COVID-19 and beating cancer

Dineke Zeegers Paget, LLM, PhD
Executive director, European Public Health Association

office@eupha.org  https://eupha.org/

EUPHA receives co-funding under an operating grant from the European Union’s Health Programme (2014-2020). The content of this presentation represents the views of the author(s) only and is his/her sole responsibility; it cannot be considered to reflect the views of the European Commission and/or the Consumers, Health, Agriculture and Food Executive Agency or any other body of the European Union. The European Commission and the Agency do not accept any responsibility for use that may be made of the information it contains.
Voicing knowledge, building capacity

Increase in risk behaviour for cancer
- unhealthy diets
- alcohol
- less physical activity

Delays in screening and diagnosis
- After COVID-19, increase in cancer diagnosis
- Late identification leads to higher burden on health care
26 theme-specific networks of expertise

Health care workforce
overstretched and overworked during COVID-19
But after COVID-19, a need to catch up with business as usual

Health care systems
Opportunity to modernise the health care system (e.g. e-consults)
Not ‘building back better’, but innovate and modernise
