Motion for a resolution**Paragraph 8***Motion for a resolution*

8. Believes that the effects of digitalisation on health and safety at work need to be assessed and existing health and safety measures adapted accordingly; ***notes the possibility of accidents to which persons teleworking or crowdworking from home may be exposed***; emphasises that work-related mental health problems ***such as burnout caused by constant accessibility and the erosion of traditional working time arrangements represents a serious risk for workers***; calls on the Commission to ***arrange for a study to be produced on the spillover effects of digitalisation, such as greater labour intensity, on workers' psychological wellbeing and family life and on the development of cognitive abilities in children***;

Amendment

8. Believes that the effects of digitalisation on health and safety at work need to be assessed and, ***where necessary***, existing health and safety measures adapted accordingly; emphasises that ***digitalisation increases autonomy and flexible working hours, thus enabling a better work-life balance, but may also, in some cases, give rise to new challenges such as*** work-related mental health problems, ***including*** burnout, caused by constant accessibility and the erosion of traditional working time arrangements; calls on the Commission to ***facilitate the exchange of best practices between Member States, in both the public and private sectors, as regards the negative and positive effects of digitalisation, such as labour intensity and flexible working hours, on workers' psychological wellbeing and on enabling a better work-life balance***;

Paragraph 53

Motion for a resolution

53. Highlights the importance of a successful implementation of EFSI to maximise investments by targeting projects with higher-risk profiles, boosting economic recovery, stimulating growth, and incentivising private investments, *inter alia* microfinancing and venture capital to support innovative companies at different funding stages of their development; stresses, in cases of market failure, the importance of fully exploiting the public funds already available for digital investments, of enabling synergies between EU programmes such as Horizon 2020, CEF, other relevant structural funds and other instruments, including community-based projects and state aid in compliance with state aid guidelines, *in order* to promote public WLAN networks in larger and smaller municipalities, as this has *proven* to be indispensable for regional, social and cultural integration as well as education;

Paragraph 76

Motion for a resolution

76. Takes the view that some online intermediaries and online platforms generate income from cultural works and content, but this income may not always be shared with the creators; calls on the Commission to consider evidence-based options to address any transfer of value from content to services that will make it possible for authors, performers and right holders to be fairly remunerated for the use of their work on the internet without hampering innovation;

Amendment

76. Takes the view that some online intermediaries and online platforms generate income from cultural works and content, but this income may not always be shared with the creators; calls on the Commission to consider evidence-based options to address any *lack of transparency and* transfer of value from content to services that will make it possible for authors, performers and right holders to be fairly remunerated for the use of their work on the internet without hampering innovation;
