Amendment 8
Joëlle Mélin, Angelo Ciocca, Stefania Zambelli, Marco Campomenosi
on behalf of the ID Group

Report
Véronique Trillet-Lenoir
Strengthening Europe in the fight against cancer
(2020/2267(INI))

Motion for a resolution
Paragraph 9 a)

Motion for a resolution
Amendment

a) an increase and an upward convergence in minimum excise duties for all tobacco products and their final market price, which would improve prevention by reducing tobacco uptake and use, notably among current smokers, and prevent young people from starting smoking;

Amendment 9
Joëlle Mélin, Angelo Ciocca, Stefania Zambelli, Marco Campomenosi
on behalf of the ID Group

Report
Véronique Trillet-Lenoir
Strengthening Europe in the fight against cancer
(2020/2267(INI))

Motion for a resolution
Paragraph 19

Motion for a resolution

19. Emphasises the role of a healthy diet in preventing and limiting the incidence and the recurrence of cancer, and stresses that individual cancer risks can be reduced by an increased consumption of sustainably-produced plants and plant-based foods, such as fresh fruits and vegetables, whole grains and legumes; emphasises, furthermore, the need to address the overconsumption of meat and ultra-processed products, and products high in sugars, salt and fats; welcomes, therefore, the upcoming revision of the EU school fruit, vegetables and milk scheme and of the EU’s policy on the promotion of agricultural products; asks the Commission and the Member States to encourage and help consumers to make informed, healthy and sustainable choices about food products by means of the adoption of a mandatory and harmonised EU front-of-pack nutritional label that is developed based on robust and independent scientific evidence; welcomes the focus on healthy nutrition in the EU Child Guarantee and calls for a new EU Action Plan on Childhood Obesity; supports fiscal measures to make fresh foods (such as fruits and vegetables, pulses, legumes and wholegrains) more affordable and accessible at national level, especially for people on low incomes; encourages
Member States to use pricing policies, such as value added tax differentiation, and marketing controls to influence demand for, access to, and the affordability of food and drink low in saturated fats, trans-fats, salt and sugar; supports Member States in revising the relevant provisions to restrict the advertising of sweetened beverages and processed food products high in fats, salt and sugar, including advertising on social media, and calls on the Commission to come forward with a proposal for a comprehensive EU-wide regulation to prohibit such advertising to minors; accessible at national level, especially for people on low incomes; encourages Member States to use pricing policies, such as value added tax differentiation, and marketing controls to influence demand for, access to, and the affordability of food and drink low in saturated fats, trans-fats, salt and sugar; supports Member States in revising the relevant provisions to restrict the advertising of sweetened beverages and processed food products high in fats, salt and sugar, including advertising on social media, and calls on the Commission to come forward with a proposal for a comprehensive EU-wide regulation to prohibit such advertising to minors;

30. Calls in particular for the strengthening of the information requirements on carcinogenicity under the Registration, Evaluation, Authorisation and Restriction of Chemicals Regulation (REACH)\textsuperscript{55} in order to enable the identification of all carcinogenic substances manufactured or imported, irrespective of their volume, in line with the Chemicals Strategy for Sustainability, and calls also for the registration, evaluation, authorisation and restriction of chemicals, including EDCs, under the REACH Regulation to be conducted in association with the IARC and WHO assessments; welcomes the commitment in the Chemicals Strategy for Sustainability to extend the generic approach to risk management to ensure that consumer products do not contain chemicals that cause cancers, gene mutations, affect the reproductive or the endocrine system, or are persistently or bioaccumulatively toxic; calls on the Commission to swiftly implement the measures planned in the Chemicals Strategy for Sustainability to reduce citizens’ exposure to carcinogenic and endocrine-disrupting substances through all exposure pathways; calls on the Commission to devote particular attention to segments of the population that are particularly vulnerable to hazardous chemicals and to better take into account these vulnerable populations in the risk assessments of chemicals; stresses that information to consumers on exposure pathways their everyday life is key to strengthening prevention, and welcomes in this regard the
establishment of the Substances of Concern in Products database; calls on the EEA to produce a report together with the European Chemicals Agency on chemicals in the environment in Europe; calls for the report to assess the systemic nature of carcinogenic and EDCs within Europe’s production and consumption systems, their use in products, their occurrence in Europe’s environment, and the harm caused to human health, especially concerning cancer;

particularly vulnerable to hazardous chemicals and to better take into account these vulnerable populations in the risk assessments of chemicals; stresses that information to consumers on exposure pathways in their everyday life is key to strengthening prevention, and welcomes in this regard the establishment of the Substances of Concern in Products database; calls on the EEA to produce a report together with the European Chemicals Agency on chemicals in the environment in Europe; calls for the report to assess the systemic nature of carcinogenic and EDCs within Europe’s production and consumption systems, their use in products, their occurrence in Europe’s environment, and the harm caused to human health, especially concerning cancer;

Motion for a resolution

Paragraph 60

60. Calls on the EU and the Member States to reinforce cooperation with the WHO and to work towards the implementation of WHO policy recommendations and guidelines;
Motion for a resolution
Paragraph 86

86. **Strongly advocates the extension** of joint procurement procedures, especially for (ultra) rare, paediatric and novel cancer medicines and treatments, diagnostic procedures, companion diagnostic tests, and cancer-preventing vaccines like the HPV and hepatitis B vaccines, to counter shortages and improve affordability and access to cancer treatments at EU level; notes that joint procurement procedures should improve response times and be transparent; highlights that joint public procurement should not hinder patient access and medical innovation;

Amendment 13
Joëlle Mélin, Angelo Ciocca, Stefania Zambelli, Marco Campomenosi
on behalf of the ID Group

Report
Véronique Trillet-Lenoir
Strengthening Europe in the fight against cancer
(2020/2267(INI))

Motion for a resolution
Paragraph 98

98. Takes note of the Commission’s legislative proposal to establish a Health Emergency Preparedness and Response Authority (HERA); notes that, by 2023 and every two years thereafter, the Commission should carry out an in-depth review of the implementation of the operations of HERA, including its structure, governance, funding and human resources; notes that these reviews must address, in particular, any need to modify HERA’s structure, including but not limited to the possibility of upgrading it to a stand-alone agency, revising its mandate and understanding the financial implications of any such modification; notes that the Commission should report on the findings of the reviews to the European Parliament and the Council and that these findings should be made public; notes that these reviews should be accompanied, where appropriate, by a legislative proposal to address the outlined issues, fully respecting the European Parliament’s role as co-legislator; considers that if HERA is upgraded to a stand-alone agency, it could, at that point, be able to anticipate, incentivise, co-develop and facilitate rapid, equal and sustainable access to cancer innovations for cancer patients, including diagnostic procedures as well as companion
diagnostic tests; considers that HERA could, in the long term, closely collaborate with public and private entities to plan, coordinate and build an ecosystem of private and public capabilities that can provide suitable emergency frameworks for EU access to key raw materials in case of global supply shocks.

Amendment 14
Joëlle Mélin, Angelo Ciocca, Stefania Zambelli, Marco Campomenosi
on behalf of the ID Group

Report
Véronique Trillet-Lenoir
Strengthening Europe in the fight against cancer
(2020/2267(INI))

Motion for a resolution
Paragraph 139

139. Supports the recommendation of the JARC for the roll-out of a European unique patient identifier, the Survivorship Passport, and guidelines on long-term surveillance and the transition from paediatric to adult care, in order to ensure the monitoring of long-term outcomes in childhood cancer survivors in a cross-border setting; stresses the need for the right to be forgotten’ to be fit for purpose for this population;

Report  A9-0001/2022
Véronique Trillet-Lenoir
Strengthening Europe in the fight against cancer
(2020/2267(INI))

Motion for a resolution
Paragraph 186

Motion for a resolution
Amendment

186. Welcomes the launch of the Knowledge Centre on Cancer in 2021 in order to contribute to the exchanges and coordination of scientific and technical initiatives related to cancer at EU level; considers that the knowledge centre should involve all stakeholders (representatives of each NCCP, patients’ and caregivers’ associations, learned societies, relevant EU bodies and agencies, representatives of economic operators, etc.); believes that this knowledge centre should be based on data screening, ERN reports and cancer registries; considers that its mission should be clearly defined and include:

a) coordinating the network of all NCCPs;

b) producing a European roadmap to trigger large-scale prevention campaigns and educational programmes on health promotion;

c) coordinating the establishment of common quality criteria to guide the national accreditation of screening programmes,
cancer registries and cancer care centres;

d) developing, on the basis of the latest scientific evidence, clinical practice guidelines and quality assurance schemes to improve the entire care pathway for all cancer types, and in particular for rare and paediatric cancers;

e) drafting annual reports and establishing frameworks to improve data collection from screening programmes, cancer registries and ERNs at EU level;

f) presenting studies on the impact of prevention and diagnosis, including estimates concerning the reduction of economic costs generated through increased investment in prevention and diagnosis;

g) coordinating the exchange of best practices and results between the ERNs and the Comprehensive Cancer Centres;

h) generating a comprehensive model based on the Plan and Horizon Europe, and with input from patients and carers, in order to identify research priorities and possibly enable the development of a coordinated and efficient cancer research force in Europe;

i) facilitating the sharing of anonymised data, collected in a European Cancer Cloud, for clinicians and researchers, as well as for entities developing health services and modern technological solutions for cancer patients;
j) supporting common training programmes for health professionals, patients and caregivers;

k) delivering updated, certified and transparent information to citizens and professionals on cancer causes, treatments and EU legislation;

l) monitoring the level of implementation of relevant recommendations in the Member States’ NCCPs, and regularly making available the results of this monitoring;

m) proposing measurable and reproducible indicators for the main outcomes outlined in the Plan;
