Improving development effectiveness and the efficiency of aid
(2019/2184(INI))

Motion for a resolution**Paragraph 62***Motion for a resolution**Amendment*

62. Notes with grave concern that the EU and Member States are currently attaching conditions to aid related to cooperation by developing countries on migration and border control efforts, which is clearly a donor concern in contradiction with key internationally agreed development effectiveness principles; recalls that aid must keep its purposes of eradicating poverty, reducing inequality, respecting and supporting human rights and meeting humanitarian needs, and must never be conditional on migration control;

62. Believes that European development aid and public investments should promote joint priorities and policy objectives including eradicating poverty, climate and environmental action, economic and trade policies and migration management, and should also be fully aligned with the principles of fundamental human rights, democracy and good governance;
