Amendment 4
Peter Liese on behalf of the PPE Group

Report A8-0215/2015
Sirpa Pietikäinen
Resource efficiency: moving towards a circular economy

Motion for a resolution
Paragraph 19

19. Urges the Commission to propose, by the end of 2015, a binding target to increase resource efficiency at EU level by 30% by 2030 compared with 2014 levels, as well as individual targets for each Member State; stresses that, before resource-efficiency targets can be implemented, they must be underpinned by indicators;

Report
Sirpa Pietikäinen
Resource efficiency: moving towards a circular economy

Motion for a resolution
Paragraph 35

Motion for a resolution

35. Urges the Commission to submit the announced proposal on the review of waste legislation by the end of 2015, diligently applying the waste hierarchy, and to include the following points:

– clear and unambiguous definitions;
– developing waste prevention measures;
– setting binding waste reduction targets for municipal, commercial and industrial waste to be achieved by 2025;
– setting clear minimum standards for extended producer responsibility requirements to ensure transparency and cost effectiveness of the extended producer responsibility schemes;
– applying the ‘pay-as-you-throw-principle’ for residual waste combined with mandatory separate collection schemes for paper, metal, plastic and glass in order to facilitate the high quality of recycling materials; introducing mandatory separate collection for biowaste by 2020;
– increasing recycling/preparation for reuse targets to at least 70 % of municipal solid waste and 80 % recycling of packaging waste by 2030, based on a solid reporting method preventing the reporting of discarded waste (landfilled or incinerated) as recycled waste, using the same...

harmonised method for all Member States with externally verified statistics; an obligation for recyclers to report on the ‘input’ quantities of waste going into the sorting plant as well as on the ‘output’ quantity of recyclates coming out of the recycling plants;

– strictly limiting incineration, with or without energy recovery, by 2020, to non-recyclable and non-biodegradable waste;

– a binding, gradual reduction of all landfilling, implemented in coherence with the requirements for recycling, in three stages (2020, 2025 and 2030), leading to a ban on all landfilling, except for certain hazardous waste and residual waste for which landfilling is the most environmentally sound option;

– **introducing fees** for landfilling and incineration;

harmonised method for all Member States with externally verified statistics; an obligation for recyclers to report on the ‘input’ quantities of waste going into the sorting plant as well as on the ‘output’ quantity of recyclates coming out of the recycling plants;

– strictly limiting incineration, with or without energy recovery, by 2020, to non-recyclable and non-biodegradable waste;

Report  
Sirpa Pietikäinen  
Resource efficiency: moving towards a circular economy  

Motion for a resolution  
Paragraph 47  

Motion for a resolution  

47. Calls on the Commission to propose, by the end of 2015, targets, measures and instruments to efficiently tackle food waste, including setting a binding food waste reduction target of at least 30% by 2025 in the manufacturing, retail/distribution, food service/hospitality sectors and the household sector; calls on the Commission, when conducting an impact assessment on new relevant legislative proposals, to evaluate their potential impact on food waste;

Amendment  

47. Calls on the Commission to propose, by the end of 2015, targets, measures and instruments to efficiently tackle food waste, including setting a binding food waste reduction target of at least 30% by 2025 in the manufacturing, retail/distribution, food service/hospitality sectors and the household sector; calls on the Commission, when conducting an impact assessment on new relevant legislative proposals, to evaluate their potential impact on food waste;  

Or. en
52. **Urges** the Commission to **propose that** BAT (best available technologies) principles and standards be **applied to** all materials and parts of buildings, and to develop a building passport based on the whole lifecycle of a building; **considers that the building passport should increase transparency and contain information to facilitate maintenance, repair, renovation and recycling;**

**Amendment 8**
Peter Liese
on behalf of the PPE Group

**Report**
Sirpa Pietikäinen
Resource efficiency: moving towards a circular economy

**Motion for a resolution**
**Paragraph 53**

53. Considers that, as 90% of the 2050 built environment already exists, special requirements and incentives should be set for the renovation sector in order to **have mainly energy-positive buildings by 2050**; calls on the Commission, therefore, to **develop a long-term strategy for the renovation of existing buildings and to upgrade the role of national renovation strategies introduced by Directive 2012/27/EU on energy efficiency**;

53. Considers that, as 90% of the 2050 built environment already exists, special requirements and incentives should be set for the renovation sector in order to **improve the energy footprint of buildings by 2050**;

Report
Sirpa Pietikäinen
Resource efficiency: moving towards a circular economy

Motion for a resolution
Paragraph 60

Motion for a resolution
Amendment

60. Calls on the Commission to propose compulsory green public procurement procedures; considers that reused, repaired, remanufactured, refurbished and other sustainable and resource-efficient products and solutions are to be preferred in all public procurement, and if they are not preferred, the ‘comply or explain’ principle should apply;

60. Calls on the Commission to propose public procurement procedures in which reused, repaired, remanufactured, refurbished and other sustainable and resource-efficient products and solutions are to be preferred and, if they are not preferred, the ‘comply or explain’ principle should apply;

Amendment 10
Peter Liese
on behalf of the PPE Group

Report
Sirpa Pietikäinen
Resource efficiency: moving towards a circular economy

Motion for a resolution
Paragraph 65

Motion for a resolution

65. Urges the Commission to present the communication on sustainable food, which has been postponed several times since 2013, during the first half of 2016; stresses that, as the production and consumption of food accounts for a significant share of resource use, that communication should holistically address resource inefficiencies in the food chain and encourage the development of a sustainable food policy; calls on the Commission to assess increasing the use of environmentally friendly food packaging, including an assessment of the feasibility of gradually replacing food packaging with bio-based and biodegradable, compostable material in accordance with European standards;

Amendment

65. Urges the Commission to present the communication on sustainable food, which has been postponed several times since 2013, during the first half of 2016; stresses that, as the production and consumption of food accounts for a significant share of resource use, that communication should holistically address resource inefficiencies in the food chain and encourage the development of a sustainable food policy; calls on the Commission to assess increasing the use of environmentally friendly food packaging, including an assessment of the feasibility of using bio-based and biodegradable, compostable material when appropriate in accordance with European standards and a lifecycle-based approach;
