Report
Deirdre Clune
Shaping the digital future of Europe: removing barriers to the functioning of the digital single market and improving the use of AI for European consumers (2020/2216(INI))

Motion for a resolution
Paragraph 52 a (new)

Motion for a resolution

Amendment

52a. Underlines that consumers need to be protected from dangerous or counterfeit products; underlines that AI is a relevant tool in the fight against these unlawful commercial products and content; considers that AI should be able to automatically identify and block products and content previously flagged as dangerous or counterfeit, and that platforms hosting commercial content or selling products should be held responsible for the products they sell or advertise;

Or. en
62. **Believes that** the establishment of review boards for AI products and services by organisations and businesses to assess the potential benefits and potential harm, notably the potential social impact, stemming from high-risk, impactful AI-based projects can be a useful tool to help organisations make responsible decisions about AI products and services, particularly when they include relevant stakeholders;

62. **Calls on the Member States to encourage and support** the establishment of specialised review boards for AI products and services in the Member States to assess the potential benefits and potential harm stemming from high-risk, impactful AI-based projects;
