<td>(2 a) In the context of enhanced environmental and climate ambition, and in line with the European Green Deal objectives, promotion of meat consumption through meat promotion schemes and campaigns should be no longer supported under the CAP funding. Measures for the promotion of meat consumption are mostly driven by the economic interests, neglecting their impact on public health, animal welfare, biodiversity and environment. Meat promotion schemes counteract national and EU policies in these areas that aim for healthy diets and reduction of meat consumption. In this context protection of public health, animal welfare and the environment should be taken into account as a priority.</td>

Amendment 280
Anja Hazekamp
on behalf of the GUE/NGL Group

Report
Eric Andrieu
Common agricultural policy – amendment of the CMO and other Regulations

Proposal for a regulation
Recital 2 b (new)

Text proposed by the Commission

(2 b) One of the objectives laid down in the Farm to Fork strategy is to increase the availability of alternative proteins, such as plant-based proteins and meat substitutes, which will contribute to the Union's ambition to reduce greenhouse gas emissions in the fight against climate change. In that context, introducing barriers to the availability and marketing of safe and environmentally friendly alternative protein sources should therefore be avoided.

Amendment
