Introduction

From 23 until 26 May 2019 citizens from all EU Member States will vote in the next European Parliament elections. As in previous elections, the European Parliament will provide an overview of the results at both Member State and European level, making reliable information on the participation and future composition of Parliament available to the media, partners and the public on the night of the 26 May.

The present report has been prepared by Kantar Public for the Public Opinion Monitoring Unit of the European Parliament's Directorate-General for Communication. The objective of this report is to provide the most accurate and up-to-date information on the European political landscape, in preparation for the election night.

The data used in this report was assembled with the contribution of Kantar Public's national polling institutes in each of the 27 Member States, all of which will be actively involved in monitoring the European elections, and a political expert working closely with Kantar Public. The public opinion polls themselves were not commissioned by the European Parliament, but by a number of different polling institutes in all Member States surveyed, themselves not necessarily part of Kantar Public's network. Readers should refer to the source available for each set of voting intention results. Parliament's Public Opinion Monitoring Unit and its network of Liaison Offices in all Member States provided additional data and insight for this report.

This report provides the latest projection of the European Parliament hemicycle based on the most recent national and European voting intention polls. It also provides details of the projections of the seat allocations for each political group and country, as well as changes over time, going back to February 2018. In the second part of the report, the details of the voting intention surveys used in each country is provided together with key information regarding the current political landscape and electoral laws in each country, which could impact on the results of the next European Parliament elections.

The present report covers the month of March 2019 (as of 27.03.2019). Projections are compared to an earlier set of projections made at the end of February.

NOTE ON THE USE OF VOTING INTENTION POLLS

For the purpose of the exercise, the use of dedicated voting intention surveys for the European elections always takes precedence over national voting intention polls. For this report, European election voting intention surveys were available and used in 20 countries. In countries where currently no recent European election voting intention surveys have been conducted or published, national voting intentions are used ([Belgium, Ireland, Lithuania, Netherlands, Slovakia and Finland](#)). While it provides the best available proxy of the political situation in the countries concerned, it cannot be equated to a seat projection based on a dedicated EE19 poll.

In any case, the seat calculations must be understood as a snapshot of the current political situation in the country as shown by currently available polling data. The seat projections are not an indication of the actual result of the European elections nor must they be used as a prediction of these results. The situation will continue to develop until the elections and this exercise aims to track this development and thus to support a better understanding of these developments.

For the full collection of European Elections polls, please consult our excel compilation file. The seat projections in this report utilised European Elections polls published within the last two weeks.

Methodology

Data selection and collection

Kantar Public prepares each report together with the European Parliament. The projection of the European Parliament is based on the new allocation of seats proposed by the European Parliament on 13.06.2018 and adopted by the Council on 28.06.2018¹. Following the exit of the United Kingdom from the European Union, the size of the European Parliament in the next legislative period will be reduced from 751 to 705 elected representatives. From the 73 seats originally allocated to the United Kingdom, 27 seats will be reallocated among 14 Member States, while 46 seats will not be used for the time being.

The projection of the new European Parliament is carried out by Kantar Public. Data used in this projection comes from voting intention surveys selected and collected by Kantar Public and their national partners as well as by the Public Opinion Monitoring Unit and the EP Liaison Offices. The voting intentions used for the projections for this report vary depending on the information available.

Priority is given to surveys on European election voting intentions. When such surveys are not available, national voting intentions polls are used for the projections. In some cases, when a national election recently occurred and no voting intentions polls have been published since (e.g. in Luxembourg during October), the results of the national elections are used to prepare the projections. Only polls considered as most reliable are taken into consideration, by assessing the methodology, reputation of the polling institute and availability of methodological information. As the methodology of voting intention surveys can vary between Member States, Kantar Public may recalculate the results of a specific survey in order to remove categories such as "undecided" or "not going to vote", so that results sum to 100%. No further adjustments are made. Utmost care is taken to avoid any bias in the choice of polling surveys used for the calculation of the projection. At the same time, no guarantee can be given that the selection is fully exhaustive.

Projections

Once the voting intention data are selected and collected by the national partners, the selection of the surveys to be used in the projection is proposed by Kantar and validated by the Public Opinion Monitoring Unit. When several European or national voting intention polls with fieldwork conducted within the month previous to publication of the projection are available and selected, Kantar Public calculates an average of the results to be used in preparing the projections. Projections in seats are then conducted for each country and for the EU overall, taking into account the electoral rules in each country (method of counting the votes, seat allocation and electoral threshold).

In some cases, with preferential voting, Kantar Public used the closest seat allocation method to reflect the reality. In Ireland and Malta, where Single Transferable Vote is used we use the Hare method of calculation to estimate the number of seats since it is not possible to simulate the effect of ranking candidates with voting intention data. Furthermore, in some countries, seats are officially allocated using regional constituencies but since polls do not report results at this level (except Belgium), we treat these countries like others with one national constituency. We do this in Ireland, Italy and Poland. As opinion polls do not provide results at the regional constituency level and do not cater to the specifics of preferential voting, we find this to be the best approach.

¹ [http://www.europarl.europa.eu/oeil/popups/ficheprocedure.do?lang=&reference=2017/0900\(NLE\)](http://www.europarl.europa.eu/oeil/popups/ficheprocedure.do?lang=&reference=2017/0900(NLE))

Attribution of political parties to political groups in the EP

Projections presented in this report are based on the current composition of the European Parliament and its political groups, without any prejudice to a composition of the next European Parliament at its opening session in July 2019.

The affiliation of national political parties to political groups as currently present in the European Parliament has been validated and verified by Kantar Public and their political expert, and the Public Opinion Monitoring Unit of the European Parliament.

National parties currently represented in the European Parliament are classified in the same political group they are currently sitting in. National parties who are currently not represented in the European Parliament but are Members of a recognised European political party will be classified in the political group this European political party is affiliated with. All national parties that do not currently have any official affiliation are classified in the category "others". This category therefore includes all national parties, independent of their political orientation, that currently neither have seats in the EP nor are members of a European political party affiliated to a political group but, according to the polling data used, might obtain seats in the European Parliament. For example, the French political party La République en marche (LREM) is currently classified under the category "others". The individual party weight of coalitions that comprise political parties that belong to different European Parliament groups is estimated by evaluating the electoral strength of each party in the coalition.

In a number of countries, the seat projections for a party, or more frequently a coalition, need to be split between multiple groups. Taking Spain as an example, seats attributed to the coalition of PODEMOS, Izquierda Unida (UP/IU), EQUO et. al need to be split between GUE/NGL and Greens/EFA. In these cases, we estimate the electoral strength of a given party within the coalition and partition the seats accordingly. In the above example, we estimate that PODEMOS and Izquierda Unida (GUE/NGL) will be allocated 85% of the seats attributed to the coalition, and EQUO (Greens/EFA) 15%.

All details of the calculation method and threshold used is made available in each country section. For each country, Kantar Public provides the results of the voting intention surveys used for these projections. Annexed to this report, the reader may find all the polls selected and used to calculate the seat projections.

Number of MEPs by Member State

The table below presents the number of MEPs that will be allocated to each Member State and the change compared to the 2014-2019 term.

- European elections poll from a previous report re-used

Main findings

By comparing the current state of the European Parliament (including the United Kingdom) and the projection of 27 March 2019 (referring to the new seats distribution for EE2019), we notice that:

EPP

- **26.7% of the European Parliament
(-2.3 points)**
- 26 national delegations (-2)
- Largest increase in Greece (+4 seats)
- Large drops in six countries: France (-7), Czechia (-5), Spain, Italy, Slovakia (all -4) and Poland (-3)

GUE-NGL

- **7% of the European Parliament
(=)**
- 13 national delegations (-1)
- Largest increase in France (+3 seats)
- Largest decrease in Italy (-3)

S&D

- **20.1% of the European Parliament
(-4.7 points)**
- 27 national delegations (-1)
- Largest increase in Spain (+5 seats)
- Large drops in Italy (-13), Germany (-9) and France (-7)

Greens-EFA

- **7.2% of the European Parliament
(+0.3 points)**
- 15 national delegations (-3)
- Largest increase in Germany (+6 seats)

ECR

- **7.5% of the European Parliament
(-2.6 points)**
- 12 national delegations (-7)
- Largest increase in the Netherlands (+4 seats) and Poland (+3)
- Largest decrease in Germany (-6)

EFDD

- **4.3% of the European Parliament
(-1.2 points)**
- 4 national delegations (-3)
- Largest increases in Germany (+9 seats) and Italy (+4)
- Largest decrease in France (-6)

ALDE

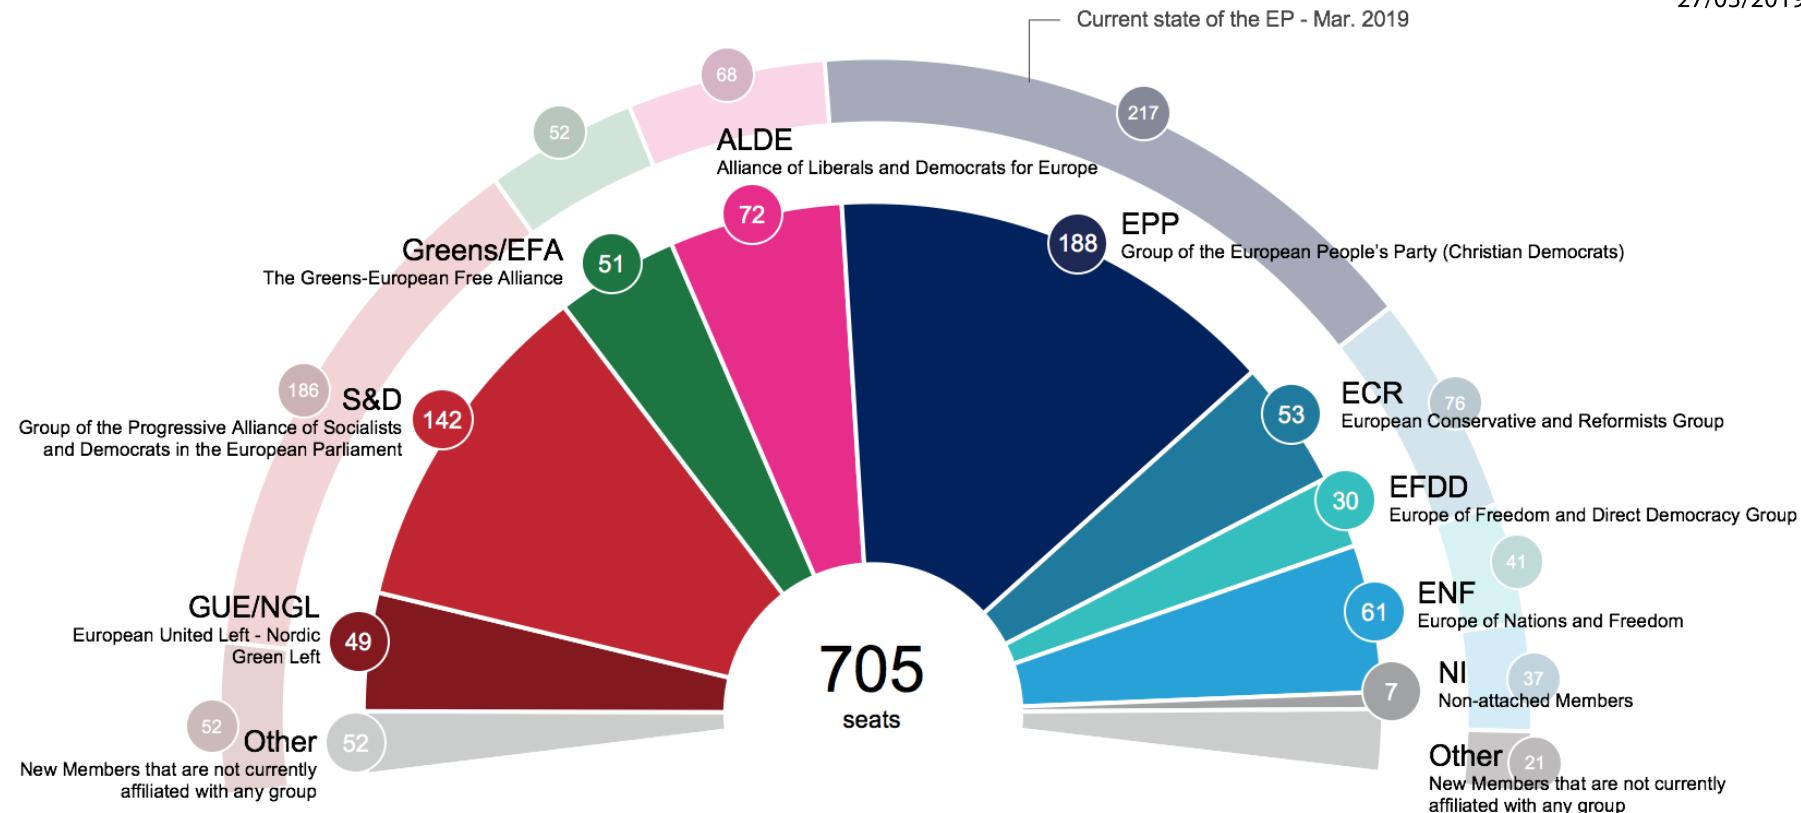

- **10.2% of the European Parliament
(+1.1 points)**
- 22 national delegations (+1)
- Large increase in Germany (+4 seats) and Czechia (+3)

ENF

- **8.7% of the European Parliament
(+3.7 points)**
- 8 national delegations (=)
- Largest increase in Italy (+21 seats) and France (+6)

Overall March seat projections

27/03/2019

The category "Others" includes all national parties, independent of their political orientation, that currently neither have seats in the EP nor are members of a European political party affiliated to a political group but, according to the polling data used, might obtain seats in the European Parliament. In the current projection, the share of "others" is split on both sides of the hemicycle in order to avoid any inference of the affiliation of political parties in this group. The total number of seats attributed to this group is only displayed on the left.

*No.D: No. of national delegations according to projection

In this table and in the following charts, we compare the current state of the EP of 751 MEPs with the new seat distribution of 705 MEPs.

The "Other" group comprises national political parties that do not currently have any MEPs in the European Parliament and are not yet affiliated with any European political party. This category, for example, includes the projected seats of La République en Marche, which currently has no official European affiliation.

 N – This party is only polled in voting intentions for the European elections.

3. Seat projection

SEATS: 14

27/03/2019

Seat projection results for Denmark have been calculated using the four electoral alliances. Seats awarded to each alliance have been redistributed to their member parties according to their electoral strength, using the D'Hondt methodology.

1. Voting intentions

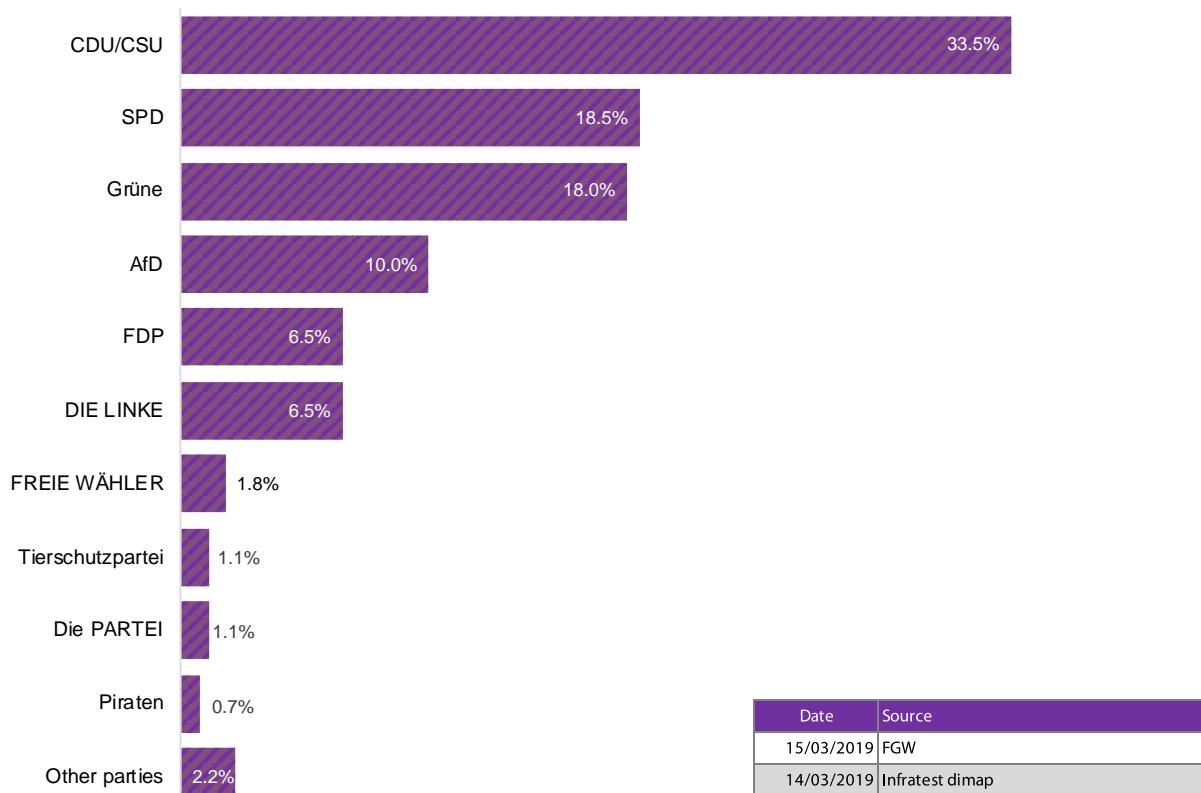

GERMANY

Voting intentions

27/03/2019

Average of European Elections polls

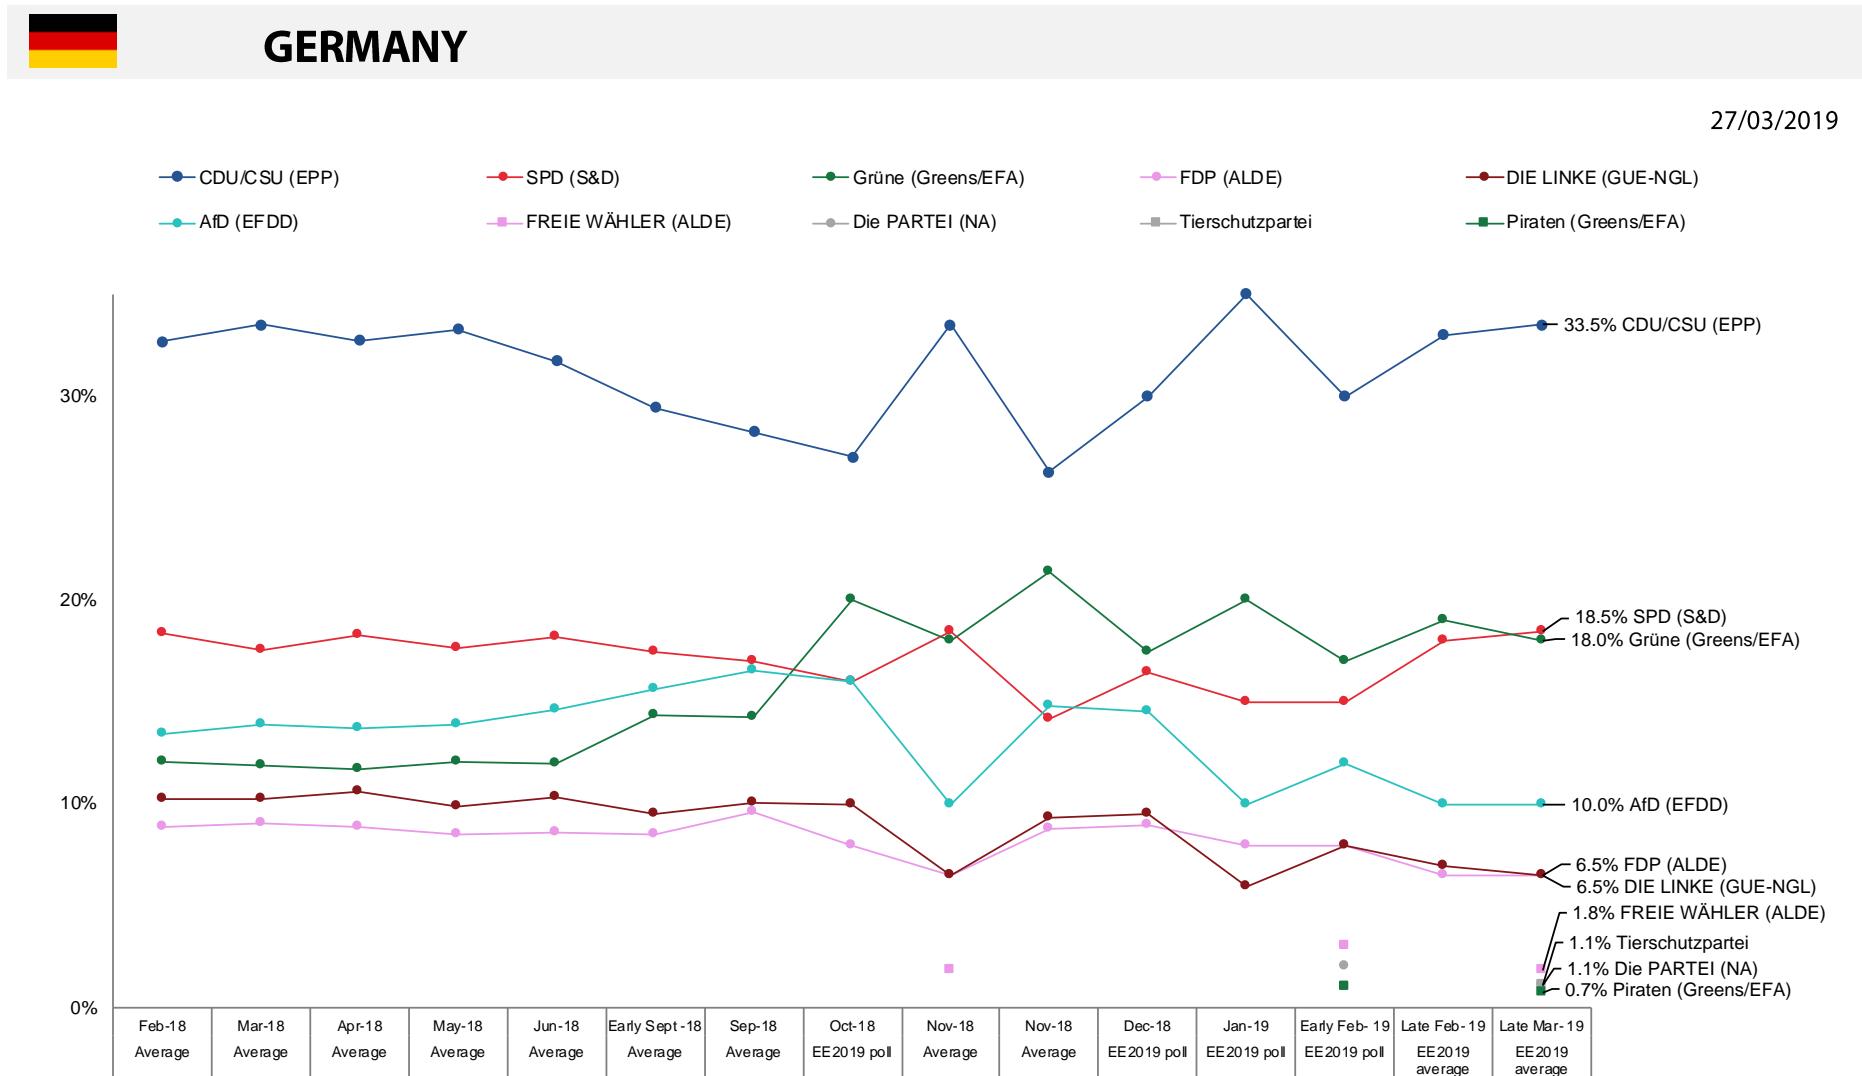

Score	Seat projection	Abbreviation	Party/Coalition/EP group
33.5%	33	CDU/CSU	Christlich Demokratische Union + Christlich Soziale Union (EPP)
18.5%	18	SPD	Sozialdemokratische Partei Deutschlands (S&D)
18.0%	18	Grüne	Bündnis 90/Die Grünen (Greens/EFA)
10.0%	10	AfD	Alternative für Deutschland (EFDD)
6.5%	6	FDP	Freie Demokraten (ALDE)
6.5%	6	DIE LINKE	Linkspartei (GUE/NGL)
1.8%	2	FREIE WÄHLER	FREIE WÄHLER (ALDE)
1.1%	1	Tierschutzpartei	Tierschutzpartei
1.1%	1	Die PARTEI	Die PARTEI (NA)
0.7%	1	Piraten	Piratenpartei (Greens/EFA)
2.2%	0	Other parties	

The seat projection acknowledges that Germany does not apply an electoral threshold for the European elections and therefore, parties with results as low as 0.5% might gain seats. In order to visualise this as realistically as possible, the aggregated result for 'Other parties' as reported by the poll(s) used in this report is redistributed according to the relative share smaller parties received in the last available poll(s) reporting such shares. This concerns Freie Wähler, Tierschutzpartei, Die PARTEI and Piraten.

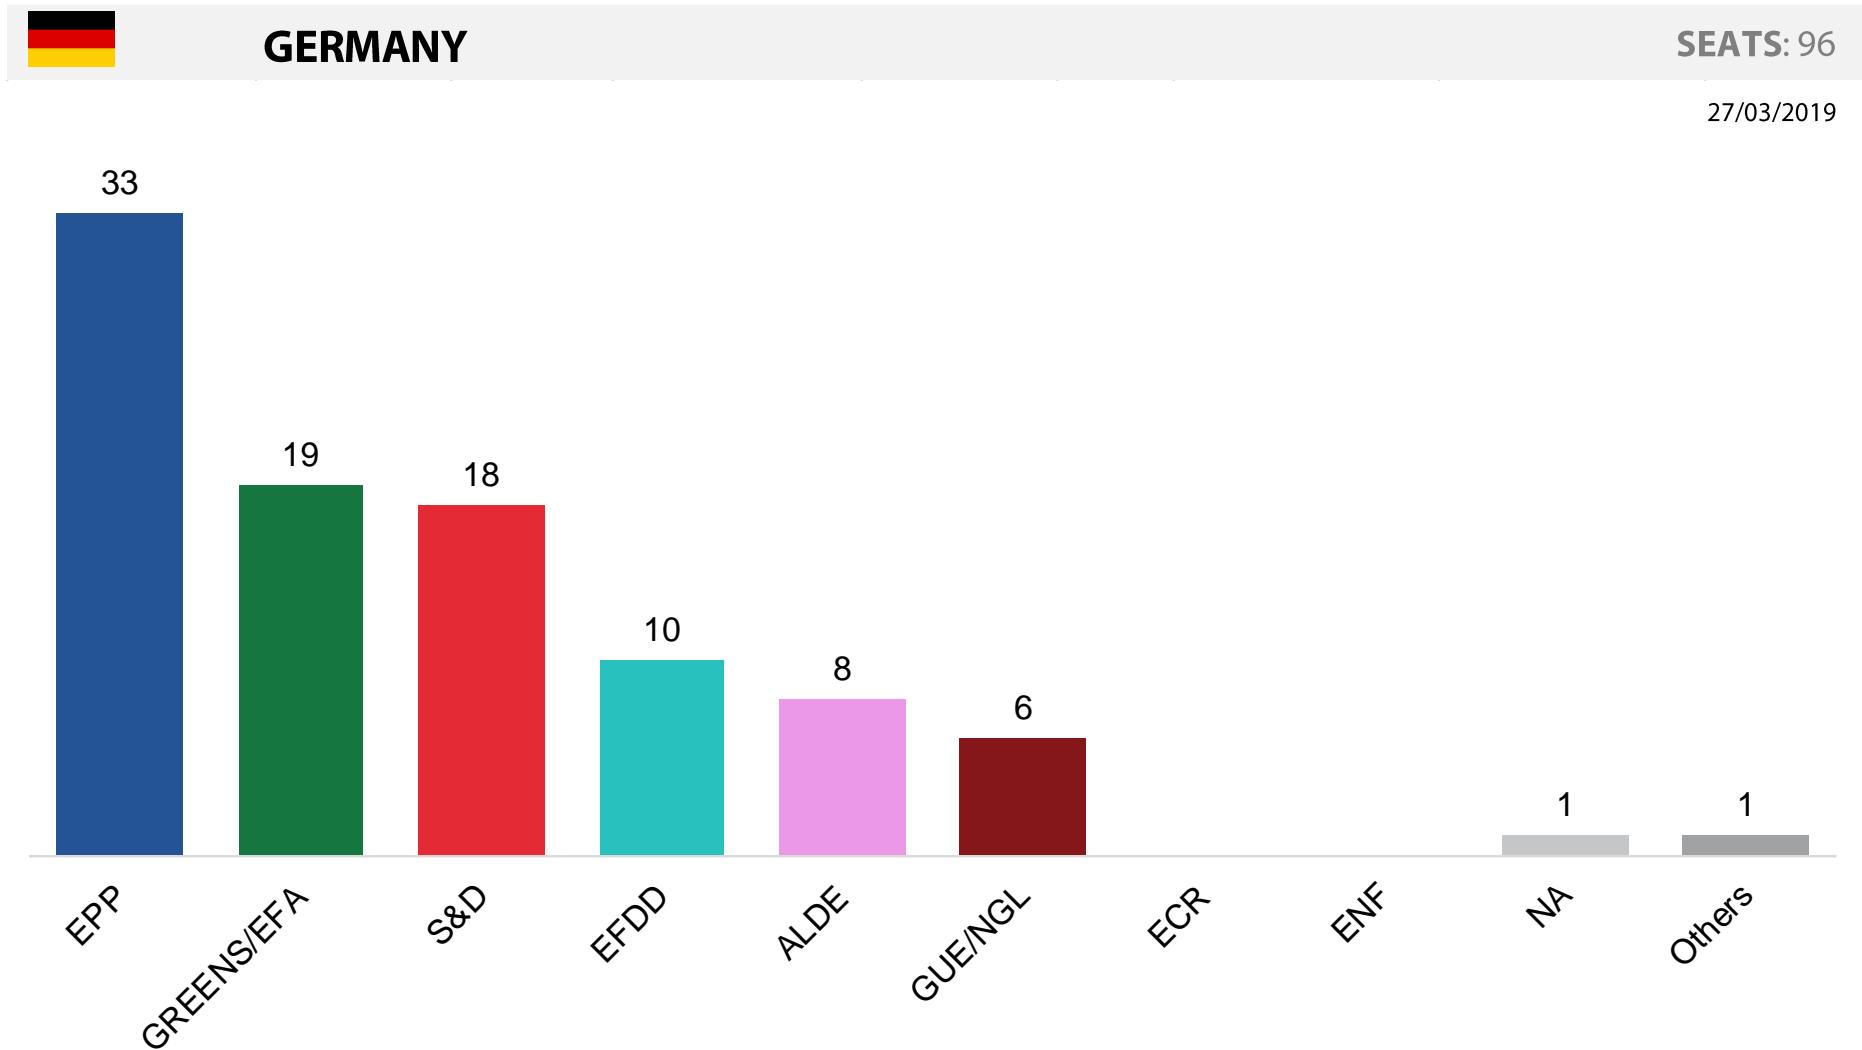

An MEP elected under Tierschutzpartei is now an Independent and no longer a member of the party. We therefore attribute seats of this party to "others" since they are not a member of an official political party/group.

2. Voting intentions over time

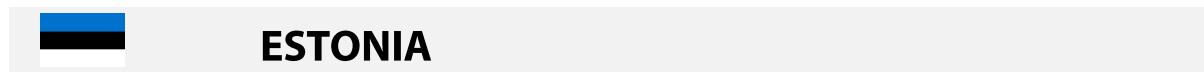

The % for FREIE WÄHLER, Tierschutze, Die PARTEI and Piraten are estimated based on their shares in the INSA poll published on 7 March. Results for these parties are not published by other polling institutes.

3. Seat projection

An MEP elected under Tierschutzei is now an Independent and no longer a member of the party. We therefore attribute seats of this party to "others" since they are not a member of an official political party/group.
