

# President Trump's record to date

Donald Trump has made a number of highly controversial decisions during his first 13 months as US President – whether on foreign trade, climate change, migration, taxation or healthcare. His unorthodox communication style, often using emotional tweets, has frequently confused both domestic and international audiences. Although his 'America First' policies have not gone as far as some had feared, and he has presided over a period of continued economic growth, there remains very considerable anxiety about the path ahead.

This note offers links to **recent commentaries and reports published by major international think tanks** on Donald Trump's presidency so far.
