Data Hub: Key Element for Customer Empowerment in the Liberalised Market

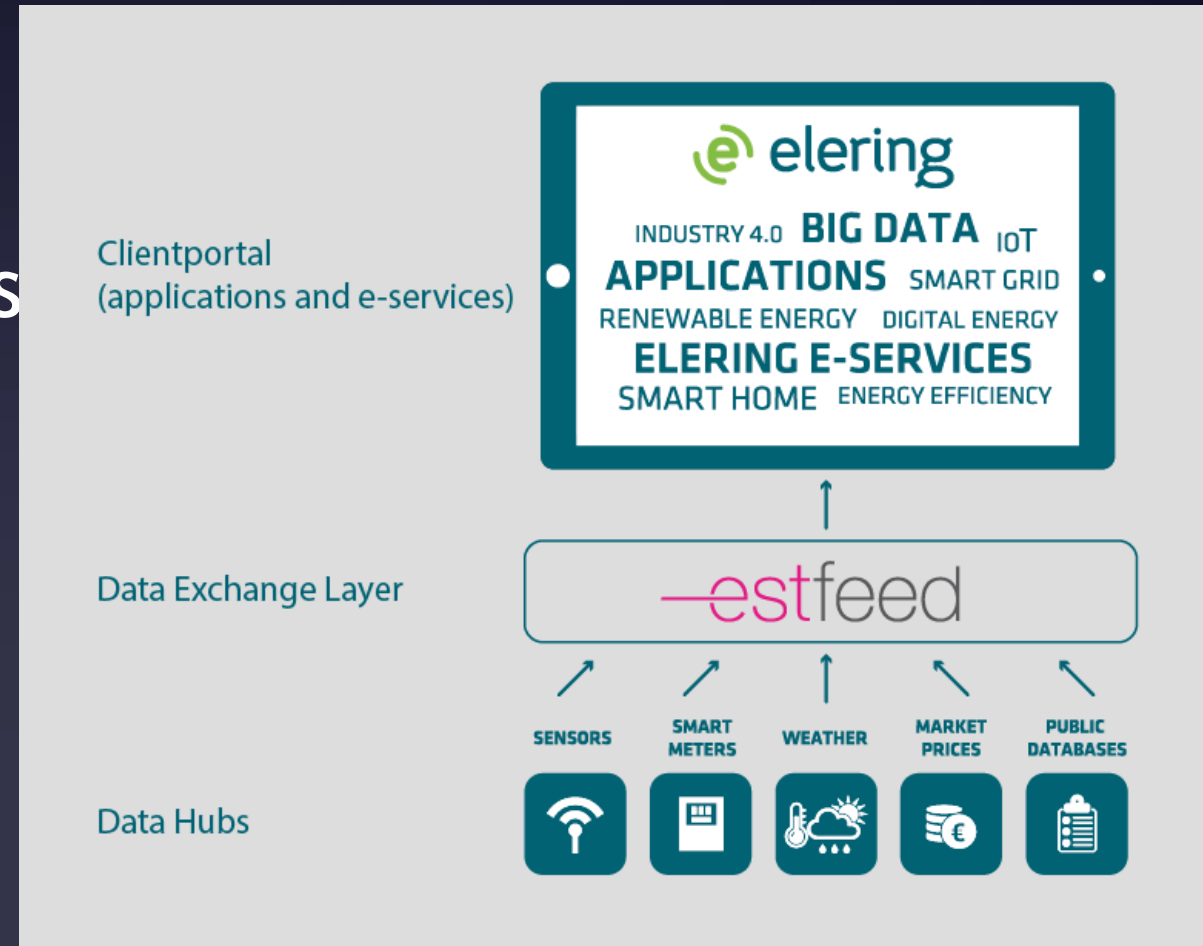

Customer benefits:

1. Actual supplier choice: switch rate: 38 %
2. Low sales margin: 0,18 € cent/kWh
3. PEX price linked contracts: 30%

Smart Grid Platform Estfeed Layout

1. First step, data hubs as basis
2. Second step, secure data exchange platform merging hubs and data sources
3. Third step, variety of applications owned by different stakeholders

From National Data Hubs to Multi-country, Multi-sectoral & Real-time platforms

1. Real time data
2. DSOs act as neutral parties. Actual, ownership unbundling of DSOs
3. EU wide data exchange standards with regional data exchange platforms
4. Single energy market across energy sources (electricity, gas, biomass etc)

Thank you!
