Should Poland accept refugees from countries affected by wars?

Majority of Poles prefers to leave EU than accept refugees

51,2%

refugees, even if that
means leaving the

The study commissioned by the Batory Foundation, carried out by Polityka Insight shows even so many of the comments under the news related to the European Union may be negative! Similar numbers were shown in the monitoring carried out by the European Front.

This makes people with unfounded views of the Union by default becoming Eurosceptic when they see only one side of the dispute.

We have a problem

The EU model is facing a coordinated attack

Social Media has become one of the most efficient levers to influence public opinion

Disinformation is being spread in coordinated fashion by the EU's external and internal adversaries

Voters can now be targeted down to individual accounts

Beyond elections, social media are used to instill distrust between EU countries and citizens

Foreign bots are used en masse to destabilize Western institutions
