AA	Payments in 2014 against assigned revenue in % of assigned revenue in 2014 (current and carried-over)	Paiements sur crédits de recettes affectées 2014 en % des crédits de recettes affectées 2014 (courants et reportés)	2%	AA=Z/(W+X+Y)

1. OBJECTIVES

1.1. The DG's objectives

DG Communication's key objective of raising awareness of the European Parliament, of its political nature and its powers, of course took on a particular significance in this electoral year. 2014 marked the culmination of three years' work which had been geared toward improving the communication platforms and optimizing the communication capacity of the Directorate General in the run-up to these European elections, the first since the Lisbon Treaty, conferring new and extended powers on the European Parliament, came into force.

The Action Plan 2011 - 2014, designed to implement Parliament's updated communication strategy, adopted by the Bureau in July 2010 and endorsed by the Bureau on 23 March 2011, has constituted the backbone of DG Communication's work programme over the past three years. Comprising 21 concrete actions, focussed on the core business of DG Communication, i.e. the provision of impartial, accurate information about the European Parliament's role and activities to a wide audience in both centralized and de-centralized contexts, reflecting the institution's political nature and increased powers, with the aim of bringing EU policies and politics closer to the citizen, its progressive implementation has ensured that the ground was thoroughly prepared for the rolling out of the institutional information and communication campaign for the EE2014 elections.

In line with the Political guidelines adopted by the Bureau on July 2nd 2012, the communication campaign, built around three central themes, EP politics, policies and values, was politically neutral and paved the way for the political election campaigns which were run by political parties and independent candidates. The goal of the institutional information and communication campaign was to provide better overall knowledge of Parliament's achievements, to highlight its image as the Chamber of the European citizens and to increase the promotion of political debate in public discourse and the media. The creative concept was endorsed by the Bureau on 20 May 2013 and a specific contract for the execution and implementation of the campaign was signed on 7 June 2013.

The emphasis of the campaign was put on the political nature of the European Parliament and the new powers conferred on it by the Lisbon Treaty translated through the message "This time it's different". The concept was based on a four-phase approach revolving around the baseline of ACT. REACT. IMPACT. and aiming to establish the European Parliament as a recognised brand to ensure the perennity of the campaign well beyond 2014.

Launched in September 2013, timed to coincide with President Barroso's "state of the Union" speech, the campaign ran until the end of 2014 with its post-electoral phase focusing on the outcome of the elections, the constitution of the new Parliament, the hearings of Commissioners- designate, and the inauguration of the new Commission and its President as elected by Parliament.

An ex-post evaluation of the information campaign has now been commissioned with an external consultant, in response to the budget authority's request (resolution of 23rd October 2013 on 2014 draft budget). This evaluation aimed at analysing the methodology and implementation of the campaign will give a valuable insight into the pertinence of the various choices made along the way and will serve to enrich the necessary reflection on the strategic decisions to be taken as regards communication strategy and its implementation in the years to come.

Throughout 2014, DG COMM used two key tools to measure its progress toward the achievement of its key objective, public opinion monitoring and media monitoring. The increased level of public opinion monitoring was maintained in 2014, both before and after the elections and the media monitoring activity was harmonized across the Member States, with framework contracts signed in each MS to allow for an intensification of this activity across 2014. Moreover new tools were developed in the field of audiovisual media in order to measure daily rating of viewers of campaign products (e.g. teletrax).

Whilst the EE2014 information campaign of course represented the core focus of DG COMM's energies in 2014, the organisation of the first ever European Youth Event, aimed at raising awareness of European identity among young people, constituted a new and exciting challenge for the DG. The event, under the general motto "Ideas for a better Europe", took place in Strasbourg in May 2014, with up to 5.000 young people from all over Europe.

The House of European History continued to be a priority for DG COMM. The project is an integral part of the visitor offer of the European Parliament and the visitor's strategy currently under development. In addition to its permanent exhibition temporary and travelling exhibitions, events, conferences, an extensive online offer and learning programmes targeted at different age groups will also be developed for the House of European History.

Following the Bureau's endorsement of the Strategic Execution Framework (SEF) for the European Parliament and its Project Portfolio (PPP), DG COMM has developed its SEF and PPP in line with the Parliament's overall framework.

Under the motto "Produce less, communicate better", DG COMM has identified 8 strategic priorities to be pursued, namely Media Landscape, Branding, Visitors, Web Presence, Stakeholders, Digitalisation, Youth and effective planning, measurement and evaluation of communication activities.

In parallel, DG COMM will be reinforcing its evaluation capacities to enable it to develop strategic leading metrics which will be a valuable tool in deciding a future communication strategy.

1.2. Feasibility and risk assessment

The main challenge for DG COMM during this election year was to maintain the high quality of the standard services offered while effectively implementing the institutional information and communication campaign towards 2014.

Preparatory works for the information campaign started well in advance making use of existing resources. Financial programming began in 2010 with the identification of EE 2014 related budget from within DG COMM's overall budget over three financial years. As regard human resources, DG COMM went throughout a number of changes to the organization structures in order to align the hierarchal organization and the operational reality.

It is clear that any major communication project of the dimension of the information campaign carries a certain number of risks, the most important being that of reputational risk. This required particularly sensitive handling for a communication campaign which had to address citizens of 28 countries in 24 languages. To this end, in addition to the maximum effort which was made to reduce risks to a minimum by means of careful forward planning, a transversal governance structure was established and clear validation procedures set up, at appropriate levels, for all campaign products.

A framework contract was signed with three major communication agencies to ensure adequate response capacity and the main contract for the implementation of the campaign was signed in June 2013. Work with the external contractors represented in some cases a challenge for DG COMM, in particular as concerns the underestimation of human resources or lack of specialisation in some communication areas. On the other hand the contractual arrangements in place allowed a great flexibility and efficiency in terms of budget management.

The organization of the Presidential debate on May 15th and of the Election Night on May 25th represented a new challenge for DG COMM. Work to prepare the only debate between the five candidates to the presidency of the European Commission started well in advance in order to establish partnerships with the European Broadcast Union, the political parties and TV channels. The Election night was a unique political and media event aiming to provide and distribute pan-European election results, analysing possible consequences for the set-up of the Parliament and other institutions and providing a pan-European panorama of reactions on the elections results.

In both cases, DG COMM invested considerable technical, budgetary and human resources in order to ensure the widest media coverage and take maximum precautions to ensure the smooth realisation of the two events.

During the course of 2014, several new projects had to be implemented following political decisions (e.g. EYE 2014, 360° film and other Parliamentarium activities in the MS / EPIOs, Batorama ad-hoc events). Such projects, which were not included in the annual programming exercise and for which no budgetary or human resources had been foreseen, inevitably entailed shifting resources from other activities, thereby compromising respect for deadlines and execution of programmed priority activities and regular tasks.

On a more general note, the human resources at the disposal of the DG remain an element of concern. The EP wide 5% cut in human resources impacted all services but in particular those where experienced colleagues left for retirement and were not replaced. The high number of staff exercising their statutory right to work part-time also had a significant impact on the response capacity of individual services, particularly in the case of the Information Offices where teams are often small. The pressure on human resources means that staff are required to take on new and additional tasks and this may comprise a risk to the achievement of the strategic objectives.

Finally, as regards financial management the Internal Audit Service (IAS) in accordance with its Work Programme 2014 assessed a number of risks associated to the financial management in DG COMM:

- a) The follow-up of open actions from previous audits, in particular the assessments on the Internal Control Framework, the audit of the Visitors' Groups, the processing of payment requests, the public procurement process. For every outstanding recommendation appropriate actions have been taken, some of which have yet to come to maturity. Out of the initial 25 actions, only 5 remain still open at 31.12.2014: The main actions that remain open concern the Visitors' Groups and in particular the rules on reimbursement of the groups for which the IAS considers a critical risk as regards alignment of the Parliament's subsidies and the real costs incurred by the visitors groups. The divergence of views between the IAS and DG COMM has triggered a consultation with the Audit Panel, which is currently under way.
- b) The specific audit of the European Information Offices and the imprest account settlement process that was completed in July 2014. Eight recommendations were issued, concerning mainly two issues: the processing of the regularisation orders within the regulatory time limits and the methodology of verification of the expenditure.

Appropriate action has been taken, inter alia through drafting an entirely revised set of instructions and guidelines on the management of the imprest accounts by the EPIOs which is already in force.

- c) The audit on the Grants Program which is still on-going.

2. ASSESSMENT OF RESULTS IN THE LIGHT OF THE OBJECTIVES - USE OF RESOURCES

2.1. The DG's environment

Throughout 2014, all services of DG COMM have dedicated their efforts to the implementation of the institutional and information campaign.

In order to establish a well-balanced use of external and internal resources as well as efficient management across the range of communication channels, a governance structure was set up following the signing of the main contract for the implementation of the campaign. This transversal governance structure ensured a clear validation procedure for all campaign products. The governance structure comprised a Task Force chaired by the Director General and comprising all four Directors and all Heads of Unit of DG COMM meeting every month and a Steering Committee (SC) composed of different Head of Units, Directors' advisors and a selection of different colleagues meeting on a weekly basis in order to ease transversal decisions across different services. At the same time, 36 teams and project leaders, from all DG COMM Directorates, were appointed for the operational tasks. However in order to achieve greater efficiency and better time management, the structure was streamlined to a purely operational level for the final phases and project teams with similar tasks were merged ensuring a smoother implementation of the campaign.

The first months of the year were devoted to completing the Thematic phase of the campaign running until February 2014 and to launching the Go- to Vote phase. The thematic phase prepared the ground for 2014 elections by communicating on the political nature of the EP and impact on EU's citizens' lives, with a focus on five major themes relevant for EU citizens (Economy, Money, Jobs, EU in the world, Quality of life). This phase was characterized by the use of a series of innovative communication tools and activities such as the "ReACT" events organized in five major cities in the Member States.

The thematic phase was followed by the Go-to vote phase, a citizen activation phase aiming to raise citizens' awareness of the elections date and stressed the importance of participating in the elections while continuing Parliament's main message "*Use your power. Choose who's in charge in Europe. This time it's different*".

During this last phase, running until the elections days, the Parliament was able to boost the dissemination of the campaign's messages throughout a series of key events.

The Open Doors Days was of particular importance in the build-up to the European Elections 2014 welcoming thousands of citizens in the EP premises few weeks before the elections. In total, 18.000 people visited the EP's premises in Strasbourg and more than 14.000 in Brussels; moreover for the very first time, the EPIO Luxembourg participated in the Open Doors Day of the Court of Justice, which attracted between 15.000 and 20.000 visitors. Overall the Open Doors Days attained considerable success with a very good cooperation between the DGs and the political groups, high attendance of MEPs and a substantial coverage in the press.

Two special events can be considered major marking points of the final stages of the campaign: the Presidential Debate and the Election night.

On May 15th the only “Presidential Debate” between all five candidates to become the next President of the European Commission took place within the EP premises in Brussels. This event was organised in cooperation with the European Broadcast Union (EBU) and the European political parties and involved more than 150 partners (TV Channels, radios and website) broadcasting live the event across the EU countries.

The Election night, on May 25th collecting electoral results for projection of the political composition of the new Parliament and ensuring live broadcasting of the event, attracted over 1.200 accredited journalists reporting live from the EP premises as well as over 150 broadcasters from 46 countries. The general public also showed a deep interest in the election night attending events and debates organised in the Parliamentarium and gathering in the vicinity of the Parliament.

The last phase, the “Post-electoral phase” of the campaign focused on the outcome of the elections and the constitution of the new Parliament. DG COMM communicated on election results and the composition of the new Parliament across all EU Member states and provided media coverage concerning the election of the new President of the Commission and ensured Commissioners’ hearings coverage via traditional and new media.

A wide range of communication tools (online and offline) were used to insure the information campaign widest outreach namely TV and radio spots, press toolkits, social media, outdoor advertising and events. The EP’s presence on the internet was considerably reinforced by the use of social media platforms, an European elections dedicated website (www.elections2014.eu) and mobile applications facilitating viral distribution and high interaction with citizens. At the same time, a new Download Centre, an online platform providing electronic versions of the Parliament’s communication materials was developed for campaign purposes and accessible by all communication partners.

The media were fully involved from the beginning of the campaign as they were identified as priority target groups. Several initiatives were organized for journalists and the new media monitoring system allowed DG COMM to track results registering pre-electoral record-high media coverage with a peak reached the day after the elections (8 times more than a daily coverage).

The campaign was implemented in the Member States through the 34 EP’s Information Offices (EPIOs). The Information Offices were crucial actors in executing the various phases of the campaign at the national level declining the central messages into national realities and disseminating the same message in different languages in 28 countries. The EPIOs ensured active promotion of all campaign steps and organised many other pre-election activities in order to spread the campaign’s main message as well as post-election activities focusing on the analysis of EE 2014 outcome. In addition the EPIOs activated their own networks with stakeholders and local partners to generate multiplier effect in the promotion of the European Parliament branding and election material.

The EPIOs also played a key role in the negotiations with TV channels and radio stations in order to secure free broadcasting of the election TV spot and the radio advert. Through cooperation with other institutions locally they also managed to secure some funding from inter-institutional programmes. Total estimated savings for 10.700.000 EUR result for EPIOs arrangements with local partners.

During the election year special attention was paid to reaching out young people, in particular first time voters. Many debates and seminars were targeted at young people with platforms for discussion and social media activities.

In addition, a brand new format was developed for an event focusing on young people which was not part of the 2014 information and communication campaign. The European Youth Event (EYE 2014) brought together 5.000 Europeans aged 16-30 to exchange ideas on youth-related issues in Strasbourg on 11 May 2014. They took part in panel discussions on topics such as human rights, youth employment, the digital revolution and sustainability and talked about their ideas for the future of Europe with politicians, journalists and other decision makers. No additional budget was foreseen for the EYE which was funded by reallocation of resources within the existing 2014 budget.

At the beginning of the new legislative term, some minor changes were made to DG COMM's organigramme. The Policy unit was abolished, leaving only the Public Opinion Monitoring unit directly attached to the Director General. The European Union Visitors Programme unit (EUVP) and the Planning and Strategic Management unit were moved respectively under the responsibility of the Director for Relations with citizens and the Director for Resources. Two new units were created: the Media Intelligence unit within the Directorate for Media and the Visitors Services Coordination unit within the Directorate for Relations with citizens. These new units have been staffed exclusively by means of redeployment.

The operational activities were implemented through a large number and variety of financial transactions. A total of 354 new procurement procedures were launched in 2014, many of them being low value procedures for the Information Offices (this amounts to 80% in terms of the total number of procedures). With a certain frequency, DG COMM's activity entered into domains whose nature was such that competition could not be reasonably sought. In these cases the Financial Regulation allows for the use of exceptional negotiated procedures (3% of the number of procedures in 2014). For the EP Information Offices a considerable number of payment transactions, were settled through imprest accounts, though these were usually transactions of limited amount.

In order to enhance efficiency in the processing of its large number of financial transactions – 4.011 invoices received, 988 commitments, 3.328 payments, 79 recovery orders – DG COMM continued its efforts to streamline its financial planning, management and reporting procedures. In terms of management, a closer monitoring and the introduction of the electronic signature of payments improved significantly the payment delays.

The extension of the general use of Webcontracts as the key information tool for legal commitments continued to be a top priority during 2014. To this end in-site training sessions were organised in the Information Offices. These included concepts of financial management for colleagues in the field in addition to instructions on how to use the tool.

As part of its efforts to increase the European Parliament's visibility in the run-up to the 2014 elections, DG COMM finalized the last phase of the grants programme launched in 2012, aiming at raising public awareness among European citizens as to the role and activities of the European Parliament, highlighting its political nature and encouraging wide public interest in the European decisional process.

Grants were awarded in the areas of television, radio, web-based projects or specific events and focus on:

- raising awareness of the European Parliament - its role, its political nature,
- disseminating information about the European Parliament and its activities,
- increasing knowledge and understanding of the three pillars around which the European Parliament operates - politics, policies, values.
- youth activation

During the third phase of the grant programme 2012-2014, DG COMM received more than 300 applications and 56 projects were awarded already at the end of 2013. The selected projects, with a view to reinforce communications activities on the European Elections 2014 were implemented throughout 2014 for a total amount of 2.975.523 EUR. In light of the results of the EE2014 post-election survey carried out by the European Parliament, it came up that additional communication actions were needed with regards to young European citizens therefore it was decided to extend the duration of this programme by an additional year and to launch a new cycle of specific calls for proposals in 2015. A call for proposals was launched at the end of 2014 to co-finance specific projects in the field of television, radio and web/ events up to 2.400.000 EUR.

2.2. The DG's human resources

The table reflects the number of staff working for DG COMM on 31 December 2014.

	Situation as at 01/01/2013	Situation as at 01/01/2014	Staff numbers as at 31/12/2014
	Establishment plan posts		
AD			
Permanent	259	263	223
Temporary	10	11	35
AST			
Permanent	357	356	337
Temporary	13	12	22
Total 1	639	642	617
	Other staff (FTE estimates)		
Contract staff	99	89	103
Seconded national experts	0	2	2
Agency staff	0	2	0
Interpreters (ACI)*	0	0	0
Accredited parliamentary assistants	0	0	0
Local parliamentary assistants	0	0	0
Outside staff**	84	85	98
Total 2	183	178	203
EP total (1+2)	822	820	820

* Number of days converted into FTEs on the basis of an average of 220 days/year.

** Staff made available to the EP (at the three places of work) under service contracts.

2.3. Budget implementation in 2014

The initial budget for the year 2014 was €102.550.435. DG COMM established a detailed budgetary programming at the end of 2013, which was closely monitored through, inter alia, the monthly reporting. Further in-depth reviews were carried out at determined times of the financial year:

- In early June, a **mid-term review exercise** of the 2014 budget implementation was conducted.
- In September and October, two **mopping-up exercise** were launched by DG FINS.

Surpluses or deficits identified during these exercises were, when possible, re-balanced between activities of the various Directorates.

The following **transfers** between sectors (S-transfers) have been carried out in 2014:

Ref. FINS	Transfer type	Amount	Donor	Recipient	Transfer description
S63	Transfer – S	25.592.64	02140-09	02140-11	Financing audiovisual – purchase of material (Pressroom Strasbourg)
S55	Transfer - S	135,000.00	03248-02	03248-01	Audiovisual coverage -
S32	Transfer - S	1,135,000.00	02140-11	02140-09	Reinforcing audiovisual equipments
S33	Transfer - S	80,000.00	03244-01	03244-02	Reinforcing Euroscola programme
Total;		1,375,592.64			

In February 2014, an amount of €70,000 was sub-delegated by DG ITEC to DG COMM to cover its expenditures in the area of IT systems – decentralised investments.

During the mopping up exercises €4.221.000 (or 4% of the initial budget) was returned. The main reasons for the surpluses were:

- a) the temporarily decrease of the number of visitors groups in the months immediately following the elections This situation is normal after the period of elections and the appointment of new MEPs;
- b) the cancellation of the new Commission’s inauguration event and
- c) DG ITEC’s schedule for the signature of Framework Contracts for internet activities having proved unrealistic.

A. Initial Budget		102 550 435
B. Subdelegation DG ITEC – IT systems-decentralised investments		70 000
C.1. Mopping up 1		(-)3 371 000
02300-05	Audiovisual consumables	44.000
03200-08	Acquisition of expertise : House of European History	84.000
03220-09	Documentation and library: Subscriptions and media monitoring	365.000
03242-02	Expenditure on publication, information and participation in public events: Internet	300.000
03244-01	Organisation and reception of groups of visitors, ...: reception costs and subsidies for visitor’s groups	2.471.000
03244-03	Organisation and reception of groups of visitors, ...: Financing of grants and traineeships for opinion multipliers from third countries	107.000
C.2. Mopping up 2		(-) 850 000
03242-01	Information, publications, events	600.000
03245-01	Seminars/Journalists	250.000
D. Final Budget : A + B – C.1 – C.2		98 399 435

2.3.1. Initial and final appropriations

Authorised appropriations in DG Communication’s initial budget for 2014 totalled €102,550,435 and final appropriations at 31 December 2014 totalled €98,399,435

2.3.2. Final appropriations and appropriations committed

Final appropriations at 31 December 2014 totalled € 98,399,435 when the total commitments entered into amounted to €96,767,259.51 or 98% of the final appropriations.

2.3.3. Appropriations committed and payments made

Commitments at 31 December 2014 totalled € 96,767,259.51, where payments totalled €57,590,816.96 or 60% of all commitments entered into.

2.3.4. Use of automatic and non-automatic carryovers from 2013 to 2014

Automatic carry-over to financial 2014 totalled € 43,653,034. At 31 December 2014 payments made amounted to €41,952,025 or 96% of carried over credits 2013-2014 for all posts of the Directorate General.

2.3.5. Use of appropriations arising from assigned revenue

2.3.5.1 Specific expenditure appropriations/assigned revenue

The assigned revenue available at 31 December 2014 amounted to €87,376.58. Commitments amounted to €5,652.40 or 6% of which 0% has been paid.

2.3.5.2 Specific expenditure appropriations/assigned revenue carried over

Assigned revenue carried over from previous years totalled €24,427.39.

2.4. Results

DG COMM's main objective of raising awareness of the European Parliament, its political nature, its role and powers took on particular significance in the context of EE2014.

With the launch of the EE2014 information and communication campaign, DG COMM objectives focused on establishing the European Parliament as a recognised brand and on increasing the promotion of political debate in public discourse and the media. In order to improve visibility and public understanding of the European Parliament and ensure the information campaign's widest outreach, DG COMM intensified its communication activities making use of traditional and new media, widening the variety of communication tools and organizing a considerable number of centralised and decentralised events.

A new Election website was launched in all 24 EU languages counting 7.690.036 visits between 01/12/2013 and 03/07/2014. The number of pages viewed during the same period was 15.440.506. A peak of 2.705.301 pages was viewed and 1.615.374 visits were recorded on the election night alone.

More than 100 events were organised in the Member States with an overall number of participants of 4.202.149 and stakeholders involved of 5.040. Moreover the introduction of a series of activities such as the "ReACT" events organized in five major cities in the Member States and related events across the Member States also reached significant results: more than 3.600 people took part in the "Money - Investing in Europe" events; 25.400 people (2.000.000 twitter account reached) were involved in the "EU in the world" events; 12.200 people (7.500.000 twitter account reached) attended the events related to the theme "Economy"; 10.498 people attended the events on "Jobs" with a potential outreach in the

Member States of more than 11.673.000 people and 23.585 people (11.746.501 accounts were potentially reached via Facebook) took part in the “Quality of life” events.

Several initiatives were organized for journalists in order to stimulate the political debate: more than 1.000 journalists attended seminars in Brussels and Strasbourg and more than 2.400 journalists attended seminars in the Member States giving a very positive feedback on the seminars organised.

The use of Social Media platforms was considerably reinforced and played a vital role during the campaign. For example, the “Humanifesto” film launched at campaign kick-off to install the overall baseline and narrative of the campaign was viewed 8.267.358 times on EP’s social media channels. Social platforms were not exclusively used by the central services. They were also widely used by EPIOs, maximising the impact of the events organized by the different Information Offices. In total throughout the whole duration of the EE2014 Campaign more than 59.000.000 Facebook impressions were generated by EPIO accounts, including more than 36.000.000 during the Go to vote phase. From a Twitter perspective, a potential outreach of more than 66.000.000 people was generated by the different EPIO accounts, half of them (more than 34.000.000) during the “Election Night”.

The EPIOs did not only play a very active role on social media, but they significantly contributed to the promotion of national and regional awareness about the EE2014. As a matter of fact the EPIOs negotiated free broadcasting of the election TV and radio spots with national TV channels and radio stations generating a very high outreach. For example the Go-to-vote TV spot recorded 996.638.500 viewers in prime time (Teletrax information) in 26 countries.

The offline media campaign also produced remarkable results advertising EE2014 visuals in public national transport networks. Few weeks before the elections 80 main cities in the 28 Member States were decorated with the EE2014 visuals.

Two main events contributed to the widest dissemination of the campaign’s main messages together with raising awareness about the EP: the Presidential debate on May 15th and the Election Night on May 25th. The Presidential debate, organised in partnerships with the European Broadcast Union (EBU) and the European political parties, involved more than 150 partners (TV Channels, radios and website) broadcasting live across the EU countries the only debate between the five candidates to become the next President of the European Commission. The event received a wide media interest and attracted around 250 journalists from the written press. The Election night also attracted a remarkable number of journalists and raised interest among the general public, traditional and new media. For instance, the Twitter dashboard for the Election night monitoring all elections related tweets during the Election night counted more than 1 million tweets with #EP2014. An unprecedented level of outreach was achieved during the EE2014 campaign.

Awareness raising among young people remained a key objective in 2014.

Following political decisions, DG COMM received a mandate to organize the first ever European Youth Event (EYE 2014), with no additional budget. Despite the challenge, additional to campaign related activities, the EYE brought together 5.000 Europeans aged 16-30 to exchange ideas on youth-related issues in Strasbourg on 11 May 2014. More than 200 activities in various formats were organised with the attendance of ± 500 speakers, moderators and facilitators. The event registered a very high satisfaction rate from participants, 96% of which would recommend the event to a friend. The event reached a wide outreach also on social media with more than 14.000 tweets with #EYE2014 sent out in 3 days.

Moreover, 10.322 young people took part in the annual programme Euroscola organized in Strasbourg and around 299 activities were organized for young people by the Information Offices in the Member States. The use of social media was particularly successful in terms of reaching young people, especially to promote European Elections. Among the most successful initiatives, the project Storychangers, an animated video promoting Elections for which the audience was invited to change the ending which was viewed 2.496.099 times; or a project targeted for first time voters via a specific youth film that generated 2.506.974 views (both on YouTube and Facebook).

DG COMM measured its progress toward the achievement of its key objective by means of **monitoring trends in public opinion and media**, before and after the elections days. For instance 137 projections of the new EP were made available between 07/06/2013 and 24/05/2014. The post-elections surveys showed that 65% of EU citizens recall a campaign encouraging people to vote and 57 % of EU citizens had all necessary information in order to choose who to vote for in the European elections 2014. The media monitoring service recorded 10.700 articles mentioning the European elections between September 2013 and February 2014 and 21.300 articles between March and May 2014.

Moreover the objective of providing and distributing pan-European election results was reached through the development of a results website designed to allow the collection and dissemination of the results of the 2014 European elections to the general public and media. This website counted 9.780.000 visits between 01/04/2014 and 31/05/2014 with a peak of 4.700.000 visits on May 26th 2014. A Twitter dashboard for election night aiming to monitoring all elections related tweets during election night also reached significant results: with over 15.000 visits on 25 May and more than 1 million tweets with #EP2014, the Twitter dashboard was shared more than 2.500 times on Twitter and more than 500 times on Facebook.

A very challenging objective for DG COMM in 2014 was to maintain the high quality of the standard services during the election year. DG COMM ensured the high quality of the “business as usual” while effectively preparing and implementing the first phases of the institutional information and communication campaign towards 2014. In particular DG COMM welcomed 82.227 visitors groups in the EP’s premises in Strasbourg (outside sessions), around 340.500 visitors at the Parliamentarium. In addition DG COMM organized 258 exhibitions and cultural events supported by MEPs within EP premises in Brussels and Strasbourg and carried out the organization of the Open Doors days in Brussels and Strasbourg with more than 32.000 visitors, with a participants’ satisfaction rate of almost 90%.

The audio-visual services maintained a very high standard service with 802h 30min of audiovisual broadcasting (Teletrax), counting around 5.080 TV operations and 16.708 photos operations. Moreover 880.939 monthly views were registered on EuroparlTV and 56.000 monthly (average) single visitors watched EP live streaming.

During the Election year standard service was also improved thanks to the introduction of innovative communication tools, for example a special mobile version of Europarl website was developed which is now fully integrated in the offer of Europarl websites.

See attached table on performance indicators.

3. EVALUATION AND EFFECTIVENESS OF INTERNAL CONTROLS, INCLUDING AN OVERALL ASSESSMENT OF THE CONTROLS' COST EFFECTIVENESS (ART. 66(9) FR)

The internal control standards put in place in DG Communication are evaluated during the course of every budgetary year in the following areas:

- control environment,
- performance and risk management,
- information and communication,
- control activities,
- audit and evaluation.

The proper implementation of actions is ensured through several layers of checks and controls at the various stages of expenditures incurred by DG COMM. Key components of the internal control strategy are the detailed planning and prior approval of all expenditure and the ex-ante verification on the legality and regularity of the operations. Since 2012 the contractual management and ex-ante verification is centralised in the Finance Unit. The actions launched by DG COMM are firstly analysed by the operational and financial initiators and then submitted for ex-ante validation. Over 2014 the Finance Unit has examined:

- 8.406 financial transactions (commitments, invoices, payments and recovery orders)
- 3.163 contracts and grants (procurement procedures, contracts, order forms and other agreements).

All transactions were in conformity with the Financial Regulation and Internal Rules. For 19 transactions the ex-ante verification resulted in an observation: 3 with errors (see annex 6.3) and 16 with request for complementary justifications.

The objective of the ex-ante verifications is not only to ensure the compliance with the Financial Regulations and internal rules but also to generate efficiency gains through the continuous and systematic assessment of the aptness of the internal control systems put in place by the authorising officer. The findings of the ex-ante verification provide valuable input for the regular revision and update of the procedures and for the drafting of guidelines on financial management.

The Financial Regulations (art 66.9) require the authorising officer to ensure not only the effectiveness but also efficiency of the internal control and to make an assessment of the cost of control. The overall cost of the aforementioned controls is estimated at 1% of the 2014 budget¹.

4. CONCLUSIONS

DG COMM's priority for 2014 was to effectively implement the institutional and information campaign in view of the European Elections.

During the first months of the year, DG COMM services concentrated their efforts in preparing the ground for 2014 elections by communicating on the political nature of the EP and impact on EU's citizens' lives focusing on five major themes relevant for EU citizens. The third phase "Go to vote" of the campaign aimed at raising citizens' awareness of the

¹ The overall costs consists of the Direct Costs (staff directly attributable to the control activity) + External contracted costs (e.g. audits) + Overhead Costs (internal audit, management,). The estimated cost of 1% only includes direct costs. DG COMM does not use external sources for verifications. The overhead costs are included as PM since no information has been made available by the central services on the estimated overheads

elections date stressing the importance of participating in the elections while continuing Parliament's main message *"Use your power. Choose who's in charge in Europe. This time it's different"*.

The month of May was very intense for DG COMM, registering a considerable number communication activities and events following one another. The Open Door Days attracted a very high number of visitors to the EP premises in Strasbourg and Brussels calling for citizens' activation in view of the elections, DG COMM also participated (with a group of runners and a promotional booth) in the 20KM of Brussels the weekend before the elections with a view to giving last-minute local visibility to the information campaign.

The last phase of the campaign (Post-electoral) focused on the outcome of the elections, the constitution of the new Parliament and all communication activities related to the inauguration of the new European Commission providing media coverage to the nomination of the new President of the Commission and ensuring Commissioners' hearings coverage via traditional and new media.

The campaign was an extensive and multitargeted one, the targeting based and segmentation exercise carried out in early 2013 to ensure the most efficient use of the resources available for the campaign. Key elements included:

- TV and radio spots distributed freely in 173 channels for a total of over 7.400 airings;
- Online actions in particular on social media platforms, editorial products in the form of Infographics or press kits, a specific website dedicate to European elections and one dedicated to the Elections results;
- Offline media campaign implemented in the public transport networks of 147 cities across the EU;
- Decentralised events involving local stakeholders, media and citizens;
- Media events with over 1.200 journalists;
- The Presidential debate obtaining live coverage by 154 broadcasters across 46 countries;
- The election night obtained outstanding results in the media and also raised interest among the general public.

In addition to campaign's related activities, a new challenge was undertaken by DG COMM with the organization of the first ever European Youth Event. The EYE gathered 5.000 young Europeans in Strasbourg to discuss about youth related issues to be presented to the new Parliament.

Looking ahead, in the framework of the Strategic Execution Framework, DG COMM has identified its new strategic priorities namely the branding, youth, media landscape, visitors, EP's web presence, stakeholders and effective planning, measurement and evaluation of communication activities to be pursued in the coming five years which will constitute the basis of DG COMM future work.

5. DECLARATION BY THE AUTHORISING OFFICER BY DELEGATION

I, the undersigned,

Director-General of Communication

hereby declare, in my capacity as authorising officer by delegation, that I have reasonable assurance that:

- a) the information contained in the report presents a true and fair view;
- b) the resources assigned to the activities described in the report have been used for their intended purpose and in accordance with the principle of sound financial management;
- c) the control procedures put in place give the necessary guarantees concerning the legality and regularity of the underlying transactions.

This reasonable assurance is based on my own judgment and on the information at my disposal, such as the results of self-assessment, ex post controls and remarks by the Internal Audit Service, as well as the lessons learned from the reports of the Court of Auditors for financial years prior to that for which this declaration is being made.

I also confirm that I am not aware of anything not reported here that could be prejudicial to the interests of the institution.

6.2. Report on compliance with payment time limits Rapport sur le respect des délais de paiement

In 2014, 73% of the total number of invoices were paid in due time (in monetary terms 89% of the total amount of invoices was paid on time).

The table below provides a breakdown of the amount of invoices paid within the regulatory time limit (€57 million) and the amount of invoices paid outside the time limit (€7.3 million). For invoices paid outside the time period, a late payment interest has to be paid by default if the interest amount is higher than €200 or, upon request, if the interest amount is lower than €200.

		Automatic interest amount (>200€)	Non automatic interest amount (<=200€)	No interest amount	Total
ON TIME	Number of invoices			2.586	2.586
	Total invoice amount (€)			57.055.800	57.055.800
	Total interest amount (€)				
LATE PAYMENT	Number of invoices	11	967		978
	Total invoice amount (€)	1.682.089	5.641.982		7.324.071
	Total interest amount (€)	6.641	13.272		19.913
Number of invoices		11	967	2.586	3.564
Total invoice amount (€)		1.682.089	5.641.982	57.055.800	64.379.870
Total interest amount (€)		6.641	13.272		19.913

The total amount of late interest paid by default in 2014 was €6,640.85. No claims were made by suppliers in 2014 to request the payment of the non automatic interest.

The default time limit for payments is 30 days for contracts signed after 1 January 2013 including amendments to existing contracts. In case of prior approval of a report, the time limit is 60 days.

The average delay for paying invoices by DG COMM over the year 2014 was 29 days compared to 25 days in 2013. The slight deterioration of the situation is due to the many events in May (open doors, European Youth Event, elections, etc) whereby the treatment of the many contracts and order forms to get the events organised in due time took priority over the payment of invoices.

The two remaining roots for invoices being paid outside the regulatory delays are:

- a) the absence of a modernised financial system which would allow the electronic handling of documents and electronic visa by the actors involved (of utmost importance for DG COMM, where part of the payment process takes place in the Information Offices in the Member States). In order to overcome this weakness, DG COMM is engaged in a project to digitalise its financial processes in 2015.
- b) the year end closing procedure.

6.3. List of exceptions - derogations from the rules

Liste des exceptions et des dérogations à la réglementation

List of waivers/cancellations of receivables (*Arts. 91 and 92 RAP*)

Liste des renoncements et annulations de créance (articles 91 et 92 des règles d'application)

Exceptions to procedures - Dérogations aux procédures

Decisions to make an exception to the applicable procedures and rules							
Document ref.	Auth. officer responsible	Subject matter	Amount	Verifiers' opinion		Decision	
				favourable with statement/ unfavourable	Reasons	Authorising officer responsible	Reasons

Document ref.	Authorising officer responsible	Subject matter	Amount	Authorising officer's reasons for waiver/cancellation
OR 824-12	J. Lahouse-Juárez	Parlamentarium shop	4.649,60 €	The initial recovery order of €9.287,02 was reduced to 4.637,42 since sales revenue was lower than forecasted.

**6.4. Long-term contractual obligations
Obligations contractuelles de longue durée**

DG COMM has no long-term contractual obligations at 31 December 2014.

**6.5. Exceptional negotiated procedures - Articles 53, 134 and 135 RAP
Procédures négociées exceptionnelles (articles 53, 134 et 135 des règles d'application)**

In 2014, DG COMM launched 25 exceptional negotiated procedures without prior publication of a contract notice for a total amount of €1,334,631 for cases listed in Article 134 of the Implementing rules.

Quantitative analysis

In 2014, DG COMM awarded 17 exceptional negotiated procedures between € 15,000 and €60,000; 4 procedures exceeded the €60,000 threshold and have been subject to a request for an opinion of the Public Procurement Forum.

Exceptional negotiated procedures in 2014 - Breakdown by amount		
Ceiling	Number	Amount
Below 15,000	4	38.381
Between € 15,000 and € 60,000	17	730.684
More than € 60,000	4	565.566
Total	25	1.334.631

Qualitative analysis

The nature of the activity managed by the Directorate General for Communication enters into some domains in which competition cannot be reasonably sought. The 25 procedures corresponding to 2014 can be broken down into the following categories:

Exceptional negotiated procedures in 2014 - Breakdown by type of event		
Type of event	Number	Amount
Visitors' Centre	8	674.625
Copyrights	6	286.459
European Elections	5	213.298
House of European History	2	70.149
Publications/Press	2	60.600
Varia	2	29.500
Total	25	1.334.631

The details of these activities are as follow:

1. Visitors' Centre

The Visitors' centre's marketing has contributed to a steady increase in the number of visitors from 220.000 visitors in 2012 to 350.000 visitors in 2014. For reasons of cost-efficiency, the marketing of the Visitors' Centre focuses on tourists who are already in Brussels or who are on their way to Brussels. Given the specific geographic focus of these promotion activities, DG COMM is limited in the choice of service providers. DG COMM has chosen direct negotiated procedures with the end suppliers such as the public Brussels tourist board and selected carriers (inflight magazines) instead of the more costly alternative of hiring an intermediary agency. Other activities directly linked to the content of the exhibition have been managed:

- Fashion Art, fusion between fashion design and plastic arts. This travelling exhibition reflecting well the diversity and cultural heritage of Europe is hosted at the Parlamentarium from November 2014 till May 2015.
- Exhibition on broken relationships from individuals all over Europe. The concept, the know-how and the set-up are owned by the Museum of Broken Relationships of Zagreb. The items of art are partially originating from the collections of the Museum and partially collected in Brussels.
- The portable media guide system which is in use at the Parlamentarium is based on proprietary software as open source alternatives were not available and the development of a completely new software solution would have been both costly and risky. In 2014, DG COMM decided to prolong the maintenance contract with the original supplier after careful consideration of the alternative of replacing the entire system by a new one.
- Permanent multimodal role-play game offered to groups of 16-32 players to experience the work of MEPs by simulating two legislative procedures on fiction proposals for directives. The exceptional negotiated procedures referred to the production of an additional Croatian version and the maintenance of the game.

2. Copyrights

Six exceptional negotiated procedures have been launched to acquire copyrights. This covers i.e. the use of the EP logo, the free streaming service of Lux Price laureate 2010 on ARTE.tv, or copyrights for internet and educational usage of pictures of the permanent exhibition at the Parlamentarium.

Another area covered by these procedures is the media monitoring: the EP is seeking for a licence for clearing the copyrights on clippings of printed media items in Belgium.

3. European elections

Five procedures have been initiated in the run-up of the European Elections. They relate i.e. to local media briefings in United Kingdom; promotion campaigns on ATM machines in Portugal; production and hanging of city-light-posters in high-speed train stations throughout Germany; banners on public transport in Finland and "Go to vote" radio campaign in Finland.

4. House of European History

The two exceptional negotiated procedures launched consist in additional tasks for the design of the permanent exhibition for the House of European History: production of a mock-up of the multimedia visitor guide for testing with the public; and in order to reach a better quality of the exhibition: the revision of the sub-topic design devoted to the personalities who were at the origin of the European integration process, called the "Founding Father" and production of eleven short infographic movies to be developed as an additional didactic tool.

5. Publications in specialised press / other media

The same layout has been used for the four editions of the brochure "Europa 2011-2014" informing German speaking stakeholders and citizens as well as secondary schools about the EU institutions in general and the functioning of the EP and its activities in the different EU policy areas. Taking into account that a broader focus should be laid on for the more educational brochure 2016-2019, informing the youth and to be used for school ambassadors programme, the format and layout of the brochure should change in 2015. In the meantime the edition "Europa 2015" should be printed at the beginning of 2015 without any change in the design. Subsequently the ending contract had to be extended by six months in order to ensure continuity.

6. Varia

Varia relates to 2 procedures: one in the framework of the Parliament's Art Collection, to update the 2012 inventory-catalogue, taking into account the new acquisitions and donations, to update the bibliography and contact details on artists and to assist in obtaining the rights of use of their work. The other procedure concerns postal services to be used to send invitations to citizens to the European Day (Luxembourg).

Below are the details of the exceptional negotiated procedures.

Annexe 6.5 - EXCEPTIONAL NEGOTIATED PROCEDURES (Art. 134 RF)

Awardee(s) name(s)	Subject	type of event	Amount	Justification	Candidates		Acceptability criteria	Awarded contract reference	PPF opinion date	Award date

6.6. Results of ex-post controls

Résultat des évaluations ex post

Since 2012 the verification of procurement procedures activities and financial transactions in DG COMM is centralised in the Finance Unit. Ex-ante controls are carried out on all transactions from central services and information offices in the Member States.

Ex-post desk reviews are carried out on a sample basis on the expenditure paid through the imprest accounts by the Information Offices and on the final payments for grants. These reviews have not revealed any substantial control weaknesses. Based on an overall risk assessment, these desk reviews may be complemented in the future by on the spot ex-post controls.

For imprest accounts, ex-post controls are performed by DG FINS. These controls (11 cases in 2014) did not reveal any major error or control weaknesses.

In 2014 DG COMM carried out an ex post evaluation of its multi-annual grants program over the years 2012-2014. The report underlined that the response to the call for proposals was massive as 818 grant applications were received during the three first years of implementation of the programme. The report also confirmed that grants had proven to be an effective communication tool for raising the awareness about the role of the EP, disseminating information on EP and its activities and increasing knowledge and understanding of the three pillars around which the EP operates, namely politics, policies, values. In particular, the notion of partnership has proven to be useful to establish an EP network all over Europe. The network of partners has substantially reinforced the visibility of the EP actions thanks to the multiplying effect. In addition, grants provide a high return on investment since projects are co-financed for an average rate of 57.3% whereas the project is being realised to 100% by the beneficiaries. The focus of the programme has been progressively shifted from the European Elections to European youth citizens, which are a key segment of the public as the attachment to Europe remains very strong in this category whereas young people were the greatest abstainers in the European Elections 2014. The emphasis on youth has contributed to reinforce the impact of the actions supported by the programme.

6.7. Sensitive posts

Fonctions sensibles

In the summer of 2012, an in-depth assessment was carried out on the identification of sensitive posts within DG COMM. This assessment has led to corrective measures been taken in 2012 and further implemented in 2013 and 2014.

Administrators and assistants who draft tender specifications and participate in evaluation committees are considered occupying sensitive functions in the sense that they can influence decisions, require contacts with third parties as well as specialised knowledge.

The responsibilities of the Heads of Information Offices may be considered highly sensitive, as they represent the Parliament in a Member State. The posts of administrators and assistants in the offices are considered sensitive because their role is not only limited to communication activities but also financial responsibilities.

The "imprest account administrator" posts in DG COMM are also considered to be sensitive positions.

Human Resources assistants highly involved in the selection of candidates from CAST lists and reserve lists to be proposed for a contract or appointment are as well considered to have sensitive functions.

The following actions and measures have been implemented and are envisaged to further improve the control environment:

1. Comprehensive manuals, checklists and routing slips have been further elaborated and updated by the Finance Unit. These documents and updates are available on DG COMM's intranet.
2. An entirely revised and updated set of instructions and guidelines on the management of imprest accounts has been established in 2014.
3. The use of WebContracts for the registration of all contracts and order forms has been made mandatory as of 01/01/2013. This ensures a coherent treatment and verification by the Finance Unit of all procurement procedures/contracts/order forms in Headquarters and in Information Offices and allows enhanced monitoring through the use of the reporting modules.
4. Job descriptions for all AST posts in the Information Offices have been adapted and redrafted to include professional requirements linked to the financial management of communication activities.
5. Financial training sessions adapted to the DG's working environment are undertaken on a regular basis. During 2014, 8 tailor-made financial training missions to the Information Offices (1 ½ day per office) have been undertaken. These training missions paid special attention to each Information Office's specificities. Both trainers and trainees were highly satisfied with the interaction and collaboration of the participants. Since such training sessions proved to be very useful, it is planned to continue such tailor-made sessions until each Information Office has been visited at least once over the next 3 years.

For almost all posts in DG COMM, the risks resulting from the sensitive character of the posts are sufficiently compensated by the existing control environment. Residual risk for management posts and AD posts is compensated by the mobility rules of the European Parliament. Concerning AST posts, especially those holding an "imprest account administrator's" function, a rotation of staff members has taken place. However, an adequate mobility scheme for officials holding the imprest account administrator's function for more than 7 years in the same Information Office needs to be established.

<i>Post identified as sensitive</i>	<i>Actions taken</i>
Imprest account administrator	Rotation of staff members.
Administrator/assistant in an Information Office	Job descriptions for all AST posts in Information Offices have been redrafted to include professional requirements linked to the financial management of communication activities.
Administrator/assistant who draft tender specifications and participate in evaluation committees	Comprehensive manuals have been elaborated, updated and published on DG COMM's intranet.
Human Resources assistants	Rotation of responsibilities between staff members in the Personnel Unit.

6.8. Assessment of the implementation of minimum internal control standards
Évaluation de la mise en œuvre des normes minimales de contrôle interne

Comments on the results of the annual self-evaluation

1. Standards assessed as 'achieved' – good practices

N°	Title	Comments on execution
1.	Mission	All staff is informed of the mission statement of the DG. The mission statement of each unit and directorate of the DG have been updated as part of the risk management exercise. The job description and objectives of each member of staff are stated in his/her annual staff report.
2.	Ethic and organisational values	All staff has access by means of intranet, notes from the DG Personnel and from the Director General to information on all matters relating to staff conduct, prevention and reporting of fraud and irregularities, the Staff Regulation, the Rules of Procedure of the EP, the Financial regulation and its implementation rules, the internal rules, the charters, vademeca, etc

N°	Title	Comments on execution
3.	Staff allocation and mobility	<p>Staff allocation is fully integrated in the budgetary procedure to ensure that the allocation of resources is aligned with political priorities and the pre-defined objectives. It follows a bottom up process whereby all units are invited to express their needs in function of the objectives of their activities. The allocations are, when required, re-assessed during the year to meet the changing needs linked with the activities of the DG.</p> <p>In respect of mobility, DG COMM pursues an active mobility policy implementing the guidelines defined by the central services. End 2012, DG COMM performed an extensive assessment of all sensitive functions, both at its central services in Brussels and in the EPIOs, following the methodology proposed by DG FINS which takes into account both the functions carried out by the job holder and the assessment of the control environment. A similar exercise will be conducted in 2015 (see annex 6.7)</p>
4.	Staff evaluation and development	<p>All staff members are recruited on the basis of their knowledge and experience. The performance of all staff members is assessed during the annual staff report procedure. Specific problems arising during the year are dealt with separately and measures to correct them are taken if necessary.</p> <p>The need to establish objectives to ensure a clear vision of the contribution expected from each staff and DG priorities is systematically reminded to both managers and jobholders at the time of appraisal procedure. Objectives are systematically discussed with each staff member during appraisal dialogue.</p> <p>The training service ensures the application in the DG of the European Parliament's new professional training policy and it is their responsibility to ensure the development of specialized continuous training particularly for newly recruited staff. Specific training of new officials is discussed with the official upon the taking up of his/her post and training needs are met as soon as possible.</p> <p>Every year all staff members working in the DG have their specific training needs discussed during their staff appraisal, where their needs are identified and detailed in their staff report.</p> <p>Given the decentralised structure of DG COMM, with staff in central services and in the 34 information offices, a special effort is made to ensure that all staff are properly trained and aware of the various procedures and financial rules: this has, inter alia, been ensured through tailor-made training on financial procedures in the information offices (8 in 2014).</p>
6.	Risk analysis and management	<p>Further to the review of the risk register in January 2014 and June 2014, DG COMM major risks were all accepted. Moreover during the bi-annual risk management meeting between DG COMM and Risk Management Service it came into light that residual risks listed in DG COMM's register would be considered as persisting problems rather than uncertain risks. DG COMM is committed to launch a new risk management exercise in the framework of the development of a reporting matrix integrating all operations within strategic platforms as a basis to report on performance management, cost accounting and risk management. This will represent DG COMM's primary reporting tool and will ensure an ongoing assessment of the communication strategy implementation at the centralized and de-centralized level. The reporting matrix will of course be consistent with the new Strategic Execution Framework submitted to the Secretary General on December 2014.</p>
7.	Operational structure	<p>DG COMM applies a partly decentralised financial circuit. Operational units are empowered, within certain limits, to authorise transactions which fall under their competence. An independent verification on legality and regularity is operated by the Finance Unit. These rules have been communicated to all staff and are available on Intranet. All financial delegations have been given in conformity with the applicable rules. All delegated and sub-delegated authorising officers have acknowledged receipt of the corresponding charter. Subdelegations have been updated in order to accommodate the modifications set out by the reorganisation of services.</p>

N°	Title	Comments on execution
8.	Processes and procedures	<p>All relevant processes and procedures are documented either on paper or on the intranet. They are updated where appropriate in order to maintain compliance with rules i.e. regarding modification to the Financial Regulation and its Implementing Rules, internal rules of the Parliament. Financial circuits, checklists are constantly updated and/or improved. User manuals were developed on procurement procedures adapted to DG COMM's working environment and are regularly updated. All this material including internal instructions are also available on the Finance Unit's Intranet website. The Finance Unit sends on a regular basis to all financial actors concerned 'tips of the week' which provides the latest information on new/revised rules and new templates/manuals that have been made available. The documentation on procurement and contract procedures is now considered as completed. Guidelines on imprest account has been revised and updated in 2014.</p> <p>All financial transactions are registered in FINORD. Derogations from the standard policies, regulations or procedures are requested and if appropriate granted in a written form. A record is kept of all exceptions which are presented in the monthly financial management reports where considered appropriate, the relevant Periodic Activity Report and in the Annual Activity Report. 'Notes to file' are also established and kept in the relevant file by the central financial archive.</p>
9.	Management supervision	<p>Management ensures that there is an appropriate reporting which permits adequate supervision of the state of internal control.</p> <p>Supervision of transactions is carried out through a combination of ex-ante controls and regular financial reporting on key indicators such as budget implementation, payment delays, transactions proceeded and controlled.</p> <p>Supervision of the financial management of the Information Offices has been further reinforced i.e. through the revision of the methodology for the programming (Geda(2013)39764), linking activities to pre-defined objectives. Supervision of the planning of procedures is done through the launching of an annual exercise on procurement procedures to launch, which is presented to the Director General and reviewed at least twice during the year (mid-term review and 3rd quarter).</p> <p>The identification of major risks and the actions planned to mitigate the risks are subject to a bi-annual review.</p> <p>All services using external staff are instructed to pay attention that in their daily dealings with external staff (as defined in "guidelines on relations with external staff") they do not treat the latter as part of the organisation and hierarchical structure of the service as though they were covered by the Staff Regulation.</p>
10.	Continuity of operations	<p>Various measures have been taken to ensure the continuity of services and to avoid that unnecessary delays are incurred during holidays of the year-end closure due to the absence of a financial actor (Geda(2011)49188). The systems of deputising and permanence has been closely monitored and enhanced in 2013 (Geda(2013)33569).</p>
11.	Document management	<p>A document management officer and a local security officer have been appointed. All incoming and outgoing mail is systematically registered in GEDA. All original financial files are archived in DG COMM's central financial archives in Brussels. An internal system of digital archiving of these files will be maintained until WebContracts, the new financial information system and the document management system to be implemented by GIDOC allow for a full electronic archiving of all procurement and financial documents.</p> <p>The document management team was set up in October 2012 and reinforced in May 2013 and June 2014, in order to comply with the regulatory framework (Bureau Decision PE 422.661/BUR and the implementing measures adopted by the Secretary-General D(2013)44804). The implementation of the policy is ensured by participation in the works of the interdepartmental group of document management officers and its various subgroups. DG COMM has adopted its Document Filing Plan and Retention List for documents in agreement with the end users. A network of responsible persons in the field has been set up for the implementation of the policy and the dissemination of the relevant information. DG COMM is collaborating to the creation of the European Parliament's Filing plan, as well as in the definition of an IT business case for the development of the aforementioned IT programme that will be the reference of the Institution in this area.</p>

N°	Title	Comments on execution
12.	Information and communication	<p>Senior and Middle Management are briefed on all key policy or administrative issues at least bi-monthly in meeting of the EMC (enlarged management committee) in Brussels and with the EPIOs in Strasbourg. Information is shared with the rest of the staff through meetings at different levels, intranet, notes and “tips of the day” sent by email.</p> <p>The external communication strategy is outlined in the mission statement and work programme of the DG and put in place through DG COMM website, Information Offices’ work in their respective countries, visitors’ strategy, etc. Necessary measures have been taken to ensure procedures for reporting improprieties are established and staff is informed. Should such a case arise, it is dealt with in a fair and equal manner.</p>
13.	Accounting and financial reporting	<p>In respect of the budgetary planning and financial management, a monthly financial management report is drafted and distributed by the Finance Unit to the senior management and is discussed at the management meetings. Throughout the year, regular meetings have been organised with the financial agents to inform and discuss changes in procedures and/or recurring problems in applying the rules.</p> <p>It is made available on intranet. The Finance Unit maintains regular contacts with AOs to ensure the adequate financial implementation and that is consistent with the budget and the planning approved. Adjustments are done according to needs. More in-depth analyses are carried out during the mid-term review exercise and at the occasion of the mopping up exercises launched by DG FINS. Surplus and deficits identified during these exercises are when possible rebalanced between activities of the different directorates.</p>
16.	Audit reports	<p>The Finance Unit is the unique contact point with the Internal Audit Service and the Court of Auditors. It provides the audit services with information / documentation requested and is responsible for the written response to queries raised. Where audit findings require corrective measures to be taken, the Finance Unit works in collaboration with the operational units concerned to ensure that there is an appropriate response to the controlling bodies and that an action plan is established to implement the accepted recommendations.</p>

2. Standards assessed as 'almost achieved' – further work required

N°	Title	Comments on execution
5.	Objectives and performance indicators	<p>The overall objectives of the DG and the expected results are outlined in detail in the beginning of each year and presented in the 1st activity report of the DG. Specific objectives for individual members of staff are defined during the appraisal exercise and included in the staff report.</p> <p>Throughout 2014, DG COMM has carried out extensive work to develop an integrated reporting matrix linking key activities and related centralized and decentralized operations to different communication platforms and in turn to the main strategic objective of awareness raising. The matrix is now providing the framework for our performance management, risk management and cost accounting. An extensive catalogue of indicators and measurements was developed however work need to be completed in order to comply with new instructions of the Secretary General on establishing metrics for performance measurement in the context of individual DGs’ Strategic Execution Framework.</p>
14.	Evaluation of activities	<p>Evaluations are performed in accordance with the evaluation standards. They are planned and carried out in a transparent and consistent way so that results are available in due time for operational and strategic decision-making and reporting needs. For example, DG COMM carried out an evaluation exercise of the European Youth Event bringing together 5.000 Europeans aged 16-30 to exchange ideas on youth-related issues in Strasbourg in May 2014. The evaluation exercise was carried out by means of onsite participants’ satisfaction surveys and online questionnaires with a very positive outcome. Moreover DG COMM carried out an ex post evaluation of its multi-annual grants program over the years 2012-2014. The report confirmed that grants had proven to be an effective communication tool for raising the awareness about the role of the EP, disseminating information on EP and its activities and increasing knowledge and understanding of the three pillars around which the EP operates, namely politics, policies, values. The network of partners has substantially reinforced the visibility of the EP actions thanks to the multiplying effect. In addition, grants provide a high return on investment since projects are co-financed for an average rate of 57.3% whereas the</p>

N°	Title	Comments on execution
		project is being realised to 100% by the beneficiaries. At the end of 2014, DG COMM launched a call for tender for an ex-post evaluation of the EE2014 information and communication campaign. Work with the external contractor will start soon and a final report will be available mid 2014.
15.	Assessment of internal control systems	In order to verify that processes are working as designed, DG COMM takes into account several sources of information, which are mainly gathered through (a) the discussions during the weekly management meetings, (b) the information included in the reports issued by controlling bodies, (c) the results of the ex-ante verifications carried out on all financial transactions which may give rise to remarks or observations and (d) the regular financial reporting. Where potential control weaknesses are identified, appropriate actions are taking to revise or update procedures and guidelines.
