The Ladder of Transparency
More sustainable products at reduced risk

1. **Supplier Mapping & Profiling:**
   - Map & discover all suppliers beyond Tier 1
   - Audits & Assessments: Record and analyse third-party audits and custom assessments

2. **Product Traceability:**
   - Top-down, digital
   - Product Tracing: Discover and visualize your product journey
   - Certification Management: Collect and validate certificates at every tier

3. **Material Traceability:**
   - Real time monitoring of transactions
   - Batch Tracing: Establish real time traceability at a Lot level
   - Manage Risks & Compliances: Link all the production steps with purchase orders, certificates and reports

4. **Action & Communication:**
   - 100% verified and provable
   - Reporting & Analytics: Track your progress and act to achieve the sustainability goals
   - Transparency: Confidently share information with validated data

**Supplementary Text:**
- **Supplier Discovery & Value Chain Mapping:** Centralized, digital
- **Certification Management:** Collect and validate certificates at every tier
- **Manage Risks & Compliances:** Link all the production steps with purchase orders, certificates and reports
- **Batch Tracing:** Establish real time traceability at a Lot level
- **Product Tracing:** Discover and visualize your product journey
- **Certification Management:** Collect and validate certificates at every tier
- **Audits & Assessments:** Record and analyse third-party audits and custom assessments
- **Reporting & Analytics:** Track your progress and act to achieve the sustainability goals
- **Material Traceability:** Real time monitoring of transactions
- **Action & Communication:** 100% verified and provable
- **Transparency:** Confidently share information with validated data
