

Euro-area reforms: Challenges and policies

Reforms to the system of governance of the euro area, launched in the wake of the 2008-09 financial crisis, have included, inter alia, the creation of authorities to better supervise the financial markets, improved mechanisms to coordinate fiscal policies, and procedures to correct economic imbalances. While the drive to overhaul the euro-zone's economic rulebook has slackened as the improving growth outlook has eased threats to the overall stability of the area, deeper integration of the euro area still features high among EU reform proposals presented by European Commission President Jean-Claude Juncker in a [white paper](#) earlier this month.

This notes offers links to **commentaries, studies and reports on the topic from major international think tanks and research institutes** on euro areas reform. Earlier publications on the subject can be found in a [previous edition](#) of 'What Think Tanks are Thinking.'
