Amendment 219
on behalf of the GUE/NGL Group

Report
Michel Dantin
Quality of water intended for human consumption

Proposal for a directive
Article 13 – paragraph 1 – point b a (new)

Text proposed by the Commission

Amendment

(ba) banning water disconnections by water suppliers to households;

Or. en

Justification

Households need to be kept connected to drinkable water supply irrespective whether the water supplier is public or private owned: it is their right to have free access to water that cannot be denied.
Amendment 220
Lynn Boylan, Eleonora Forenza, Patrick Le Hyaric, Dimitrios Papadimoulis, Sofia Sakorafa, Sabine Löning, Stelios Kouloglou, Merja Kyllönien, Kostadinka Kuneva, Jiří Maštálka, Marisa Matias, Neoklis Sylikiotis, Takis Hadjigeorgiou, Barbara Spinelli, Ángela Vallina, Paloma López Bermejo, Luke Ming Flanagan on behalf of the GUE/NGL Group

Report
Michel Dantin

Proposal for a directive
Article 13 – paragraph 1 – point c – point ii

Text proposed by the Commission
(ii) encouraging the provision of such water in administrations and public buildings;

Amendment
(ii) ensuring the free provision of such water in administrations and public buildings, as well as discouraging the use of water put in single use plastic bottles or containers in such administrations and buildings;

Or. en
Amendment 221
on behalf of the GUE/NGL Group

Report
Michel Dantin
Quality of water intended for human consumption

Proposal for a directive
Article 13 – paragraph 2 a (new)

Text proposed by the Commission

2a. Taking into account the data collected under the provisions set out in point (a) of Article 15(1), the Commission shall collaborate with Member States to support municipalities in the Union to enable them to access technical assistance, available Union funding and long-term public loans at a preferential interest rate, particularly for the purpose of maintaining and renewing water infrastructure in order to ensure the provision of high quality water, and to extend water and sanitation services to vulnerable and marginalised population groups.

Or. en

Justification
In order to allow the most effective implementation of such Directive it is essential that the Commission provides all cooperation to Member states also activating public financial funds and loans to maintaining and improving efficiency and capacity of water infrastructure of those municipalities within the Union where more disadvantages could be suffered by vulnerable groups.
Amendment 222
on behalf of the GUE/NGL Group

Report
Michel Dantin
Quality of water intended for human consumption

Proposal for a directive
Article 15 – paragraph 3 a (new)

Text proposed by the Commission

3a. In order to support the Member States in implementing this Article, the Commission shall establish, if appropriate, in cooperation with the Member States, a Union Water Poverty Observatory, with the aim of promoting the development of common indicators to assess physical and economic access to water, of providing a user-friendly and open-access resource that will promote public engagement on the issue of water poverty, of disseminating information and good practice to ensure access to water for all, of facilitating knowledge-sharing among stakeholders, as well as of supporting informed decision-making at local, national and Union level.

Or. en

Justification

Establishing a Water poverty Observatory could be useful in order to provide non binding exchange of information and dissemination of best practices, without interfering with the assessment of the implementation of the Directive by the Member States.
### Amendment 223

on behalf of the GUE/NGL Group

### Report

Michel Dantin

Quality of water intended for human consumption

### Proposal for a directive

Member States shall ensure that the condition \[rac{\text{[nitrate]}}{50} + \frac{\text{[nitrite]}}{3} \leq 1\], where the square brackets signify the concentrations in mg/l for nitrate (NO\(_3\)) and nitrite (NO\(_2\)), is complied with and that the value of 0,10 mg/l for nitrites is complied with ex water treatment works.

‘Pesticides’ means:
- organic insecticides,
- organic herbicides,
- organic fungicides,
- organic nematocides,
- organic acaricides,
- organic algicides,
- organic rodenticides
- organic slimicides,
- related products
and their relevant metabolites as defined in Article 3(32) of Regulation (EC) No 1107/2009.

The parametric value applies to each individual pesticide.

In the case of aldrin, dieldrin, heptachlor and heptachlor epoxide, the parametric value is 0,030 μg/l.

‘Pesticides — Total’ means the sum of all individual pesticides, as defined in the previous row, detected and quantified in the monitoring procedure.

‘PFAS’ means each individual per- and polyfluoroalkyl substance (chemical formula: CnF2n+1−R).

‘PFASs Total’ means the sum of per- and polyfluoroalkyl substances (chemical formula: CnF2n+1−R).

Sum of concentrations of the following specified compounds: benzo(b)fluoranthene, benzo(k)fluoranthene, benzo(ghi)perylene, and indeno(1,2,3-cd)pyrene.

calculated according to specifications of the maximum release from the corresponding polymer in contact with the water.

**Justification**

The Epidemiological Observatory on human health when assessing the concentration of harmful substances provide all values in nano-grams as the more closely related to the effects on humans. Therefore the proposed value in micrograms has to be update accordingly in order to deliver an effective reliable threshold of PFAS. Moreover many new PFAS of 2nd and 3rd generation not yet detected are delivered in water and cumulate to the already known PFAS.

Justification

An uncertainty of measurement of PFAS up to 50% is excessive and not in line even with the existing and used medical devices by the Human health Observatory whose values are provided with a maximum of 20% as proposed in the amended text.
