Article 68a
Investments in irrigation

1. Without prejudice to Article 68 of this Regulation, in the case of irrigation in new and existing irrigated areas and drained areas, only investments that fulfil the conditions laid down in this Article shall be considered as eligible expenditure.

2. A river basin management plan, as required under the terms of Directive 2000/60/EC shall have been notified to the Commission for the entire area in which the investment is to take place, as well as in any other areas whose environment may be affected by the investment. The measures taking effect under the river basin management plan in accordance with Article 11 of that Directive and of relevance to the agricultural sector shall have been specified in the relevant programme of measures.

3. Water metering enabling measurement of water use at the level of the supported investment shall be in place or shall be put in place as part of the investment.
4. An investment in irrigation shall not be eligible if it does not lead to a net reduction in the water used for irrigation in that catchment area or if it is not consistent with the achievement of good status of water bodies, as laid down in Article 4(1) of Directive 2000/60/EC, including expansion of irrigation affecting water bodies whose status has been defined as less than good in the relevant river basin management plan, taking also into account the projected impacts of climate change on water availability.

5. Member States shall limit the support to the maximum rate of 75% of the eligible costs. The maximum support rate may be increased for investments in outermost regions and areas with natural constraints, including mountain and island regions.

Article 68b
Installation of digital technologies

1. Without prejudice to Article 68, Member States may grant support for the installation of digital technologies in rural areas under the conditions set out in this Article and as further specified in their CAP Strategic Plans with a view to contributing to the cross-cutting objective set out in Article 5 and to the specific objectives set out in Article 6.

2. Member States may grant support under this type of interventions to help the installation of digital technologies to support, inter alia, precision farming, Smart Villages rural enterprise as well as the development of ICT infrastructures at farm level, with a priority given to local SMEs, and keeping in mind the need to avoid increased debts and dependency of the farmers towards digital technologies providers.

3. Member States may only grant supports to investments in digital technologies producing aggregated data if such data is made available to the public.

3. Member States shall limit the support for the installation of digital
technologies to the maximum rate of the eligible costs laid down in Annex IXaa.
