biomass of fish stocks

Central elements of CFP

Discard ban

State and development of the biomass of fish stocks

27. February 2017

Too much focus on targets

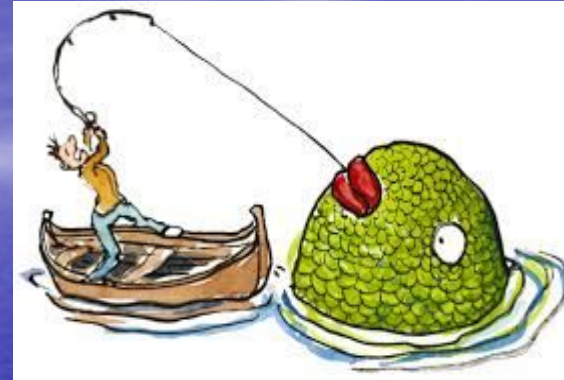

Not enough focus on how to get there

27. February 2017

State and development of the
biomass of fish stocks

Hypothetical benefits

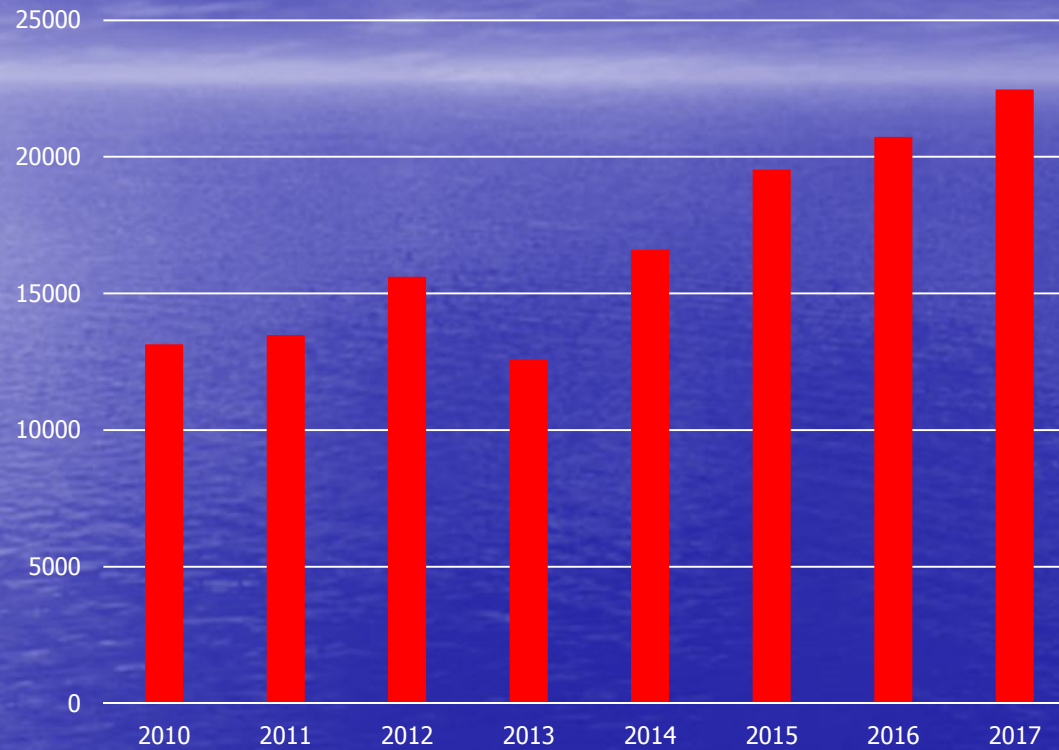

have to be balanced with actual costs

27. February 2017

State and development of the

BAD?

27. February 2017

State and development of the
biomass of fish stocks

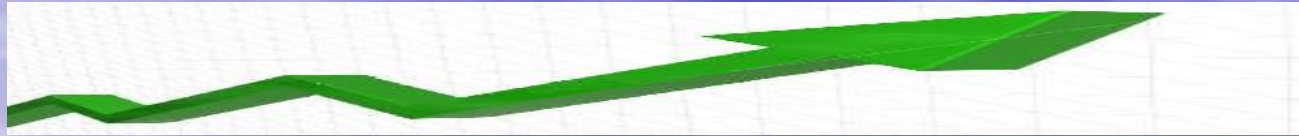

Cod in 22-24

27. February 2017

State and development of the
biomass of fish stocks

More focus on trends

– less on distance from targets

27. February 2017

State and development of the
biomass of fish stocks

Overall development
in stocks is positive

Human activities in a chaotic nature
are not best managed only by law
