

## **SEDE** meeting « Future challenges for the EU SatCen »

Analysis for decision making

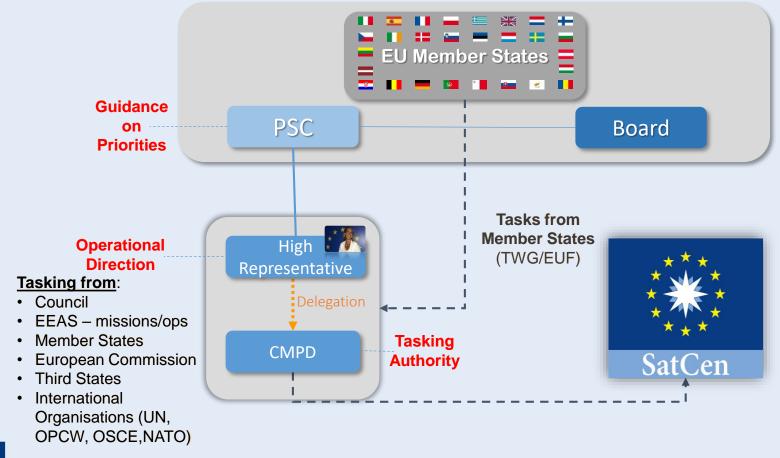

### A unique operational intelligence instrument to support the EU external action in CFSP/CSDP

# EU SatCen mission & governance

#### Mission

To support the <u>decision making</u> and <u>actions</u> of the Union in CFSP/CSDP, inc. missions/operations by providing products and services resulting from the exploitation of relevant space assets and collateral data, including satellite and aerial imagery (24/7 autonomous operational Geoint capability, secure)

# Current engagements

- Operations
- Regional Conflicts
- Piracy smuggling
- Migration
- Proliferation WMD

Disasters humanitarian aid

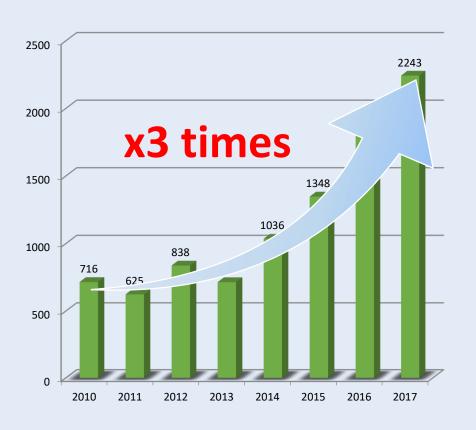

### **Task Evolution 2010 – 2017**

### By number of Products

# 201330% of production delivered not later than24 hours after imagery acquisition

### By number of Downloads from MS

#### 2017

75% of production delivered not later than 24 hours after imagery acquisition

# Cooperation

#### Article 2.3 of SatCen Council Decision

• ".... cooperate with the Commission and with Union agencies, bodies or Member States, .... maximising synergies and complementarity with other Union activities .... in particular in the area of space and security"

Proposal for a Regulation establishing the space programme of the Union and the European Union Agency for the Space Programme

• " .. SATCEN will be maximising synergies and complementarities with other Union activities especially the Programme and its components."

### **Commission Delegated Operations**

The **Copernicus services for Security applications** aim to support the related European Union Policies in the following priority areas:

#### **Service**

**Border Surveillance** 

Maritime Surveillance

Support to EU External Action

### **Operator**

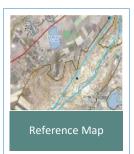

**FRONTEX** 

**EMSA** 

**EU SatCen** (15/05/2017 - 118 tasks)

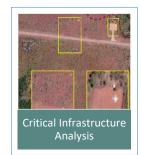

### PORTFOLIO

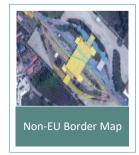

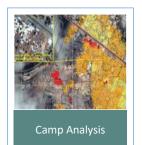

### NEW GEOSPATIAL PARADIGM

- New constellations and sensors (small, micro and nano satellites);
- New analysis technologies (automatic detection algorithms using Artificial Intelligence);
- Business model of commercial providers based on subscription services (access to data+analytics);
- Big Data analysis (need of performant processing platforms);
- Wide area analysis (detection of anomalies);
- Integrated services with other INT (SIGINT, HUMINT, OPSINT...);
- **Real-time** and near real-time products and services...

→ INTERACTIVE SECURE PLATFORM (24/7 data + processing)

## **Highlights**

- Cooperation Commission, Interagencies (EDA, EUISS, Frontex, EFCA, ESA)
- Political instrument (OSCE/SMM, OPCW, IAEA)
- Future challenges:
- → Fully committed Member States (13 M€/year)
- → BREXIT impact
- → MFF 2021-2027, Space Regulation → SatCen as reference entity for CFSP-related space initiatives
- → Technology/innovation
- → CREDIBILTY of the EU external action (EU Global Strategy)
