a Member State shall be considered as significantly below the Union average where the average degree of organisation has been less than **20%** for three consecutive years preceding the implementation of the operational program. The degree of organisation shall be calculated as the value of fruit and vegetables production that was obtained in the region concerned and marketed by producer organisations and associations of producer organisations recognised under Regulation (EU) No 1308/2013, divided by the total value of the fruit and vegetables production that was obtained in that region.

*Amendment*

The degree of organisation of producers in a region of a Member State shall be considered as significantly below the Union average where the average degree of organisation has been less than **10%** for three consecutive years preceding the implementation of the operational program. The degree of organisation shall be calculated as the value of fruit and vegetables production that was obtained in the region concerned and marketed by producer organisations and associations of producer organisations recognised under Regulation (EU) No 1308/2013, divided by the total value of the fruit and vegetables production that was obtained in that region.

**(aa) actions taken by beekeepers to better adapt to climate change;**

Or. hr

*Justification*

*It is necessary to provide for the supply of food for bee colonies to be used during the non-foraging period in order to preserve the colonies by covering the cost of purchasing a certain number of pounds of sugar or bee cake per bee colony/hive. Owing to the increasing prevalence of extreme events caused by climate change, bee pastures are becoming more uncertain and scarce. Intervention by beekeepers is necessary to preserve bee colonies.*
